SCHACHER AUCTION SERVICES

Robert Schacher 817-219-0102
PO Box 33804, Fort Worth, Texas 76162
rob@schacherauction.com • www.schacherauction.com

Welcome Friends and Cattle Producers,

It is once again an honor for me to welcome you on behalf of the Texas Wagyu Association and all of the consignors to our Eighth Annual Sale.

Over the last eight years the quality and quantity of this sale has improved exponentially, and I am certainly proud of the offering that we are presenting this year. This will be by far our largest offering and it is diverse enough that anybody that is involved with breeding Wagyu Cattle will find something that suits their taste. Every year we have enjoyed the growing interest in this quality breed of cattle, and we are excited about the growth in the industry.

Be sure to get here early and join us for all of Friday's events including Wagyu Burgers for lunch and Wagyu Fajitas for our Evening social. Also, there will be several educational programs.

I hope that you are all enjoying the hospitality and beauty of the Texas Hill Country town of Salado. The Texas Wagyu Association is fortunate to be able to host our annual sale at the Tenroc Ranch Sale Facility for the seventh time. Thank you to Mike Cornet and his staff for providing such a wonderful venue and accommodating us over the years. We look forward to returning each year. I would be remiss if I did not thank Bubba and Donna Kay for all of their hard work and dedication to this sale, as its success and longevity would not be possible without them. Bubba is passing the torch of sale chairman following this year's sale to Josh Eilers. Be sure to thank Bubba for all he has done over the years. Bubba will still be involved as a consignor (And I'm sure I will be calling on him for help for years to come!!).

If we have not met be sure to look me up at the sale as I always enjoy meeting fellow cattle breeders and enthusiasts. If you have any questions prior to the sale, please do not hesitate to contact me.

Sincerely,

Robert Schacher
Robert Schacher

**The Texas Wagyu Association is proud to host speakers at the
Texas Wagyu Association General Meeting Friday, April 21, following a Wagyu Burger
Lunch at 12:00 NOON. Speakers at 1:00 PM. Meeting at 3:00 PM.**

Presentations include: ultrasound demonstration by Lynn Allen; Long-Term Study of Fatty Acid Composition of Wagyu by Dr. Stephen B. Smith.

Please join us for our Friday Night Cowboy Social 5:00 PM

Wagyu Fajita Dinner and Fun Auction. Chisolm Cattle Company is sponsoring a wine tasting in conjunction with the social.

Tenroc Ranch is located at 5471 Thomas Arnold Road, Salado, Texas.

From the North: (Dallas-Fort Worth) take exit 284 off of I-35 and go south on service road to Thomas Arnold Road, go two mile West on Thomas Arnold Rd to Tenroc Ranch on your left.

From the South: (Austin) take exit 283 off of I-35 and go to the service road on the West side of the interstate. Take the service road north to Thomas Arnold Road and go west two miles to Tenroc Ranch on your left.

ANNOUNCEMENTS:

All announcements from the auction block will take precedence over any printed material

LIABILITY:

All persons attending the sale and related functions do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The owners and hosts assume no liability for loss or damages however so caused.

HAULING:

Clay Emmons, Fairfield 254-716-5735

TERMS:

The terms of the sale are cash or bankable check unless arrangements are made prior to the sale. Satisfactory settlement must be made with the clerk of the sale immediately after the close of the sale. Only when the above conditions are met will the buyer be able to load cattle. In no case will animals be released unless settlement is made with the clerk of the sale.

All transactions that include Semen, embryos and flushes are between the buyer and seller. All shipping costs are the buyer's responsibility and at the buyer's expense. Schacher Auction Services will hold proceeds to the sellers of these lots in Escrow until the buyer has taken delivery. Unless otherwise stated there are no guarantees of conception of embryos. Neither Schacher Auction Services nor Members of the Texas Wagyu Association Board of directors (with the exception of board members that are also consignors) will be responsible for storing or delivering embryos or semen.

ERRORS:

The material in this catalog has been carefully edited. If errors or omissions are discovered, they will be announced. Such announcements take precedence over the printed matter in this catalog. Neither the editors of the catalog, the Texas Wagyu Association, the sale management, nor the consignors can assume any responsibility for errors or omissions in the catalog.

RESPONSIBILITY:

The consignor will represent and be responsible for his animals. In no case, however, will the consignor be responsible for any damages beyond the selling price of the animals. The Texas Wagyu Association and the sale manager assumes no responsibility, no warranties and no guarantees on the cattle presented in this sale. All transactions are between the buyer and seller.

INTERNET BIDDING:

This auction will be broadcast live at www.superiorclicktobid.com. Anybody wishing to bid online must sign-up prior to the auction.

Sale broadcast live on www.superiorclicktobid.com

Safe to Bar R Shigesheetani 30T

9821 is angular yet possesses extra body depth and shape of rib. Her udder Quality is also outstanding, with refined teats and great forward and rear attachments. Her sire, World K's Kitaguni JR is considered one of the top Tajima carcass quality bulls in the business. 9821 is safe in calf to Bar R Shigesheetani 30T. In the most recent WSA National Sire Summary, 30T proved to be #1 for Ribeye Area and Carcass Weight, #2 for Back Fat and #8 for Marbling. His progeny show excellent carcass traits as well as extra growth and performance.

The bull calf at the side of 9821 is sired by Bar R Itomoritaka 42Z who's sire, Ito-Moritaka J2703, has the highest Milk EBV in the Australian Breed Plan. 42Z's dam is very high in marbling genetics and one of the best cows at Bar R Cattle Co.

Free of all known genetic disorders

Sells Open

Ms. Rueshaw is a rare combination of 1976 and 1994 genetics. She is an ET daughter of Rueshaw, one of the first red bulls that came to the United States in the 70's. Akiko, one of the original females imported from Japan in 1994 is her granddam. To our knowledge Ms. Rueshaw is the first Rueshaw daughter to be sold in a consignment auction. She is registered with the American Wagyu Association (FB14721) as well as the American Akashi Association (EAF101656). This four year old has been flushed three times in her life averaging ten viable embryos per flush. Ms Rueshaw has an inbreeding Coefficient of 0%. Ms. Rueshaw's last flush was February 24, 2017 to SOR Hastings 1066 FB 23378. We are including four Grade One embryos from this flush as a part of this package. They are eligible for registration with both associations. Akiko, the dam of Big Al and Heartbrand Red Star, appears on both top and bottom of the pedigree of these embryos. This most unique and rare mating should produce powerful fast growing offspring with high marbling ability. The calves produced from these embryos will have an inbreeding coefficient of 9% Do not miss this opportunity. No need to search for hard to find, expensive Rueshaw semen. You will have the Rueshaw factory already in production. Sells Open and Ready to Flush.

Pasture Exposed to SR Hirashige 101 as of March 6

LAR MS MICHI (FB20264) boasts of incredibly popular and sought-after genetics. The progeny of her sire, World's K Kitaguni Jr., typically score over 9 on the Australian scale which is three grades higher than the highest USDA scale. Add to that her genetics coming from Bar R Sanjiro 4P and Michifuku, both of which are well known for their marbling and both of which scored among the highest in the Washington State University Wagyu report in 2006, and you have an incredible mix of production, marbling, size, and milking. She comes with a registered bull calf on her side sired by SR Hirashige 101, son of the incredibly popular Westholme Hirashigetayasu z278, and she has been pasture exposed since March 6th to SR Hirashige 101 again. Bred status will be confirmed prior to the sale. SNR Ranch is a sister company of FAC Farms and provides the sort of genetics that FAC Farms has been known for. Breeding power, strength, marbling, predictable results—that is what you will get with this incredible lot!

Pasture Exposed to SR Hirashige 101

LA MS TAKASHIGO (FB8110) is one of the finest animals offered in the market. With Fukutsuru 068 and Hirashigeteyasu J2351 in her lineage, this proven animal offers incredible genetics, breeding, and carcass quality for progeny. Arguably one of the most well-known sires in the history of Wagyu genetics, JVP Fukutsuru 068 led in the 2006 U.S. Wagyu Sire Summary (published by Washington State University) and continues to dominate the Wagyu industry. On top of that, a daughter of Hirashigeteyasu J2351 was the top selling bred female at the Tenroc auction in 2013. Plus, this is a two for one! LA MS TAKASHIGO was pasture exposed and bred to SR Hirashige 101. Make this animal part of your herd today!

Sells Exposed to FB22018 Fullblood Red Bull.

Leading the Bred Heifer Division is this Royally Bred Female who is sure to become a Donor Cow. 004C was named the Reserve Grand Champion overall Red Heifer at the North American International in Louisville, KY in 2016 and was Grand Champion Red Heifer overall at the National Western in Denver, CO in 2017. Her success in the show ring comes naturally as her dam, L7 504A, was named the Grand Champion overall Cow at the North American in 2016 and the Grand Champion Pair at Houston this year. 504A has produced over 18 #1 embryos in each of four flushes. 004 C goes back to the 6124 cow of Bruce Hemmingson's which was one of a kind. Bruce bought her from Japan, and she died from lightning strike last year. There is very limited genetics available from this line. Selling one-half interest in this female where the new owner will receive one-half of all natural calves born and one-half of all ET Calves and embryos produced. Possession will be negotiated with Lucky 7 Ranch following her show career. Sells Exposed to FB22018 Fullblood Red Bull.

The sire of this heifer, TF Itomichi 1-2 from the Takeda Farms program, has been used extensively in the US since his importation from Japan in 1995. His genetics increase mature size, growth rate and milk while maintaining marbling ability. He produces excellent females. The dam is from the famed Lone Mountain Ranch breeding program, and is of Haruki 2 breeding. She ranked in Breedplan's top 15% for both IMF and Fullblood Feedlot Index. This ET heifer has excellent growth, and on ultrasound scan, a large ribeye area, 1.33 square inches of ribeye per 100 lbs of body weight, and good marbling indicator. She is super gentle and easy to handle. Bred AI on 2-2-17 to Sanjirou FBB2501, PE 2-5-17 until 3-3-17 to KR Kituseki 202 FBB22879

TR Ms Shigekoko 6297 is sired by TR Shigefuji 312 (FB 16068), a son of Shigeshigetani (FB 2907) and daughter of our TR Ms Fuji Dai Terutani (FB 11445), a Itoshigefuji TF147 (FB 3681) daughter. On the dams side of the pedigree you find LMR Hiroshi 766T (FB7794) and JVP Yasutaniyoshi408 (FB3082) as sires of the dam. Itomichi and HR Koko 007 (FB10943) are present on the maternal side of the dam of this heifer, complimenting the growth and marbling potentials of this heifer. This heifer has shown explosive early growth as did her dam (TR Ms Yakikoko 7 (FB15367)). This heifer is an outstanding choice. This heifer is free of known recessive free genetics by pedigree.

Sells Open

TR Ms Mt Fuji 641 (FB23373) is sired by MT. FUJI (FB 104), one of the first Full Blood Black Wagyu bulls imported to the United States in the early seventies. This is rare mating, using Mt Fuji over our dam TR Ms ItomichifuJo 110 (FB 12651). This heifer has more than fifty percent Mt. Fuji genetics. The dam is a granddaughter of sires TF Itomichi 1/2 (FB2126) and Mt. Fuji (FB 104), with World K's Michifuku (FB 1615) in both the top and bottom side of that mating. This heifer should be mated to a bull free of the recessive genetic CHS, as she is a carrier of CHS recessive genetic disorder.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy your livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's newest way to buy livestock! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember, you can call in to bid over the phone when watching on the internet if you have registered for that service, but you must be a member of www.superiorclicktobid.com to "click-to-bid" and bid online. Your computer must have Flash Media Player installed to view the auction.

Bidders who are successful in making purchases will be contacted by Superior Productions after the sale to settle payment and discover your shipping plans.

This donor is a long, thick "Kobe Mizutani" daughter! "Kobe Mizutani" is a direct daughter of "Kenhanafuji" and "Heatherkura," a full sister to "Shigeshigetani" sired by "Haruki II" and out of "queen of the breed" "Suzutani!" Many experienced breeders feel that Takazakara is a "flow bull" who accentuates the range of traits the dam contributes. The donor is sired by the great Takazakara, son of highly fabled Japanese bull Takaei who is known to accentuate the dam's contributed traits in crosses. Crossing Shigefuku on this spectacular Tak daughter will combine the best in Kedaka with the best in Shimane and the best in Tajima. All in one pedigree. ZERO RISK here!

This is an own son of Kenhanafuji and out of a Michifuku cow whom's dam was a full sister to Toshiba and Kage. This is powerful proven and rare genetics combined in one package. free of genetic defects. Kenhanafuji has been a bull that is proven female producer whom have milk, growth and marbling which is a rare combination in the wagyu breed. This is why his semen is in such high demand. On dams side Michifuku and grandam full sibs to Toshiba and Kage, marbling will be in abundance.

SIRE: Free of all known genetic disorders
DAM: Free of all known genetic disorders

Wagyu100 is producing foundation stock from the top bulls of all time and with this mating we are not holding back. The sire Kenhanafuji was one of the most promising young bulls Japan had ever produced when he was purchased by U.S. investors in the early 90's and exported to America. Upon arriving in America a Japanese investor purchased Kenhanafuji for a reported \$150,000 and took him back to Japan. With a limited supply of semen available offspring of Kenhanafuji has been very limited. Semen on Kenhanafuji has sold recently for over \$5,000 per straw. The dam of this bull is Nanashi. She is a daughter of the great Itozuru Doi 151. Itozuru Doi 151 semen is limited to only a handful of known straws left in existence. The last recorded sale of Itozuru Doi 151 semen sold for \$9,000 per straw. Itozuru Doi 151 beat Michifuku in every statistical category of comparison in fullblood wagyu carcasses. By the time his progeny were tested and his value was discovered, Itozuru Doi TF151 was deceased, leaving a very limited supply of semen. The sire of the dam to Nanashi is the great Sanjirou SCD AA-7. Wagyu100 is one of the first to offer this mating. This heifer will be held until 4 months of age at Wagyu100 at no charge. Sale is for calf only.

73 WAGYU100 MS BEJIROU 001-

DAM: B3FU, CHS50%, CL16FU, F11FU

Wagyu100 is bringing back the foundation bulls with this mating. Bejiro is a bull that has virtually no semen available and what is available sells for over \$2,500 a straw. This bull is a son of Okutani one of the original females imported with Suzutani, he is sired by Haruki 2 who is starting to become one of the top trait leaders in the breed. He is full brother to Genjirou and full brother to Fujiko the first wagyu born in the United States. On the dam side we have CHR MS Mitsuhiokura 521 a daughter to Mitsuhiokura 149. Mitsuhiokura 149 is known for growth and milk and as the thickest bull in wagyu. On the bottom of CHR MS Mitsuhiokura 521 pedigree you find Suzutaka 2 a dam sired by another great foundation bull Takazakura. Takazakura is sired by Takei who is a son of the legendary Japanese sire Yasufuku J930. The dam of Suzutaka is Suzutani. Suzutani is without question the most influential dam in the wagyu breed. Suzutani was the dam of Sanjirou, and Shigishigiani. This heifer calf will stay at Wagyu100 until 4 months of age at no cost. Sale is for calf only.

This breeding is a size and marbling package. The sire Itoshigefuji 147 was the largest Wagyu bull imported into the USA at roughly 2,640 lbs. His original bloodlines trace back over 300 years. Wagyu100 uses Itoshigefuji 147 heavily in our breeding program. With his great size he also has a SCD score of AA-7. The dam in this breeding 67G Hiratani SCD Score AA-6 is a daughter of Bar R 37R. He is the son of Hirashigetayasu, SCD AA-4 Hirashigetayasu Doi is one of only two Kedaka blood bred bulls outside of Japan. 67G Hiratani also brings Shigishigitani to the breeding. Shigeshigetani is a half-brother to the top sire, Sanjiro. Shigeshigetani is sired by Haruki 11 and the greatest sire producing female in the Wagyu breeding industry, Suzutani. This heifer will be held at Wagyu100 until 4 months of age at no charge. Sale is for calf only.

If you're going to build a herd why not start with top foundation genetics. The sire in this mating Shigefuku 005 is a bull bred from within the main Kedaka lines. He exhibits higher growth rates, body volume and desirable coat type. Shigefuku 005 weighed in at 1,735 lbs. at 23 months of age. There are no known reports of his full mature weight since he never left Japan but realistic estimates are 2,400 lbs. Shigefuku 005 was a bull that never left Japan, just his semen. Therefore the supply of semen is almost nonexistent selling for \$2,500 plus per straw. The dam on this breeding Fukukane 1G is Wagyu100's top donor. She has great size and a SCD Score of VA-9. In her pedigree you find the foundation sire of World K's Michifuku, TF Kikuhana, and World K's Takazakura. Fukukane 1G averages 21 embryo's per flush. A great heifer to build a foundation on. This heifer will be held at Wagyu100 until 4 months of age at no charge. Sale is for calf only.

This heifer is an SCD AA package. The sire Hirashigetayasu is one of only two Kedaka blood bred bulls outside of Japan, this makes him one of the best out cross sires in the Wagyu breeding business. Hirashigetayasu provides the breeder with all that he can want, being one of the few bulls in the industry who do so. Hirashigetayasu has an SCD Score of AA-4. The dam of this mating KR MS Chiharu has an SCD score of AA-9. She has Sanjiro SCD AA-7 twice in her pedigree. When it comes to blood, it is no surprise that Sanjiro is as good as he is as a sire, as he comes from the best sire in Michifuku and the best dam in Suzutani. If you are trying to build your herd around SCD AA Genetics this heifer will not disappoint. This heifer will be held at Wagyu100 until 4 months of age at no charge. Sale is for calf only.

Kenhanafuji was one of the most promising young bulls Japan had ever produced when he was snatched away by U.S. investors in the early 90's and exported to America. Upon arriving in America a Japanese investor purchased Kenhanafuji for a reported \$150,000 and took him back to Japan. With a limited supply of semen available offspring of Kenhanafuji has been very limited. Semen on Kenhanafuji has sold recently for over \$5,000 per straw. The dam of this bull is Nanashi. She is a daughter of the great Itozuru Doi 151. Itozuru Doi 151 semen is limited to only a handful of known straws left in existence. The last recorded sale of Itozuru Doi 151 semen sold for \$9,000 per straw. Itozuru Doi 151 beat Michifuku in every statistical category of comparison in fullblood Wagyu carcasses. By the time his progeny were tested and his value was discovered Itozuru Doi TF151 was deceased, leaving a very limited supply of semen. The sire of the dam to Nanashi is the great Sanjiro SCD AA-7. Wagyu100 is one of the first to offer this mating. Wagyu100 reserves 10% interest in semen from this bull for use limited to our breeding program. Bull will be held until 4 months of age at Wagyu100 at no charge. Sale is for calf only.

Free of all known genetic disorders

A 4-year-old Black Brangus proven recipient cow that has had two calves, the last of which was a Wagyu embryo calf raised successfully. Embryo pregnancy due 9/25/2017 confirmed pregnant by Dr. Aaron Wilfert, DMV. The embryo is sired by Itomichi 1/2 (FB2126), a sire known for increasing size, early growth and maternal characteristics without compromising marbling. The embryo donor cow, TAK Ms Yasufuku Y002 (FB20752), is sired by World K's Yasufuku Jr (FB5061). Yasufuku Jr's sire is none other than Yasufuku J930. In a 2001 sire evaluation report, J930 is listed as the sire of the three highest marbling bulls in Japan: (1) Yasufuku 165-9, (2) Irukusakae; and (3) Yasuhira. Yasufuku Jr inherited his father's trait of being a producer of high marbling sire progeny. His most famous son is BAR R Yasufuku 42K (FB5072) who has held the spot of the #2 marbling sire since 2006 in the National Wagyu Sire Summary. 42K also places high in the categories of ribeye area, external fat and hot carcass weight. In fact the semen of 42K was one of the most expensive and sought after until it was discovered in 2011 that Yasufuku Jr, who had previously been considered free of all recessive gene disorders, was retested and confirmed to be a carrier of CL16. His son 42K is also a confirmed carrier. Importantly, TAK Ms Yasufuku Y002 has been tested free of CL 16 (as well as the other known genetic disorders) and is therefore a clean pathway to carrying on Yasufuku Jr's superior marbling and ribeye genetics. In 2012, at the very young age of 10 months, Y002 was ultrasound tested. She produced a 6.52 IMF score with an 8.94 ribeye area reading, which scores are particularly impressive given the fact that the ultrasound was a full three months short of the 400 day age at which Wagyu are typically scanned. The dam's direct sire lineage chart is a who's who in the Wagyu world starting with Yasufuku Jr over Itozuru Doi 151 over World K's Sanjiro over World K's Kitaguni Jr over Kikuhana. This potent, high value pairing should result in a calf with outstanding marbling and other carcass traits. The inbreeding coefficient of this pairing is 1%. Embryo sire and dam are both tested free of the known genetic disorders.

If you are looking for a fantastic red bull, look no further. Possibly the most exciting Red Wagyu Bull to be offered for sale in many years, a Big Al Son to a Hikari sired mother with Judo and JVP Homare in the background. Can you say mass and marbling? This red bull has it all. SOR Big Al is a double Dia10 line bred bull with some of the best 1994 genetics tied back to a high marbling 1976 bull merged together. Huge potential here. Ultrasound data taken at 17 mos. Thank you to Bill Fischer, Legendary Akuaski Cattle, for producing this fine breeding piece.

C Free's Michifuku CFF1 02-CFF414 exactly what breeders are looking for to increase marbling in their cattle herd. CFF414 scored an 8 on tenderness, "AA" in SCD, and tested free of all genetic defects. He should add high marbling and tenderness to his offspring. Sired by C Free's TopShelf FBB13433 ultrasound scan showed Ribeye Area of 12.3, IMF: 03.61, making him a large frame, heavy muscle bull. C Free's TopShelf FBB13433 has produced other exceptional offspring; good milking abilities, heavy muscle balanced calves with high tenderness and "AA"SCD scores. CFF414 Maternal side has power house Yasufuku known for thick shoulders, large loin size, and high yield rate. Itomichi FBB2126 and Hirashigetayasu FBB670 known for balance, strong growth, with enhanced marbling characteristics. CFF414 Dam Yasumichi FBB10021 is a medium frame cow with outstanding marbling markers, a tenderness of 7, "AA" SCD, and IMF 4.40 on ultrasound scan. Another reason to consider this bull such a powerful combination by carrying so many worthy traits. C Free Farms is retaining a semen interest.

Lots 117, 118A and 118B are full sibs that are extremely powerfully pedigreed, bred to deliver outstanding growth, marbling and maternal traits. They are 11/16 black and 5/16 red who embodies many of the best Wagyu bloodlines available outside of Japan. SCD is VA and Tenderness 5. Their sire, Popeye is a 50/50 red/black cross out of the most notable names in the Wagyu breed. On Popeye's bottom side is Shigesigetani over Bar R 48R, a Sanjiro daughter and Fukutusuru 068 granddaughter. This breeding is growthy for its high Tajima concentration and has superior marbling. Popeye's pedigree is line bred with the most potent Tajima genetics directly out of Japan including Yasumi Doi, Yasutani Doi, Shigesigenami, Monjiro and Suzutani. On Popeye's top side is the tremendous red bull, WSI Umermaru. He traces back twice to Dai 10 Mitsumaru through the sire of Popeye's grandparents, Hikari and Kadamaru. Dai 10 Mitsumaru was considered the "greatest bull in the world by Japan at the time AI and Marie Woods sent world class cattlemen Yukio Kurosawatsu and Bruce Hemmingsen to procure a shipment of Japanese Browns to America in 1993". Popeye is owned by V bar V, and is currently being used extensively for FI production with over 1500 breeding's to date. On These bull's bottom side is L4 001 a dam that traces back twice to Kikuyasu 400 plus Itomichi 0602 (a son of Itomichi) Fukutusuru 068, NP Yasutanisakura and gets her 1/8 red influence from NP Kunisakae 124, also a daughter of Dai 10 Mitsumaru. L4 001 is a proven donor with outstanding maternal traits, size and confirmation. Her 16/16 analysis shows that she is approximately 51.5 Tajima, 3.5 Kedaka, 3.5 Tottori, 13.3 Itozakura, 10.2 Shimane, 2.0 Okayama, 3.5 Hiroshima and 12.5 Kumamoto. L4 032's 16/16 analysis shows that he is approximately 48 Tajima, 3.5 Kedaka, 2.0 Tottori, 7 Itozakura, 5 Shimane, 1 Okayama, 2.0 Hiroshima and 31.5 Kumamoto. These bulls are a blend of tremendous bloodlines for marbling and growth and will be excellent for full blood breeders or percentage Wagyu breeders looking for growth while significantly improving meat quality.

L4 Star Sanji C14 (FB 22177) is a 50/50 red/black full blood wagyu bull out of VBV Red Galaxy and L4 San Kushige A8. He is approaching 2 years old, fee of all known RGDs, seD is AA and Tenderness 4. Star Sanji's sire, VBV Red Galaxy is stacked with foundation red genetics that trace back twice to Dai 10 Mitsumaru on sire's side through Hikari. Dai 10 Mitsumaru was considered the "greatest bull in the world by Japan at the time AI and Marie Woods sent world class cattlemen Vukio Kurosawatsu and Bruce Hemmingsen to procure a shipment of Japanese Browns to America in 1993". He also traces back twice to Shigemaru and has Judo in his pedigree, one of the original Wagyu imports in 1974. Phenotypically, he is one of the most impressive sires in the breed." Star Sanji's dam, L4 San Kushige is an outstanding high Tajami breeding between Sanji V13 and a Kikuyasu 400 daughter. Her grandsires are Sanjiro and Kiteruyasu doi 003, (an original import who is renowned for his high marbling and fine fat texture). Sanjiro is a combination of Mitchifuku and Suzutani, a star studded pedigree with exceptional marbling and growth. Kikuyasu 400 is 100% Tajima and one of the largest Wagyu bulls to leave Japan. He is known for excellent carcass quality and Ribeye. This combination joins the strong marbling and growth of the Kumamoto red line and the outstanding marbling of the largest Tajima pedigrees. These are proven genetics that will perform for all breeding requirements.

This is an opportunity to flush a Red/Black Wagyu with 1/16th Red Wagyu genetics, sired by Shigesigetani, a trait leader for marbling and marbling consistency, over a Red/Black Wagyu cow sired by SR Y13 Sanji, who is in turn sired by Sanjiro and out of a Red/Black Wagyu cow with Kikuyasu-400, Hikari and Judo in its pedigree. This is a high marbling pedigree and this young cow has proven herself by successfully raising a calf born last fall and then producing 27 freezable embryos from her first flush in early January 2017. SCD is VA. Tested free of the known genetic disorders. Terms of flush: Buyer to receive the opportunity to perform one (1) flush at Agrimark Genetic Services in Kingsbury, Texas, using the semen of buyer's choice, which semen is to be provided by buyer. Buyer will receive all of the embryos produced from the flush. If less than eight (8) good embryos are produced seller will refund a pro rata portion of the purchase price to buyer. Flush must be performed between 5/10/2016 and 6/30/2016 and seller will ensure that no flush is performed within 45 days prior to buyer's flush.

Consignor: **ROCKING 711 RANCH, INC.**

SIRE: WORLD'S K MICHIFUKU FB1615

DAM: CHR MS KITIGUNI 121M FB5342

Free of all known genetic disorders

This pairing is 100% Black Wagyu genetics. The sire, Michifuku is widely regarded as one of the best carcass bulls to ever leave Japan, and was formerly the #1 marbling bull in the U.S. and consistently ranked #2 for ribeye area, and his progeny's carcass characteristics are outstanding. The donor dam, CHR Ms Kitiguni 121M is sired by Takazakura, the previous #4 marbling bull in the U.S., and known for producing larger framed, heavier muscled calves with great length of body. The donor cow's dam is sired by Kitaguni Jr., out of a dam sired by Kikuyasu-400, the largest Tajima bull to leave Japan. This pairing should result in calves with good growth and outstanding marbling and other carcass traits. The inbreeding coefficient of this pairing is 2%. Both sire and dam are free of the known genetic disorders. For SCD/Tenderness, sire is AA/5 and dam is VA/10. Embryos are grade 1 and are located at Agrimark Genetic Services in Kingsbury, Texas, where the conventional flush was performed. Buyer responsible for shipping if embryos are to be shipped.

SIRE: ITOSHIGENAMI FB3682

DAM: TAK MS SHIGESHIGETANI S001 FB20751

Sire is F11C, Dam is free of all known genetic disorders

This pairing is a 100% Black Wagyu genetics. The sire, Itoshigenami TF148, although relatively unknown in the U.S., is considered to be one of the top 3 bulls to have been exported from Japan according to David Blackmore, and has outstanding Australian EBVs. Itoshigenami is a medium-framed bull with excellent conformation, being 75% Tajima and 25% Fujijyoshi, and is arguably one of the best bulls for marbling and carcass traits. The donor dam, TAK Shigeshigetani S001 is sired by Shigeshigetani, known for highly consistent transmission to calves of excellent marbling together with excellent growth, and out of a dam sired by the highly sought after Itozuru Doi TF151 over a Sanjirou-sired dam. This potent, high value pairing should result in calves with outstanding marbling and other carcass traits. The inbreeding coefficient of this pairing is 3%. Sire is an F11 carrier and dam is tested free of the known genetic disorders. Embryos are grade 1 and are located at Agrimark Genetic Services in Kingsbury, Texas, where the conventional flush was performed. Buyer responsible for shipping if embryos are to be shipped.

SIRE: JC RUESHAW 92 FB16182

DAM: 711 MS KUNIYOSHI 402B FB23334

Sire is free of all known genetic disorders, Dam is F11C

This pairing is a 100% Red Wagyu genetics sire over a Red/Black Wagyu genetics dam, so the offspring will be 75% Red Wagyu genetics and 25% Black Wagyu genetics and calves will have a 50% probability of carrying a double red gene, in which case the calf will have a red hide. The sire, JC Rueshaw 92, is an own son of the famous Rueshaw (FB101), the only Japanese National Grand Champion Wagyu to ever leave Japan, who's semen is in such demand that it has sold for over \$4,000 per straw at recent auctions. He is the full brother to the 2014 and 2015 Grand Champion Red Wagyu Bull at the Houston Livestock Show, whose ultrasound marbling score topped all other Wagyu at the show including all of the Black Wagyu. Rueshaw is known for being extremely gentle, easy keeping, and for his phenotypical correctness, and the sire's dam includes Hikari and Judo, two of the top marbling Red Wagyu sires. The sire's dam contains the DNA of Hikari and Judo, two of the top marbling Red Wagyu sires. The donor cow, 711 Ms. Kuniyoshi, is sired by SOR Kunisaki, who contains Red Wagyu the DNA of Hikari, Judo and Kaedemaru, and is out of a Black Wagyu dam carrying the DNA of Kitaguni Jr., Michifuku and Kikuyasu-400. Flushed once as a virgin heifer, this donor cow produced 12 grade 1 embryos. This pairing should result in calves with early growth, relatively large mature size and excellent maternal characteristics, as well as great carcass qualities. The inbreeding coefficient of this pairing is 7%. Sire is tested free of all known genetic disorders, Dam is tested and is an F11 carrier. Embryos are grade 1 and are located at Agrimark Genetic Services in Kingsbury, Texas, where the conventional flush was performed. Buyer responsible for shipping if embryos are to be shipped.

Free of all known genetic disorders

This pairing is a 100% Black Wagyu genetics sire over a Red/Black Wagyu genetics dam that is 7/8 Black Wagyu and 1/8 Red Wagyu. Calves out of this pairing will have a black hide and will be 1/16th Red Wagyu genetics. The sire, BR Itomichi 0602, is known for producing calves with early growth, outstanding size, and great maternal characteristics. The donor dam, FAC Shig 103, flushed once as a virgin heifer, produced 27 grade 1 embryos and is sired by the famous Shigesigetani, known for highly consistent transmission to calves of excellent marbling together with excellent growth, out of a dam with Black Wagyu DNA including Sanjiro, Kitateruyasudoi and Kikuyasu-400, and Red Wagyu DNA including Hikari and Judo. This pairing should result in calves with early growth, relatively large mature size and excellent maternal characteristics, along with outstanding marbling characteristics. The inbreeding coefficient of this pairing is 1%. Sire and dam are both free of the known genetic disorders. Embryos are grade 1 and are located at Agrimark Genetic Services in Kingsbury, Texas, where the conventional flush was performed. Buyer responsible for shipping if embryos are to be shipped.

SIRE: JVP KIKUYASU-400 FB2100

DAM: CHR MS ITOZURU DOI 325 FB9745

Sire is free of all known genetic disorders, Dam is F11C

His donor is sired by the immortal Itozuru Doi 151 (Considered by many the greatest composite growth x marbling bull, and only bull Takeda ever had cloned!), Takazakara (The ultimate trait magnifier) and Suzutani (undisputed "Queen of the Breed" all in the same pedigree! Of all the bulls Takeda brought in, only 1 was ever cloned, and he was cloned TWICE: Itozuru Doi 151. Itozuru Doi 151 is widely considered the greatest all around composite bull of the breed and his original straws have sold for over \$15,000 each. Suzutani is hands down considered the greatest Wagyu cow to ever leave Japan as Sanjiro and Shigesigetani's dam. Takazakara is considered perhaps the best maternal sire by many top breeders because of his marbling, growth and milk. Crossing 325 with "400" the largest 100% Tajima ever imported from Japan weighing nearly 2000 lbs, magnifies the growth and marbling magnificently expressed phenotypically in 325. This cross gives you a pure Doi blood sire (Doi blood is what made Kobe beef in Hyogo, Japan famous) with a composite dam sired by the greatest composite sire, and out of Suzatata 2, the daughter of the greatest cow in the breed period, Suzutani.

Consignor: WAGYURANCH.COM

SIRE: KENHANAFUJI FB2461

DAM: NANASHI FB10054

Free of all known genetic disorders

This donor is too good to be true. Most breeders say she is the deepest chested, thickest, longest Wagyu cow they have ever seen when they see her. They kept getting so many repeat requests at TransOva to see her, that they put her in her own pasture paddock close to the office to save time showing her. An IVF vet at TransOva said that Nanashi is the "biggest, thickest, nicest looking Wagyu cow they have ever seen there," and they "didn't know Wagyu cows could look like that." What is even more jaw dropping than her phenotype is the fact she is sired by arguably the greatest composite bull of all time, with Sanjiro and Kitaguni Jr as 2nd and 3rd sires. 60%+ Tajima cows just are not supposed to look anything like this! She is a definite breed-changing superfreak. Combining Nanashi with the highest selling Wagyu bull of all time "Kenhanafuji," arguably the greatest bull to ever leave Japan, as evidenced by the Japanese paying \$150,000 for him AFTER he arrived in America, will produce breed changing sires and donors.

Black, Horned, Fullblood Bull
Reg. No. FB23855
Consignor: RESERVE CATTLE COMPANY

SIRE: SHIGEFUKU J1822

DAM: GAW SANSHIGA

Free of all known genetic disorders

RCC Shigefuku 059 is sired by the original Shigefuku, the highest content Kedaka bull ever to leave Japan. Shigefuku himself did not leave Japan; only a small amount of semen made the voyage. Shigefuku is a son of Dai 20 Hirashige 287 and is a half-brother to the greatest bull in Japan, Hirashigekatsu. Hirashigekatsu is producing heavy carcasses with extreme marbling. At the 2007 all Japan Zenkyo competition, six of the top ten bulls were sired by Hirashigekatsu. RCC Shigefuku 059's Dam, Sanshiga, is our top flush cow and top income producing cow. She has produced 39 fertilized embryos for us in one flush and consistently flushes double digits. She is a high Tajima cow, weighing by scale 1500 pounds. Sanshiga has every notable sire in her pedigree: Sanjiro, Shigeshigetani, Haruki II, Michifuku, JVP Fukutsuru 068, and she has the greatest cow ever to leave Japan, Suzutani, on both sides of her pedigree and another great Dam of the breed, Okutani, as well. Our ideal mating for this Shigefuku son would be to line breed other Dai 20 Hirashige 287 influenced cows and lock in the genetic power from that family. RCC Shigefuku 059 is pictured at 20 months and 1300 pounds. His birth weight was 55 pounds. We expect him to go beyond 1800 pounds. He does qualify for export to EU, Canada, Mexico, South and Central America, Australia and South Africa.

 Free of all known genetic disorders

MFC Michiyoshi 522C is the only DNA verified SCD AA-10 son of the late Michiyoshi. Michiyoshi the sire of MFC Michiyoshi 522C was the #2 ranked bull free from genetic disorders in the 2014 AWA wagyu bull trials. His semen recently sold for \$1,000 per unit in the 2017 Denver wagyu auction. MFC Michiyoshi 522C is well on his way to exceed his sire bringing not only a higher SCD score of AA-10 but also a drastic increase in size. MFC Michiyoshi 522C is currently part of a bull trial that will provide data from 50 progeny. Semen is located at Hawkeye Breeders in Iowa. All semen is EU qualified for export.

LAG 2627 "BRADY" • SEMEN SELLS AS LOT 197.

197 LAG 2627 "BRADY" SEMEN 10 UNITS

Red, Horned, Fullblood Bull

Reg. No.

Consignor: LEGENDARY AKAUSHI GENETICS

SIRE: RUESHAW

DAM: LAG Z1118P

Brady is a stout bull and like his grandmother Akiko, has a strong top line conformation and an easy going temperament. He is a double bred Rueshaw son and his mother is the Z cow (Rueshaw by Akiko) FB 24698. Brady is currently registered with the American Akaushi Association and like his sister FB 25312 we plan to register him with the American Wagyu Association soon. For comparison purposes, his sister is F-11 free, AA fat and has a 4 tenderness rating, we expect Brady to be graded similarly but will leave that job up to GeneSeek. If you always wanted to add Rueshaw genetics to your breeding program but didn't want to pay the \$4000 a straw for Rueshaw semen, we think Brady is your answer.

SIRE: RUESHAW
 DAM: JC MS UMEMARU 30
Free of all known genetic disorders

Son of foundation bull, Rueshaw (FB101), who is the only Japanese National Champion Wagyu to be exported from Japan. Minimal amount of semen was collected from Rueshaw during his lifetime. JC Rueshaw 92 is the full brother to JC Rueshaw 75 - the 2014 & 2015 top marbling, Grand Champion Red Bull at the Houston Livestock Show.

203 JC YASUTANI 068 TEX 8126 SEMEN 6 UNITS

Black, Horned, Fullblood Bull
 Reg. No. FB10098
 Consignor: WINTERS FAMILY BEEF

SIRE: JVP YASUTANISAKURA 100 FB2102
 DAM: HR KOKO 007 100 FB6437
Free of all known genetic disorders

The AWA began testing for recessive genetic disorders in 2010. When members were informed that the foundation bull, JVP Yasutanisakura, was a carrier of 3 of the 4 disorders, his valuable bloodline hit a wall. Breeding to him ceased and few offspring have been registered since 2010. Of his 92 registered progeny, there is only one who is free of all the disorders. This is the one! Having another carrier foundation sire as his maternal grandsire (JVP Fukutsuru-068), it's a miracle that this bull is disorder free. Sensei, as he's known, was entered in the 2010 Texas Bull Test, where he ranked in the top 17% for avg. daily gain and rib eye, with above average marbling. Since then, he has been busy producing F1 feeder calves for the Winters Family Beef business. His birth weights are low and the beef sells out every weekend at the farmers' markets. His pedigree is approx. 55% Tajima, 30% Itozakura/Shimane, & 15% other for a balance of marbling, growth, and milk. This semen presents a unique opportunity to widen your genetic base with no risk of disorder affected calves.

TRU-TEST™

Scales Built for Livestock

You can't manage what you can't measure

Let Tru-Test scale systems measure your herd's performance, increase efficiencies, and **MAXIMIZE** your profits.

- ✓ Which bull is best for your herd?
- ✓ Do you dose the correct amount of treatment?
- ✓ Which cow is producing the best calves?
- ✓ Can you identify poor performing or sick animals early on?
- ✓ What is your herd's average weaning weight?
- ✓ Do you know what your cattle are worth before going to the sale barn?

BREEDING MANAGEMENT. MADE EASY.

Let Tru-Test stock management solutions help you make breeding decisions that increase profit.

**When it's a labor
of love, it isn't "work."**

At Capital Farm Credit, we do things differently. We're a cooperative - that means we're owned by the same ranchers, farmers and agribusinesses we serve. Whether you're looking for operating capital, a beginning rancher loan or need help navigating a rural land purchase, your goals are our goals. And our patronage dividend program means we share our profits and put money back in your pocket.

Together we're better.
Partnership that really pays.
