

Barber Ranch

Mature Cow Herd Dispersal & Spring Production Sale

Friday, May 25

&

Saturday, May 26, 2018

CHANNING, TEXAS

Barber
RANCH
Welcome to the Barber Ranch

Welcome!

We are very excited to be hosting the first auction on our ranch in 30+ years. This also happens to be the first time in our 114-year history that we have ever had a large cow auction. It is with mixed emotions that we will be parting with many of the great cows that have made such a mark on our program and also some young females who are just beginning their productive lives. However, with our vision for the future of our ranch and to keep pace with the amount of embryo work we are doing and the influx of young cattle, this sale is a necessity. We are truly offering many of our best to the public.

One thing that will immediately jump out to you when looking at our cow herd is the amount of BR prefixes throughout their entire pedigrees—especially on the bottom side. We have long been a believer in the cattle we raise and being able to produce a superior animal within our own fences. However, our philosophy is to also search for the best sires available in the industry to use on our cows, as we also believe you can become blinded from too much of your own breeding at times. . . we have been victim to this before as well. Today though, we feel like we have the perfect blend of our own breeding and genetics from outside our herd. *We don't care if they are horned or polled, but we do care if they have a lot of maternal ability bred into them and great udders.* We also like cattle that offer a lot of look with a balanced EPD profile.

The heart of our herd combines what we believe are the best horned and polled Hereford pedigrees for the type and kind of cattle we like to see every day. Gabrielle was our most famous cow, combining Remitall Keynote 20X on the top and bottom sides with Pure Gold, Desert Edge and 68J. Her most successful mating was to Sooner, and together they have really set the foundation for our modern cow herd for a decade now. The maternal ability and udder quality are as good as we have seen in the Hereford breed overall, and their genetics can be found heavily throughout our herd. Instead of singling out certain lots in this writing, we encourage you to look throughout the entire sale offering to find what best fits you; there are just too many good ones to list in this welcome letter.

Visitors are welcome to come by the ranch any time prior to sale day—we just ask that you call in advance. Friday evening, May 25th, we will be hosting a steak dinner and live entertainment along with the frozen genetics portion of our offering. We believe in the people and fellowship that the Hereford breed and its members offer, and we look forward to seeing everyone for a fun evening Friday at the ranch. Saturday morning we will begin the auction at 11 a.m. CT.

Videos will be online prior to the sale at both barberranch.com and superiorlivestock.com. Please feel free to call anyone associated with the sale with any questions. We encourage everyone to attend the sale and bid in person, but for those unable to attend, we have made arrangements to bid online or on the phone through SuperiorLivestock.com as well as online through LiveAuctions.tv. Please note that the Friday night frozen genetics auction will only be broadcast on LiveAuctions.tv.

Thank you for your interest, and we look forward to seeing you at the ranch!

The Barber Family

Mature Cow Herd Dispersal & Spring Production Sale

Friday, May 25 & Saturday, May 26

Barber Ranch...Channing, Texas

GPS address: 10175 FM 3138, Channing, TX 79018

Schedule of Events

Friday, May 25th

Sale cattle available for viewing all day.

5:30 p.m. — CHB® Steak Dinner & Refreshments

7:00 p.m. — Sale of Frozen Genetics (*see pages 65-75*)

8:00 p.m. — Cowboy Social with Live Entertainment by the Coby Carter Band

Saturday, May 26th

Coffee & Breakfast *Sponsored by Central Life Sciences*

11:00 a.m. — Sale Begins

Selling all spring- and fall-calving females five years of age and older, including donors.

Plus elite fall ET show heifer and herd bull prospects, fall bred heifers and a select group of feature young donors.

Lunch & refreshments will be available all day.

Online bidding for Friday evening and the sale Saturday will be available on the LiveAuctions.tv site.

Sale catalog and advertising prepared by Layton Auction Services.

Produced by Jill Otterstad, Southwest TypeStyles (405) 317-1743 

First and foremost, I would like to welcome everyone to this once-in-a-lifetime offering of Hereford genetics. The Barber Family has dedicated their entire life to breeding top-notch Hereford seed stock. For many years, the Barber program has been one of the most instrumental breeding programs in the Hereford industry. They have produced high-end bulls and females that have surfaced to the top in all levels of the business, whether that be elite show heifers, herd bulls, AI bulls or foundation donors. Their genetics have worked in all regions of the country, and I feel that is a strong statement on its own for this program.

This is one of the most productive sets of females I have ever had the opportunity to assist in marketing. The gene pool is stacked deep from Lot 1 to Lot 147 in the live portion of the sale. The frozen section has 22 powerful lots that consist of flushes, semen and embryos.

We welcome you to join us at the Barber Ranch headquarters on Friday, May 25 for a CHB® steak dinner, refreshments, live entertainment and the Frozen Event that will begin at 7 p.m. CDT. On Saturday, May 26, the sale will start promptly at 11 a.m. with food and refreshments available throughout the day. If you have any questions, feel free to contact myself or Barber Ranch.

Thank you in advance for your attendance, and safe travels to Channing, Texas.

Dustin N. Layton

Dale Barber

Barber Ranch

Family Owned & Operated since 1904

Mary Barber

BARBER RANCH'S ROOTS trace back to a commercial horned Hereford cow herd started in 1904 by Mary's grandfather, J.B. Brown. At the turn of the 20th century, J.B. and his four brothers migrated to the Texas Panhandle from Kentucky, but only J.B. stayed. Channing is ranching country comprised of rough terrain, continuous wind, extremely hot summers and cold winters with a constant mixture of drought. But, there's a saying in the Texas Panhandle that *if you wear a pair of boots here long enough to wear out the soles, you'll never leave*. This has held true to building Dale's and Mary's legacy and for

their love of home, family and Hereford cattle. Red-and-white faced cattle have dotted the landscape northeast of Channing by the same family now for 114 years, and we don't anticipate that ever changing.

J.B. purchased purebred bulls from Powell Registered Herefords, a neighboring ranch, but they raised registered Hereford cattle while we were a commercial herd at the time. Powell imported original breeding stock from England in the late 1800s. G.I. Edlin, Mary's dad, replaced the commercial cows with registered ones in 1950. Registered Hereford cattle were extremely popular at that time, both nationally and locally. Each area had its own Hereford association that held a show, sale and social every year; ours was XIT Hereford Breeders at Dalhart. There was also the Top of Texas Breeders at Pampa and the Panhandle Breeders at Amarillo—all three in the Texas Panhandle alone.

Dale grew up on a commercial Hereford ranch in the Hill Country of Texas, where the scenic landscape is populated by trees, lots of brush, running water and mild winters. Dale graduated from veterinarian school at Texas A&M University and then joined the Air Force (all Aggie graduates at the time began as an officer at the service of their choice upon graduation). Soon after graduating from vet school, Dale and Mary met and got married. Soon thereafter, the health of Mary's dad declined rapidly, so Dale and Mary moved to Channing to take over the ranch.

Mary loved to work with show cattle and Dale loved to work cattle horseback. Their vision for raising the best Hereford cattle possible has remained constant over the years as the industry has evolved and adapted. They have always strived to raise

Mary's first time to show in Denver

Hereford cattle that are functional for both the purebred and commercial cattleman but that also have the look they prefer and the ability to compete in the show ring. Showing cattle has never been the primary focus of our operation, but it has always been an enjoyable way to showcase our genetics.

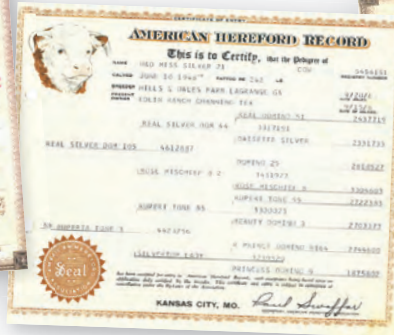

Our cow herd originated from Anxiety 4th, Mischief and Prince Domino bloodlines and was 100% horned (and would remain completely horned until the late 1990s). Notable purchases in the beginning were JO Return 846 from Jack Orr at Kremmling, Colorado, in the early 70s along with SR Mischief K1102 from the Sellmans, then from New Mexico. Then a couple of Line 1 bulls really elevated our herd with the purchases of HH Advance C756 "Hatchet" from Holden Herefords in Montana and WCF L1 Domino 6313 "Clown" from a test center in Florida. Hatchet added the "look" and Clown added the extra muscle shape from end to end; together they complemented each other well and gave us a place to build for the future.

The 1970s really set the foundation for our cow herd. A great cow, 9029, born in 1979, was a combination of Clown and Hatchet and was a tremendous breeding individual. She would be the base for the Gabrielle cow line, as 9029 is Gabrielle's sixth generation grandmother. However, it wouldn't be until the late 1990s that Polled Hereford genetics would be infused into our horned breeding program to adapt us to our modern cow herd.

In the 1990s, our oldest son, Brett, was the manager of Michigan State University's Purebred Beef Center, which was a Polled Hereford herd. Brett took some of the better horned cows from Barber Ranch to MSU and bred them to polled bulls, which is the reason Barber Ranch initially incorporated polled genetics.

8077, a daughter of 9029, served as a donor cow for MSU and produced the popular herd bull Hallmark among other top individuals. 8077's most outstanding daughter for us was 1040, whose best daughter was 7022, who would produce herd bull 3060, the sire of Gabrielle.

MSU had two other cows from our herd in their donor program. One was a Mark Donald cow, 2105, who was the dam of 62H – Champion Owned Heifer at the 1999 Polled Junior National. 62H's most influential progeny was Goldriel 3029, whose first calf would be Gabrielle. Gabrielle was the most influential cow our program has ever produced, and her pedigree can be found throughout herds all across the United States. The other cow at MSU was 6052, another descendant of 9029. While at MSU, 6052 produced BR MSU Lansing 68J ET, and because he was horned, MSU sent him to us. He was the sire of 3060 (the sire of

Remitall Keynote 20X – influential AI sire

Gabrielle) in his first calf crop. 6052 won many national shows and was also the dam of multiple national champions as well.

There were many fun moments along the way when we began adapting our herd to blend what we felt were the best horned Hereford genetics with the best Polled Hereford genetics. When we first began dabbling with polled genetics, we decided to breed multiple horned cows to polled bulls because the Polled Hereford Junior National was at Michigan State in 1999, while Brett was still with MSU, and we had never been to a Polled Junior National. By this point, sons Jason and Justin had won multiple horned Hereford Expos (the horned equivalent to the Polled Junior National). So in anticipation of the Polled Junior National, we bred a few horned cows to a polled bull named Remitall Keynote 20X. We took two polled heifers out of two different horned Hereford cows and sired by Keynote 20X to the Polled Junior National. One of the sisters won the Owned Show and the other was Reserve Grand in the Bred-and-Owned Show. Then one week later we took two more horned paternal sisters to the Horned Hereford Expo in Chadron, Nebraska. They were both sired by Keynote 20X and out of a couple more horned cows...one won the Owned show and the other won the Bred-and-Owned show. These four paternal sisters, all out of four different horned cows and sired by one polled bull, really set the stage for our modern cow herd and we believe helped make

crossing horned and polled Hereford cattle popular today. We realize we weren't the first people to cross horned and polled genetics, but we do feel we are one of many reasons for its initial popularity. A couple other fun notes about that summer are that 1999 was the last year the horned and polled junior nationals were separate shows, and after that showing, semen on Keynote 20X shot to \$1,000 per straw!

We've had many great experiences raising Hereford cattle and family over the years along with some unforgettable showing experiences (JNHE 2004 in Jason's and Justin's last year as junior exhibitors comes to mind!), but one of the proudest moments we have had was Terri being the first ever female President of the American Hereford Association National Board of Directors.

Today, we feel very blessed to work with family and have all of our children involved in the ranch in some capacity. Brett and Justin are on the ranch full time, and Terri and Jason are also actively involved. It's hard to narrow our history down to a couple pages, but we are very fortunate to love what we do and to not feel like we've ever had to work a day in our life.

Dale and Mary Barber

1974 – our first ROM Champion

Mary has always loved to work with show cattle.

Dale still loves to work cattle horseback.

- BR Abigail 8130 ET may be one of the most accomplished Hereford donors in history! She has continually produced offspring that have dominated in the show ring and in the pasture. She really hit her stride when she produced the six-time National Champion and \$240,000-valued BR Anastasia 3023 ET. Anastasia's \$150,000-valued full brother, BR Nitro Aventus 3116 ET, went on to become the Grand Champion Horned Bull and Supreme Champion Hereford at the 2016 National Western Stock Show. BR Audrey 4075 ET, a maternal sister to Anastasia and Aventus, was crowned Reserve Grand Champion Hereford Female at the 2015 North American and later that year sold 1/2 interest for \$110,000 in the Barber's Red & White Holiday Lights Sale.
- 8130 is also the dam of the now-deceased BR Copper 124Y, who is going to leave a major impact with his progeny in the Hereford breed.
- What an opportunity to acquire one of if not the most productive female over the past 10 years. 8130 monetarily has generated more dollars in progeny sales than any other donor at Barber Ranch to date. 8130 adds instant offense to any program, as her progeny are in high demand and fetch top dollar.
- Top 1% WW, YW, CW, top 3% CHB, top 10% REA.
- Flush record: aspirated 30 times for 148 transferable embryos.
- AI 2/21/18 to BR Belle Air 6011. Owned with Rafter J Cattle.

BR Copper 124Y – son of Lot 2

BR Anastasia 3023 ET – six-time National Champion

BR Audrey 4075 ET – two-time Reserve National Champion

BR Nitro Aventus 3116 ET – three-time National Champion & Denver Supreme Champion

BR RCR McKavett 5509 ET – 2016 JNHE Grand Champion Bull

RJ AMC Big Chief 6033 ET – 2017 NAILE Grand Champion Bull – raised by Rafter J Cattle

In addition to these six pictured, five other progeny of 8130 have captured division championships at national shows.

- 8051 is another of the cornerstone Sooner x Gabrielle 5082 daughters that has become a household name at the Barber Ranch. Several of her progeny have captured show ring banners and fetched top dollar.
- A \$75,000 daughter was crowned Grand Champion Horned Female at the 2017 Texas State Show. Her progeny—both live and frozen—have been heavily sought after each year in the Red & White Holiday Lights sales.
- A direct son, Cool Hand Luke, is a resident herd sire for Barber Ranch.
- 8051 is known for producing high-end females with gorgeous udders and top bulls that commercial and registered cattlemen alike seek after.
- Her embryos sell Friday evening.
- Top 1% WW and CW, top 3% YW, top 4% REA and CHB.
- Flush record: aspirated 33 times for 214 transferable embryos.
- **Sells open and ready to flush.**

- Selling 1/2 interest and 1/2 possession. Barber Ranch will maintain possession until the completion of his show career.
- The Fresh Prince is the first progeny of Belle Air to be offered by Barber Ranch. He is the result of mating Barber Ranch's 2017 Denver Supreme Champion Bull, Belle Air, to the 2015 Denver National Champion Polled Female, Anastasia. His dam's full brother, BR Nitro Aventus 3116 ET, was the 2016 Denver Supreme Champion Hereford.
- This calving-ease bull is built right from every aspect and has an impeccable EPD profile. The Fresh Prince stems from the most potent genetics at Barber Ranch. We feel his ability to succeed in the show ring and to sire progeny that will excel phenotypically is extremely high.
- Top 10% WW , top 15% CED EPD (+7.2).
- BW 70 lbs.

- Selling 1/2 interest and no possession. Barber Ranch will retain 5107's natural calves for maintenance on the female.
- 5107 is without question one of the top Revolution 4R daughters you will find anywhere in the country. She is flawless in her design with an impeccable udder. We believe this female has tremendous earning potential and will be a vital breeding piece in the Barber Ranch program going forward.
- We would usually keep a female of this caliber open, but due to the fact that she flushed IVF so well the first time and had such a strong heat, we decided to breed her. We plan to IVF again while she is bred.
- Top 2% REA, top 5% CW, top 1% WW, YW and CHB.
- Flush record: 1 IVF cycle (4/5/18) for 12 transferable embryos.
- Retaining her 11/22/17 bull calf, tattoo 7219.
- AI 4/26/18 to BR Hutton 4030ET.

Late Fall Heifer Calf Pairs

Lots 53-60

These females calved in November and December and were held over to AI to calve in January and February 2019.

They were all AI bred April 26 and 27, 2018. This is a powerful set of females that will be due back in heat one week before sale day. A supplement sheet will be available at the sale to list which ones have passed over and which ones came into heat. What an opportunity to acquire top heifer calf pairs and potentially 3-in-1 packages.

Late Fall Bull Calf Pairs

Lots 86-98

These females calved in November and December and were held over to AI to calve in January and February 2019.

Most were AI bred April 26 and 27, 2018. This is a powerful set of females that will be due back in heat one week before sale day. A supplement sheet will be available at the sale to list which ones have passed over and which ones came into heat. Grab on to an elite cow and a herd bull in one package with these lots.

- 0026 was a donor that we had *huge* plans for about four years ago. We were all convinced that she would be our next cornerstone female. Without a doubt, she is one of the best looking cows on the place—dark red, goggle eyed, stout, deep, nice uddered and great pedigreed. She even produced the Lot 1 heifer in our 2015 December sale, BR Veronica 5019 ET, who sold 1/2 interest for \$75,000 and went on to win the Texas State Show for Cash Long. However, she never really flushed well or produced more than two or three oocytes per IVF cycle, so we quit trying after many attempts and very few embryos. But with her being up at the main part of the ranch to be videoed, we decided to give her shots and run her one last time with our donors that were headed to Trans Ova for IVF for the day. As we are finishing this catalog, she kicked out 17 oocytes....
- AI 3/3/18 to BR Belle Air 6011 ET. Checked safe.

- 8017 has been a prolific producer at Barber Ranch, consistently producing highly marketable seed stock. In the 2016 Holiday Lights Sale, Express Ranches purchased an Aventus x 8017 heifer calf pregnancy for \$7,500; ten months after that purchase, the heifer commanded \$60,000 to Logan Boyd in the Annual Express Ranches Hereford Event and later went on to win her class in Denver in the open Hereford show.
- In Barber Ranch's April 2017 online sale, four daughters sold for an average of \$7,750 with a high of \$11,250. This direct daughter of Sooner still has gas in the tank to produce high end Hereford bulls and females.
- Flush record: aspirated 8 times for 55 transferable embryos. Owned with Five S Cattle.
- **Sells open, ready to flush.**

- Here is your opportunity to own Breezy, the 2012 Reserve Grand Champion Female at the Fort Worth Stock Show. Breezy displays incredible power and bone yet still maintains a very attractive look on the profile. Her progeny sales have topped over \$100,000 to date. Her donor dam, 3029, has certainly left a lasting impact on the Barber Ranch program, as is evident in this powerful donor and throughout the entire sale.

- Top 10% WW and YW.
- Flush record: aspirated 16 times for 86 transferable embryos.
- Owned with Rachel Adkins, Maxwell Cherry and Resa Wicker.
- AI 4/26/18 to BR Hutton 4030ET.

- BR 124Y Alainna 4138 has propelled herself to be one of the new elite donors at Barber Ranch. She is sired by the now-deceased BR Copper 124Y, whose semen has brought in excess of \$600 per straw. Alainna will turn four this spring and is phenotypically incredible. She is equipped with one of the most gorgeous udders you will ever see.
- Alainna's first two natural calves amassed \$125,000 in progeny sales. Her first natural bull calf, sired by BR Hutton 4030ET, was the high selling bull at \$25,000 to JM Cattle Co. in Tennessee in Barber Ranch's 2017 Annual Bull Sale. Her second natural calf, Guinevere (pictured), was the \$100,000 feature female in the 2017 Barber Ranch Holiday Lights sale in Fort Worth.
- This will be the first and only flush to be offered on Alainna, as Barber Ranch is going to extensively use her in their ET program as they move forward.
- Alainna is open and will be ready to flush after the sale.
- **Selling the right to flush Alainna 4138 to the sire of the buyer's choice.**

Terms of Lot 201 Donor Flush

- Seller guarantees six transferable embryos, with all embryos produced in the flush going to the buyer.
- Buyer may choose to either IVF or conventionally flush the female. The flush will be conducted at Trans Ova in Fletcher, OK.
- Buyer will be responsible for supplying semen and for all other costs associated with the flush.
- Barber Ranch will guarantee two pregnancies to result if transferred by a certified embryologist.

- Amy Rielle 5538 was Grand Champion Bred-and-Owned female at last summer's Junior National Hereford Expo. One of the very last Sooner x Gabrielles ever born, she combines exceptional look and power with the most proven pedigree Barber Ranch has ever produced. If you have any questions as to whether or not she can produce at the same elite level as her sisters, just ask to see Rylee's summer born heifer out of her that she's taking to the Junior National this summer.
- Full sisters sell as Lots 2, 3 and 4.
- Selling the right to flush Amy Rielle 5538 to the sire of the buyer's choice.

Terms of Lot 202 Donor Flush

- Seller guarantees six transferable embryos, with all embryos produced in the flush going to the buyer.
- Buyer may choose to either IVF or conventionally flush the female. The flush will be conducted at Trans Ova in Fletcher, OK.
- Buyer will be responsible for supplying semen and for all other costs associated with the flush.
- Barber Ranch will guarantee two pregnancies to result if transferred by a certified embryologist.

- 4030 is one of the best kept secrets on Barber Ranch and a huge reason why we're comfortable having a mature cow herd dispersal. As you can see by the many cows we have AI'd to him, the calves sired by him at the cow's side and his young two-year-old daughters that are just now in production, we're putting him at the forefront of our breeding program.
- Really study the cows on both the top and bottom sides of his pedigree, and you'll be hard pressed to find a bull that combines so many great and proven cows in one pedigree. 4030 is also a maternal brother to Belle (Lot 1), and so far he's consistently siring the best udders of any bull we've ever used, including Sooner. We also love that he is polled, great numbered and consistently throws dark red hair coats. This is a herd sire that we most likely won't continue to offer semen from in the future.
- Certificates \$75 each—contact Barber Ranch.
- Semen is stored at Trans Ova, Centerville, TX.
- **Selling 100 units of Hutton 4030 semen in packages of five units each. Winning bidder has the option to roll in increments of five until all semen is sold.**

Sale Terms & Conditions

TERMS: Cash or check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

HEALTH: The health of the cattle selling is excellent. Any known defects will be announced. Each animal will be accompanied by an individual health certificate for immediate interstate shipment. Buyers should be aware of their own state's specific health requirements.

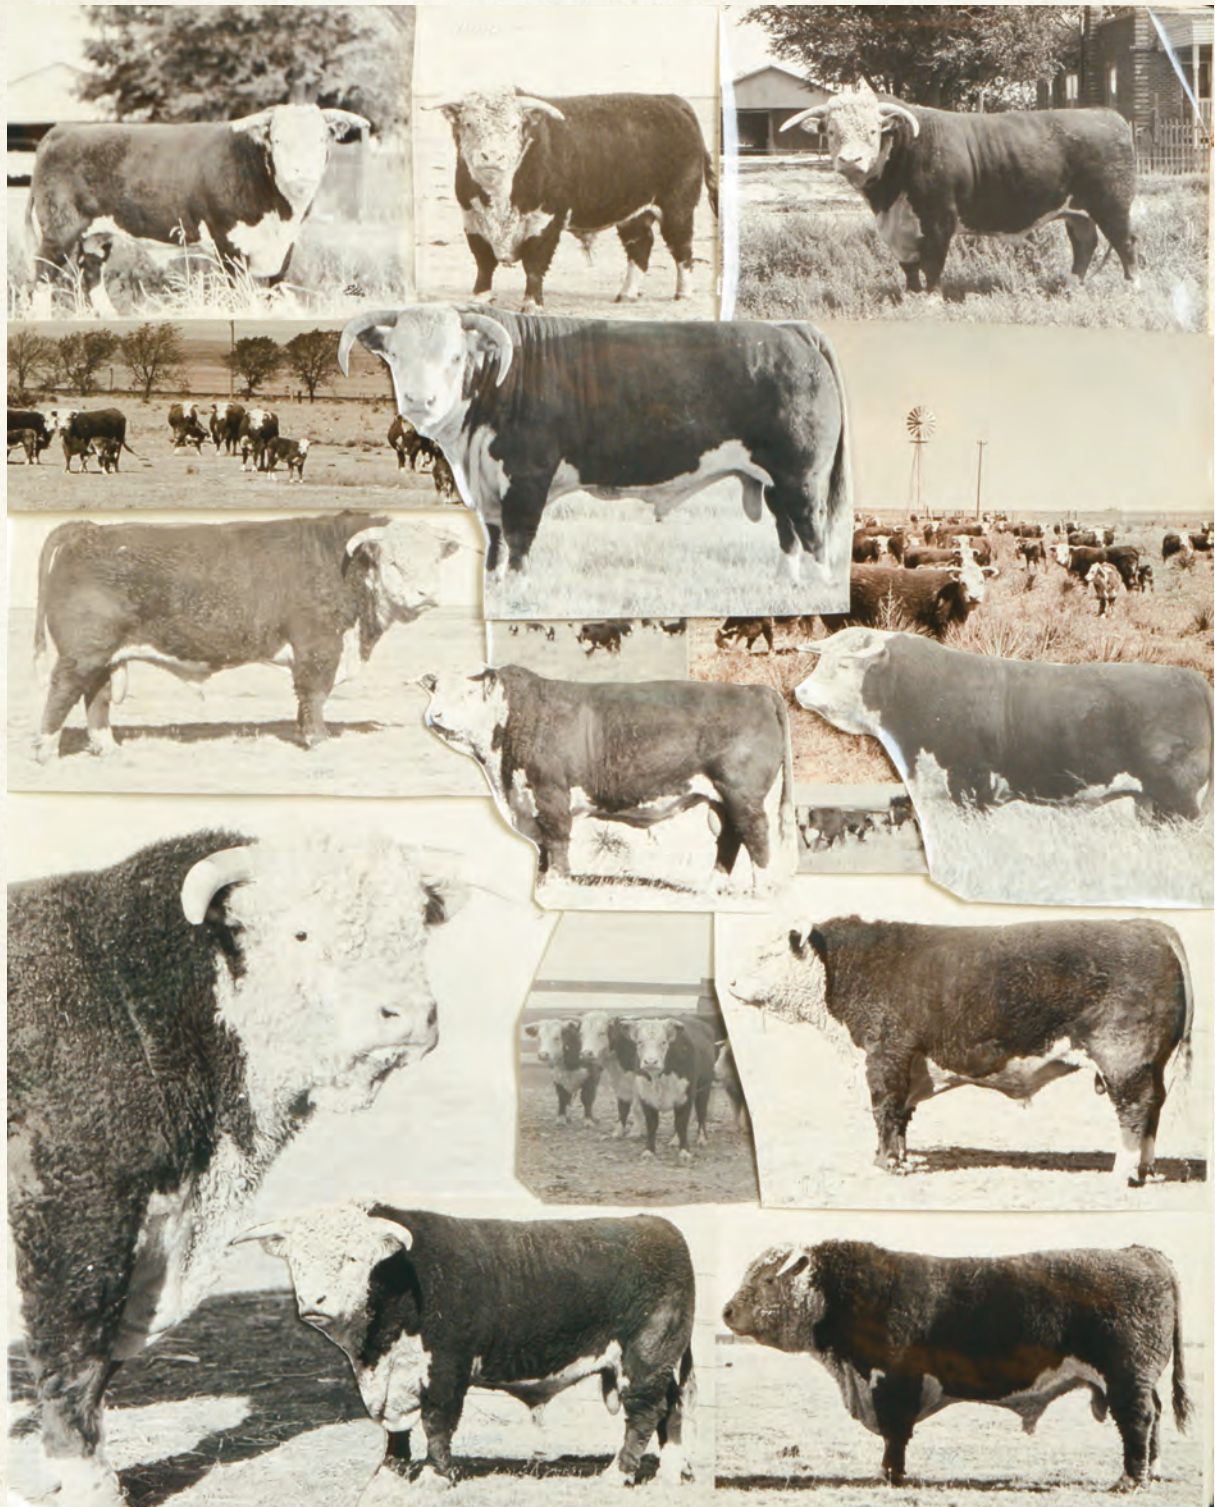

GUARANTEE: Each animal will sell under the American Hereford Association Recommended Terms of Sale for Auctions, viewable online at hereford.org.

BREEDING GUARANTEE: All animals are guaranteed to be breeders with the exception of (a) calves under 12 months of age at time of purchase; (b) any female that is placed in an embryo transplant program and subjected to super-ovulation; or (c) gross negligence on the part of the buyer. Females sold as safe in calf have been examined by a competent veterinarian. Open females are guaranteed to be without calf. Any agreement with respect to Embryo Transfer production shall be a separate agreement between buyer and seller.

REGISTRATION CERTIFICATES: Animals will be transferred to the buyer at the seller's expense. All calves born before the sale will be registered by the seller; proper breeding statements will be signed for the buyer to use in registering calves born after the sale. Cattle will not be transferred to the buyer until paid for in full.

ANNOUNCEMENTS: Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. A sale supplement will be provided to include additional breeding, calving and other information. We reserve the right to withdraw any lot not meeting our specifications prior to sale time.

LIABILITY: All persons who attend the sale do so at their own risk. Neither Barber Ranch nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property. As the sale manager, Layton Auction Services, LLC is only an agent for the seller and has no responsibilities other than those involved in conducting the sale. The information provided is based on information furnished by the seller.

Red-and-white faced cattle have dotted the landscape northeast of Channing, Texas, by the same family now for 114 years, and we don't anticipate that ever changing.

Thank You from The Barber Family!
