HEREFORD INFLUENCE .COM

Hoffman Ranch is proud to introduce our Hereford Influence program.

We are excited to offer you an avenue to market your "white face" commercial cattle that are Hoffman bred.

Whether you are selling them at the sale barn, by video or by private treaty, we will list them free of charge to help you gain as much exposure as possible. We value Hereford influenced cattle and are striving to provide other cattlemen from coast-to-coast access to quality genetics. We have high hopes that HerefordInfluence.com will become a household name and a trusted resource.

HerefordInfluence.com

Buy with confidence and know
that we believe in our genetics
enough to provide you an
outlet to market them.

modern, stout, functional

2017 Annual Bull Sale

Dear Cattlemen,

We are excited to offer you our deepest, most useful set of bulls to date. These bulls are designed by cattlemen for cattlemen. The older bulls are range hardened and are forced to get a lot of exercise. We are relentless on sifting for feet and structure, no exceptions are given!

We feel in tougher markets, better genetics from reputable breeders are more valuable than ever. We are constantly trying to add better and fresher genetics. Our bulls sell from coast-to-coast and border-to-border. They are expected to hold up in any environment. This is something we are very proud of. Although several go beyond Nebraska's border, many of them stay right here in the heart of the Sandhills.

Again in 2017, Hoffman Ranch exhibited the Grand Champion Carload of Hereford bulls in Denver. All of these were brought home to sell in the February 17th sale.

Be sure to join us Thursday, the day prior to the bull sale, in Valentine Nebraska for an outstanding set of open and bred commercial replacement females. If we can be of any assistance please don't hesitate to call.

My Best,

Jason Hoffman

Supplemental Information:

A supplement sheet will be available with complete and up-to-date information on sale day and will be posted online at HoffmanRanch.com.

Cattle Viewing:

All sale cattle are available for viewing at any time.

Can't Attend?

Bid Online At:

LiveAuctions TV 

Register prior to sale day.

Bid Live On:

How to place a bid:
View sale on DISH Network Channel 232 and place your bid over the phone. Register prior to sale day at SuperiorLivestock.com or by calling (800) 431-4452.

Terms & Conditions:

- 1) If any bulls are carriers of genetic defects it will be noted in the footnotes. Bulls have been tested negative for BVDPI.
- 2) Each bull will be sold to the highest bidder without reservation.
- 3) The auctioneer will settle any disputes as to bidding and his decision will be final.
- 4) Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- 5) Individual health papers will be furnished with each animal permitting shipment to any state.
- 6) In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- 7) The animal becomes the property of the purchaser as soon as sold, but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- 8) Any death or injury after the animal is sold is at the buyer's risk.
- 9) Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- 10) Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

Sale Catalog & Marketing:

*Providing you
the BEST!*

We Go the Extra Mile.

Free delivery to any state in the Continental U.S. is something we proudly offer. Occasionally a buyer may need to meet a trailer at a central spot, but we will do our best to get them directly to you.

We Appreciate Your Business.

We value our volume buyers and gladly offer discounts on multiple bulls purchased. Call Hoffman's for details.

*We Guarantee Your Satisfaction on all
Phone Bids or Orders.*

Bids can be called in to Jason (530-604-5096), Denny Hoffman (406-425-0859) or the Office (308-645-2279) before the sale. During the sale, bids can be called into Graham Blagg (530-913-6418). We guarantee satisfaction on all bids or orders.

We Believe in our Program.

Bulls are guaranteed 100% to be sound and healthy breeders, with a first breeding season guarantee unconditional.

We Assist you in the Marketing of your Calves.

We want to assist you with marketing your calves! Every year Hoffman's place large groups of replacement heifers throughout the U.S. We also stay in direct contact with feed yards that are interested and familiar with our genetics. Furthermore, we started **HerefordInfluence.com** to advertise your cattle and list where and when they are selling. This marketing avenue is free of charge and we plan on making it a fast "go to" place for perspective buyers across the country! Call the Hoffman Ranch (308-645-2279) to list your cattle.

We Do It All For You. Our Valued Buyer!

Calving Ease – Direct (CE) :

CE EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving. The EPD for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

Birth Weight (BW) :

The BW EPD is an indicator of birth weight and calving ease. Progeny sired by a bull with a BW EPD of 2.2 can be expected to weigh 3.2 lb. more at birth, on average, than progeny sired by a bull with an EPD of -1.0 lb. (2.2 minus -1.0 = 3.2 lb.) Birth weight is another indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW) :

The WW EPD reflects pre-weaning growth potential. Measured from adjusted 205-day weight. It is an indicator of direct genes for growth independent of milk production of the dam. Calves sired by a bull with a WW EPD of 30 should have a 20 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of +10 lb. (30 minus 10.0 = 20 lb.).

Yearling Weight (YW) :

YW EPD for a sire with an EPD of 87 indicates that on average, his progeny should be 30 lb. above the average of progeny of a bull with an EPD of 57 lb. YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

Maternal Milk (MILK) :

The MM EPD is a prediction of weaning weight differences due to milk and maternal ability of the dam. For a sire, the MM EPD predicts the maternal ability of his daughters expressed in pounds of calf weaned. MM EPD's do not specifically predict pounds of milk produced, but pounds of calf weaned due to maternal production of the dam. It predicts the difference in average weaning weight of sires' daughters' progeny due to milking ability. Daughters of a sire with a MM EPD of 14 should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production over the entire lactation period.

Maternal Milk & Growth (M&G) :

The MG EPD is a combination EPD. It is the MM EPD plus 1/2 the WW EPD. It has no accuracy value since it is simply a combination of two other EPD's. A sire's MG EPD reflects what he is expected to transmit to his daughters for a combination of both growth genetics (WW EPD) and maternal production (MM EPD). This EPD is sometimes referred to as "total maternal" or "combined maternal."

Scrotal Circumference (SC) :

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with an EPD of 0.7 should have yearling scrotal circumference measurements that average 0.7 cm. larger than progeny by a bull with an EPD of 0.0. In this genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have an SC EPD.

Ribeye Area (REA):

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB):

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF] based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

BMI Index (BMI) :

The Baldy Maternal Index is a maternally focused index that has a production system based off of 1000 Hereford x Angus females with a progeny harvest endpoint directed towards CHB. This index is more critical of CE than the Brahman Influence Index and also has significant weight on fertility. There is positive weight on WW and a slightly negative weight on YW which promotes early growth and then a slow down on growth to keep mature size manageable. The weight for IMF is greater than the weight for REA. This is true because of the price difference between the choice-select spread and the fact that there is very little incentive to produce cattle better than a yield grade 3. The question comes up concerning the fact that our branded beef program (CHB) has been successful because of the acceptance of Select cattle. In answer to this, we are using a crossbreeding production system that could sell cattle on several grids and that our CHB program is installing a choice product. This index is geared to service any commercial program that runs British cross cows.

CHB Index (CHB) :

The CHB Index is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so we want them to be born alive and then grow fast at all stages of life. Of course, we have a much heavier weight value on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. This index could be used heavily in the Midwest where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or simply sold to backgrounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

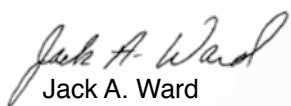

*ALL PERCENTILES GIVEN
BY HOFFMAN RANCH ARE RELATIVE
TO THE 2015-2016 BORN CALVES FOR
THE ENTIRE HEREFORD BREED.*

Over the past few years, the American Hereford Association (AHA) has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into Pan American Cattle Evaluation (PACE) to enhance the predictive power of EPD. Genomic Enhanced EPD (GE-EPD) allow commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information on Hereford Genetics. The current AHA test is a Low Density (LD) panel that was built off of a High Density (HD) panel and training was done utilizing high accuracy Hereford sires. Each animal that is tested has an updated set of EPD and corresponding accuracy. The AHA currently has over 25,000 animals genotyped. For some traits, the added accuracy will increase by a 100% and moving from .15 to over .30 which means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed (table below). The use of this information reduces your risk when buying, and helps to plan matings based off of all information available.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	EPD Acc. (BIF)	MBV and EPD correlation	Enhanced BIF Acc.	Effective Progeny added
CE	.12	.68	.32	33
BW	.12	.68	.32	7

Hoffman bred bulls perform at all levels

2013 National Western Stock Show Champion Carload

Preparing and showing a carload of bulls at the National Western Stock Show is no small feat.

It is a huge commitment physically and financially, but it has been a constant goal of our operation to raise bulls that can compete on a national level — 10 at a time. Out of all the banners and trophies we have won, these four carload champions make every ounce of work worth it.

Carload Bulls Sell as Lots 1, 2, 4, 5, 7, 9, 10, 13, 19, 20, 21, 39, 44, 49, 51, 59

4075 does everything we hoped for. Calves come easy at birth and get better every day. Sons are deep bodied, well balanced, good footed and rugged. Daughters are smooth, feminine, deep and easy fleshing. We feel that these females will be the future of our cow herd due to the maternal strength they possess.

BID LIVE ON:

Hereford

COMING 2-YEAR OLD BULLS

The coming 2-year old bulls are raised the way many people want them. They are raised just like many of our neighbor's commercial cattle. They get no extras!! They are developed in big pastures and get a lot of exercise to stay sound footed and hard. Don't be looking for big weaning and yearling weights. They simply are never pushed. However, their EPD's will rank with bulls that have been pushed. All older bulls have genomically enhanced EPD's to conform genetic potential. No frills, what you see is what you get.

For seven years we have used this bull for three breeding seasons annually. He always held up well, was super athletic and would get a lot of cows bred. His sons have been extremely sought after through the years. His daughters have exceptional udders and are very productive.

He has been our "go to" heifer bull. His calves come extremely easy and have a lot of vigor. They are extremely easy fleshing, sound and practical.

The Big Sky sons were our high averaging sire group in 2016. They went to many seed stock breeders throughout the U.S. and Canada. They are born easy and have true performance. The reports on the first daughters that are calving is very exciting.

Demand is now a DD carrier. We started to use Demand extensively due to calving ease, fleshing ability and high performance in a moderate package. His daughters are custom made for the Sandhills.

These are true beef bulls that have a lot of shape, substance and masculinity. The Prosperity females that we have seen in herds across the nation always stand out. He is a unique sire that can produce male and female progeny and offer longevity.

Demand is now a DD carrier. We started to use Demand extensively due to calving ease, fleshing ability and high performance in a moderate package. His daughters are custom made for the Sandhills.

Each animal tested is recognized with the AAA 50K EPD logo.

GE-EPDs powered by HD 50K for Angus — Impact on EPDs, accuracy values, associated progeny equivalents and interpretation of percent ranks.

Hammer is a breed leader for many traits and his progeny are extremely marketable. He himself sold for \$200K for just 1/3 interest! This bull has extra length and power.

HOFFMAN RANCH
Fall Female Sale
 September 25th, 2017

HOFFMAN RANCH

Customer Appreciation Female Sale

Thursday, February 16, 2017

Valentine Livestock Auction | Valentine, Nebraska

Females will sell at approximately 2 PM (CST) during
Valentine Livestock Auction's regularly scheduled sale.

*Check out Valentine
Livestock.net for updated
details on the offering*

Valentine Livestock Auction
126 N. Government
Valentine, NE 69201
(402) 376-3611

Selling

Large Groups of Commercial Females
out of Hoffman Ranch Bloodlines

All females offered have been hand selected by Hoffman Ranch bull customers. This is the cream of the crop from these outfits and we appreciate them working with us. We have made it a passion to help our clients market their Hoffman bred offspring.

Gerk Farms Iliff, Colorado

25-30 Black Baldy Replacement Heifers

Vaccination:

- OCV
- Complete vaccination information available.

This outfit will bring you the best of the best! Genetically, I cannot tell you of a better set of females. The cow base is stout, efficient, and just plain good. When Gerks decide to buy a Hereford Bull, they usually beat out seedstock breeders to own him. Last year, these females were a big hit and very popular. They have not been topped.

Randy Gerk — 970-520-1697

Allan Gerk — 970-520-1696

Bob & Shane Keller Ranch Valentine, Nebraska

20 Head Replacement Heifers -

15 black baldies, 5 red baldy

Vaccination:

- OCV
- Complete vaccination information available.

The Kellers have done exactly what we like to see. They have bought full and half brothers to start their F-1 program. They buy bulls off the top end. They do a lot of homework before the sale and it shows (they flat find them).

Most of our extensive embryo program is to provide commercial cowmen the opportunity to buy brothers in groups to add consistency and uniformity to their calf crop. This is a great opportunity to purchase females from a very well respected firm. They have not been topped.

Shane Keller — 402-376-5831

Ray & Matt Blackford Browlee, Nebraska

25 Head Replacement Heifers-

23 BWF/BBF & 2 red baldies

Vaccination:

- OCV
- Complete vaccination information available.

Ray Blackford keeps more records on his Black cows than most purebred breeders. The straight black mates to these females consistently bring top value relative to the market. This is a great set of heifers from an outstanding cowman that has built a reputation for excellence. They have not been topped, buy with complete confidence!

Blackfords — 308-748-2282

Monte Rainforth Valentine, Nebraska

35 Head of Bred Heifers due to calve March 23, 2017.

(24 Al'd to Meyers Keystone & 11 bull bred to a Conneally Thunder son)

It's truly a pleasure to work with Monte. His steers and heifers top every market they are involved with. He has bought one of the best group of bulls we have ever sold. His steers have been fed by Feller & Co, they hit every target possible and made money in a tough year. Some of the best genetics you will ever be offered. A true sale feature!

Monte Rainforth - 402-340-6734

STAND OUT WITH PROVEN GENETICS

THE **HEREFORD ADVANTAGE** PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 20% for \$CHB.

HOW TO GET STARTED:

Visit HEREFORDFEEDERCATTLE.COM to download the form.

Complete and submit form to American Hereford Association.

Information form with EPD rankings will be returned to the producer.

PERCENTILE	\$CHB
Top Value	50
Top 1%	36
Top 5%	32
Top 10%	30
Top 15%	29
Top 20%	28
Top 25%	27
Top 30%	26

Certified Hereford Beef Index (\$CHB) is a terminal sire index that is built on a production system where Hereford bulls are used on British-cross cows with a focus on gain and end product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a \$CHB value ranking in the top 20%.

CIRCLE A RANCH HETEROSIS PROJECT

Using Hereford bulls on Angus-based cows will give producers advantages in profitability, cash flow, herd size, and retained female fertility and longevity according to a recently completed study at Circle A Angus Ranch. In fact, when the data was further analyzed for economic emphasis, the results showed an advantage of \$514 net per cow over a period of 10 years. That's a \$51 difference per cow per year.

Economic models also predicted that if replacement females are retained over a period of 10 years, Hereford-sired females will generate a 20% advantage in herd size for the same relative cost versus the straight Angus commercial cows because of increased fertility and longevity.

The study, conducted by Circle A Ranch headquartered in Iberia, Mo., in cooperation with the American Hereford Association (AHA), was started in 2007. Mark Akin, Circle A Ranch manager, says, "The female side was what really peaked my interest, because we've bred purebred Angus for all these years, and I was curious if the heterosis from the cross would make available a better conception rate for us, and it did."

To start the project Circle A Ranch AI-bred 600 commercial Angus cows to 10 Hereford bulls with the goal of comparing the best of its Angus herd to the best of the Hereford-Angus cross. The control group included progeny from three proven Angus sires. The average expected progeny differences (EPDs) of the Angus sires would place them in the top 30% of the Angus breed for birth weight and top 20% of the breed for weaning weight. All of the cows and resulting calves were commingled and managed the same.

HARRIS RANCH HETEROSIS PROJECT

Calves sired by Hereford bulls have a \$30 per head documented advantage in feedlot profitability and 7% advantage in fertility when compared to Angus-sired calves, according to a recent research study.

This advantage was documented during a three-year, real-world commercial heterosis project comparing progeny by Hereford and Angus bulls when crossed on Angus-based cows. The study also documented a maternal advantage of 7% higher pregnancy rate when comparing the Hereford-sired females to Angus-sired females.

The American Hereford Association (AHA) recently released the final results of a heterosis study conducted in cooperation with California State University, Chico; Lacey Livestock; Harris Feeding Co.; and Harris Ranch Beef Co. The objective of the research project was to conduct a controlled crossbreeding system, comparing progeny sired by Hereford and Angus bulls, under commercial conditions, emphasizing economic differences at the ranch, feedlot and packing plant.

"The most notable and dramatic difference was the lower feed conversion for the Hereford-sired calves over all three years," explains Dave Daley, California State University, Chico associate dean and farm administrator. "This fact, coupled with the other feedlot traits, resulted in a significantly lower total cost of gain and breakevens for the Hereford-sired cattle."

To start the project in 2005, Lacey Livestock identified 400 Angus-based cows that were mated randomly to 10 Hereford bulls or 10 Angus bulls. In years two and three the project was expanded to include 600 cows and 15 bulls of each breed. All calves were identified with electronic identification (EID) tags and DNA samples were taken to determine parentage. All cattle had equal access to comparable feed resources and management in relatively harsh environments. The differences in weaning performance, feedlot performance, carcass value and overall profitability were measured on the Angus- and Hereford-sired calves.

Because of the length of the project, researchers were only able to collect limited data on reproductive performance. Daley, who led the research project, says this is an area where producers can anticipate the most dramatic response to crossbreeding. "For the majority of cow-calf producers the effect of maternal heterosis is critical to overall profitability," he adds.

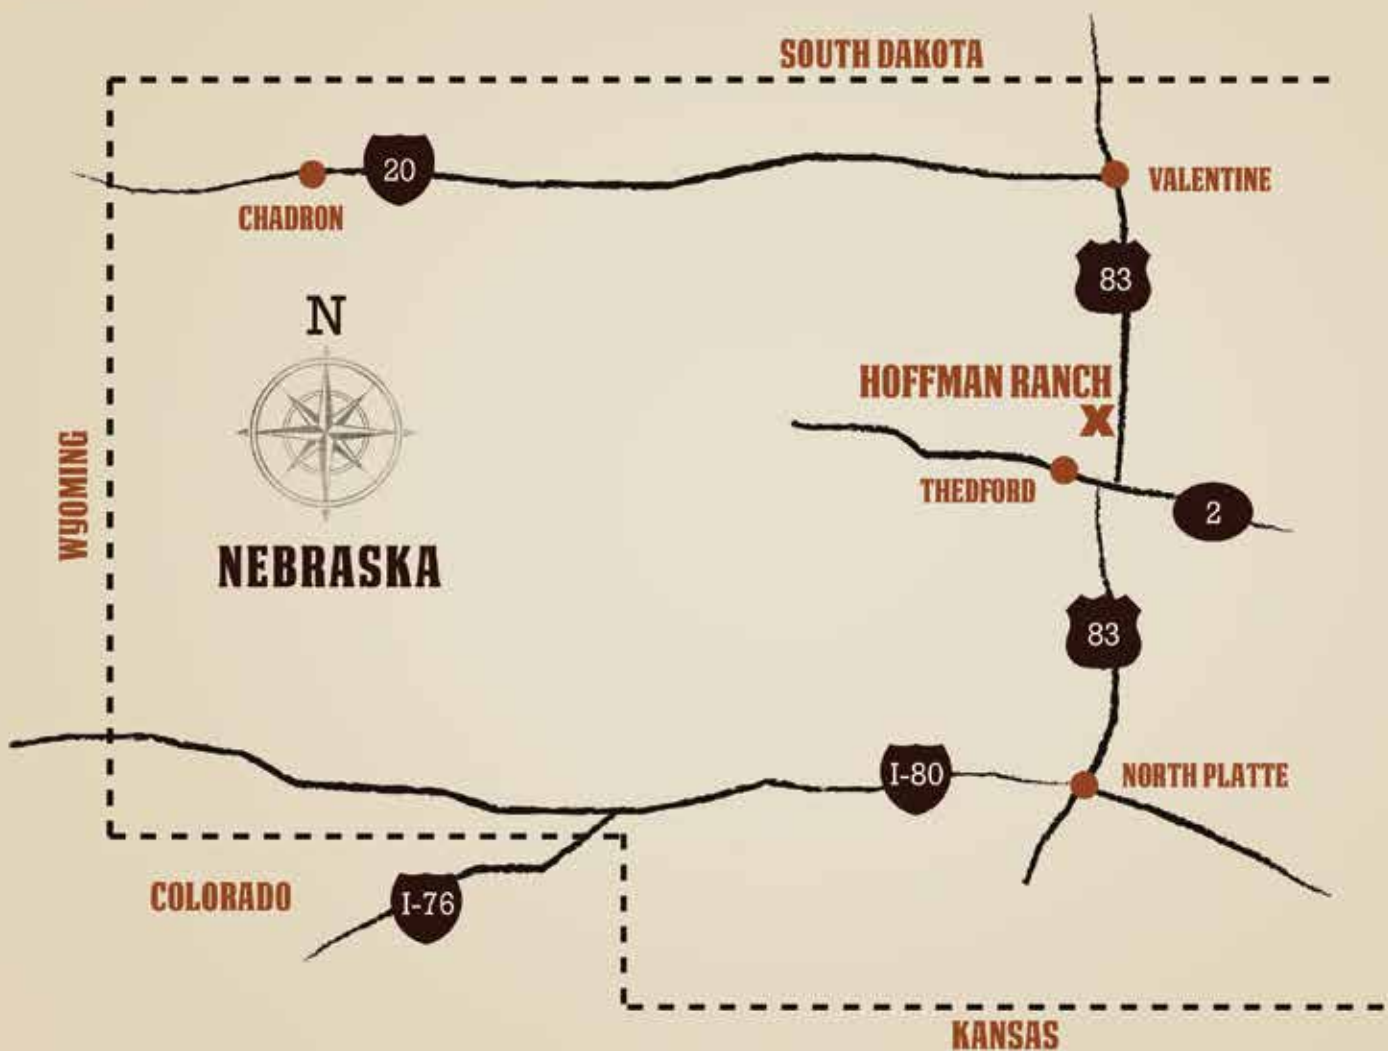

Pregnancy rates on yearling heifers that had been identified back to Hereford or Angus sires were collected in year two and three of the study. In both instances, there was a 7% advantage in pregnancy to the Hereford-sired cattle (93% vs. 86%) in a relatively short breeding season where heifers were bred with artificial insemination.

"The baldie females are the biggest pay off for us participating in the project," says Mark Lacey of Lacey Livestock. "It is allowed us to get some heterosis back in our cow herd. In the cattle business, fertility and longevity are what makes us money.

"We want to continue to produce more baldie females," Mark adds. "As range cows go, I think the Hereford female is a superior range cow and makes a great mother."

As a result of the project, Mark says his family is continuing to use the Hereford bulls that remain in their bull battery. They also artificially inseminated their black replacement heifers, nearly 250, to two calving-ease Hereford bulls.

"The Harris project includes a real-world economic analysis that favors crossbreeding for the commercial cow calf producer in our current market structure," Daley summarizes. "The economic data suggest crossbreeding has the potential to significantly boost return in a vertically coordinated marketing system."

Hoffman Ranch

39327 W. Antelope Valley Rd.
Theadford, Nebraska 69166

The Hoffman Ranch sale facility is located 5.5 miles north of Theadford on HWY 83 towards Valentine, Nebraska. The entrance is on the west side of the highway.

Drive Times:

North Platte, NE – 1 Hour
Lincoln, NE – 5.5 Hours
Denver, CO – 5 Hours
Rapid City, SD – 4.5 Hours

Lodging:

Roadside Inn: Theadford, NE (308) 645-2284
