Still Picture and Video Preparation

- Make sure your horse is clean, groomed, clipped and coat shows well.
- Film in clean tack that fits your horse and his/her specialty.
- Use a background that is clean of trash, equipment and other distracting elements.
- Surroundings must be appealing and suitable for national television.
- Do not allow other animals in the picture. It's all about your horse!
- Still pictures must be suitable for publication, please send in 300 DPI.
- WE WILL NOT PULL STILLS FROM VIDEO.

Required elements

- Show horse without a saddle horse led in a pattern to view all sides. Lead horse towards and away from camera to show front and rear views: these shots will help to show confirmation of the horse.
- Video horse with rider at a walk, trot and lope in both directions-include stops, basic turns and neck reining.
- Show the "specialty" of the horse (roping, barrels, reining, cutting, etc). If you have a horse that is good on the trail, include footage. Does your horse work cattle? Show it!

Extra footage you may want to include

- Pick up horses feet.
- Working in a round pen.
- Trailer loading and unloading.
- Opening and closing gates.
- Does your horse work well with children? Show it!

Required technical elements

- Shoot in standard definition (not widescreen).
- Standard definition is a 4:3 ratio.
- **You must use a level tripod.** This is very important!
- Adjust tripod height to the middle of your horse's side.
- Move the camera from left to right with your horse.
- Having good light is VERY important for good video.
- Do not shoot into the sun.
- Frame up your horse and zoom in until your horse fills the screen without cutting off the head, feet or tail!
