

BARBER RANCH

Annual Bull Sale

November 14, 2018

11 a.m., Wednesday

Jordan Cattle Auction, San Saba, Texas

162 Head Sell

111 Horned & Polled Registered Hereford Bulls

11 Registered Hereford Spring Bred Heifers

40 Express Ranches Registered Angus Bulls

Service-age bulls ready to work as well as yearling bulls geared for you to develop and adjust to your environment!

Welcome to the Sale!

We at Barber Ranch are excited to have the opportunity to present to you this year's sale offering. Almost half of the bulls are embryo transplant calves out of proven donor cows from our main cow families and industry-leading herd sires. Included are herd bull prospects that could work in any progressive breeding program. There are several groups of full brothers that should have the ability to sire uniform calves of the highest quality. For our customers wanting to raise their own replacement females, these bulls are backed by generations of herd building females. We have used artificial insemination for nearly 50 years to continually strive to offer our customers cattle that will rank at the top of the industry, both genetically and phenotypically.

Our program has always strived to add more look along with more performance...more muscle, bone, and body. Udder quality, calving ease and carcass traits have come to the forefront in making current breeding choices. These bulls are developed in large grass pastures with limited supplemental feed. They are lot numbered in sale order. There are top individuals scattered all through the catalog—just waiting for you to find them.

This sale offers you second-to-none, one-stop shopping, as we are honored to again feature Angus bulls from repeat consignor Express Ranches, the nation's largest seedstock producer. Nationally known for sound, fertile, problem-free cattle, Express Ranches offers proven, performance-based genetics with exceptional customer service that has set the standard of excellence for the Angus breed.

We encourage you to invest with confidence, knowing that your purchases are backed by 100% satisfaction guaranteed. With the opportunity to buy from two of the most prominent U.S. breeding programs in one place, there's no better time to strengthen your herd. *Selecting high performing, efficient bulls to sire your next calf crop is an important economic decision that YOU can control.*

Come early and enjoy Texas Hill Country hospitality Tuesday evening before the sale. To our past and future customers, partners and all the families and ranch hands who make this possible, THANK YOU and WELCOME to this year's sale. We look forward to seeing you!

The Dale Barber Family

The Austin-Bergstrom International Airport, in Austin, is the closest large airport; drive time to San Saba is approximately two hours. San Saba has a 4200-foot lighted and paved runway, 5 miles from the auction barn. Phone (325) 372-3380, airnav.com/airport/81R.

LIVESTOCK MORTALITY INSURANCE

Ashleigh Mimms, The Mimms Agency, LLC
(806) 319-4253 • ashleighmimms@hotmail.com

"SIGHT-UNSEEN GUARANTEE"

To make buying easy, we offer a sight-unseen guarantee. Leave a bid...buy over the phone...buy through Superior. If they don't meet your approval, they come home. It's that simple.

Cattle will sell in catalog lot order, with the exception that the Angus bulls will sell before the Hereford heifers.

Please join us for a pre-sale social and dinner at 6 p.m., Tuesday, November 13th, at the Mill Pond Park Center, 1190 S. Thomas Stewart Drive, San Saba, TX.

The sale cattle will be at Jordan Cattle Auction beginning Monday, November 12th. To view the cattle prior to Sunday, November 11th, please feel free to stop by or contact either of the ranches.

• • • • •

Barber Ranch reserves the right to collect, freeze and use semen within their own herd on any Hereford bull sold in this sale. Semen collection would be done at Barber Ranch's expense and the buyer's convenience.

• • • • •

Barber Ranch reserves all cloning rights on Lots 1-130.

ABSENTEE BIDDERS: HOW TO PARTICIPATE ON THE PHONE OR ONLINE

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for buyers unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at: www.superiorlivestock.com.

Here's How It Works...

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number." Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information, Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Turn in Bids Over the Internet through Click-To-Bid. This is Superior's online bidding program! *Please note that high speed internet is required—this is not for satellite internet or dial-up internet.* Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy; just go to the home page of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward, you just have to sign in and select the sale you would like to register for and, once approved by the ranch, you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. Sale will be broadcast via satellite on Dish Channel 232 and DIRECTV Channel 603. *Please note that there is a short delay if you are watching the auction on television, so be sure to call in a couple lots ahead of the lot you are interested in bidding on.* The sale will also be broadcast live on the internet at www.superiorclicktobid.com—just go to the home page and select the auction. Remember, you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid." Your computer must have Flash Media Player installed to view the auction. For assistance, call Superior at (800) 431-4452.

Bidders who are successful in making purchases will be contacted by the ranch after the sale to settle payment and make shipping arrangements.

SALE TERMS & CONDITIONS

TERMS: Cash or check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

HEALTH: The health of the cattle selling is excellent. Each animal will be accompanied by an individual health certificate for immediate interstate shipment.

GUARANTEE: Each registered animal will sell under the Suggested Terms and Conditions of its respective breed registry, either the American Hereford Association or the American Angus Association.

BREEDING GUARANTEE: Bulls sold in this sale are fertility tested and are guaranteed by the owners to be breeders, provided they are properly handled and cared for by the purchaser. Any bull failing to breed after a trial of six months may be returned to the seller *if in good condition*. The seller reserves the right to try said bull for six months, and if it proves a breeder to return him to the buyer at buyer's expense. If the bull proves a non-breeder, the bull will be replaced, or credit will be issued for the next year's sale at the purchase price minus salvage value of the bull. Seller is not liable for bulls lost due to injury or death.

ANNOUNCEMENTS: Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

LIABILITY: All persons who attend the sale do so at their own risk. Neither the owners, Jordan Cattle Auction nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

USING EPDs IN YOUR PROGRAM

Using EPDs as Selection Tools

Cattle Evaluations use the term Expected Progeny Difference (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait, relative to other sires in the analysis. The key word is "difference." The EPD itself does not imply "good" or "bad" performance; rather, the EPD gives a prediction of the average "difference" to expect in the performance of a sire's progeny relative to other sires in the same analysis.

The EPD for a given trait on each animal in the analysis is compared to every other animal in the analysis. The EPD is reported as a plus or minus value in the unit which the trait is measured. EPD accuracies on non-parent animals are relatively low and are not reported in this catalog. The American Hereford Association (AHA) measures 17 traits and calculates three profit (\$) indexes. A comprehensive sort of Hereford sires can also be done online at www.hereford.org.

Important: No across-breed EPD comparisons can be made.

Hereford EPDs and \$ Indexes included in our sale catalog are:

Calving Ease Direct (CED) Based on calving ease scores and birth weights and measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight EPD (BW) An indicator trait for calving ease, measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty

Weaning Weight EPD (WW) An estimate of pre-weaning growth, measured in pounds.

Yearling Weight EPD (YW) An estimate of post-weaning growth, measured in pounds

Scrotal Circumference EPD (SC) Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty.

Maternal Milk EPD (Milk) The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth EPD (M&G) Reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. It is equal to one-half the sire's weaning weight EPD, plus all of his Milk EPD.

Calving Ease Maternal (CEM) Predicts how easily a sire's daughters will calve at two years of age and measured on a percentage. For example, if sire A has a CEM EPD of 7 and sire B has a CEM EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

Carcass EPDs

Carcass records are adjusted to an age constant endpoint. Therefore, selection based on any or all of the carcass merit EPD is comparable among cattle at the same age endpoint. For example, selection based on increased EPD for carcass weight will result in heavier carcass weights than those animals with lower EPD for carcass weights when the cattle are harvested at the same age.

Carcass Weight EPD (CW) Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight.

Ribeye Area EPD (REA) REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscl'd and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly

BREED AVERAGE EPDs

Hereford EPD Averages for 2016 & 2017 Calves as of 10/15/18:

CED	BW	WW	YW	SC	Milk	M&G	CEM	CW	REA	Marb	BMI\$	BIIS	CHBS
+1.9	+3.1	+51	+83	+0.9	+24	+49	+2.0	+64	+37	+11	+317	+383	+101

correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling Score (Marb) Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat (IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marb EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

\$Profit Indexes

Baldy Maternal Index (BMI\$) The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS) The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk, which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers who use Hereford bulls on Brahman-influenced cows.

Certified Hereford Beef Index (CHBS) The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well, there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Ribeye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

EPDs are updated weekly by the American Hereford Association, so we cannot guarantee the EPDs listed in the catalog. The Hereford EPDs printed are from the 10/15/18 evaluation of the AHA. View up-to-date EPDs at www.hereford.org.

Genomic-Enhanced EPDs The accuracy of breeding values in young cattle is enhanced with DNA testing. EPDs that were genomically enhanced at catalog press time are indicated by this symbol.

Actual birth weight is included in addition to adjusted 205-day weaning weight and adjusted 365-day yearling weight. Note that several of the ET calves were produced through in-vitro fertilization (IVF), resulting in heavier birth weight because of the medium used in the IVF process.

Each animal tested is recognized with the AHA GE-EPD logo.

Buying animals that have a genomic profile incorporated into their EPDs offers many advantages that allow for quicker breed and herd improvement. The proof gained on young, non-parent animals through a genomic enhancement is valuable and allows for more directed selection.

7-yr. Weaning Weight	0.11	3
8-yr. Weaning Weight	0.08	2
9-yr. Weaning Weight	0.07	2
10-yr. Weaning Weight	0.10	3

*Effective Progeny Number Increase (EPNI)- EPNI is the difference gained by genotyped animals versus non-genotyped animals.

ADVANTAGE PROGRAM

PROGRAM BENEFITS:

- ✓ EPD ranking summary
- ✓ Added market exposure
- ✓ Genetic improvement tool
- ✓ Access to AHA resources
- ✓ Get started at HerefordFeederCattle.com

On a production system where Hereford bulls are used on Angus-based cows, to qualify for the Hereford Advantage program, cattle must be sired by a Hereford bull battery that must have a CHB\$ value ranking in the top 50%.

✓ Sons and daughters of this Copper x 8130 son continue to impact herds across the country.

✓ Hereford Trait Leader for WW, YW, M&G, CW, REA, BI and CHB.

✓ Owned with Burns Farms and Copeland & Sons.

Hereford Bulls

...Lots 1-111

**BARBER RANCH BULLS
+ YOUR COWS
= SUCCESS!**

- ✓ Several groups of full and half brothers sell in San Saba November 14th that will allow you to increase the quality and uniformity of your calf crops.
- ✓ Our bulls are backed by generation after generation of herd building females and nearly 50 years of artificial insemination to produce cattle at the top of the beef industry—both genetically and phenotypically.
- ✓ A number of top registered breeders have selected herd sires from our San Saba bull sale offerings that have gone on to sire competitive calves for them and their customers, including many reputable cattlemen.
- ✓ Sneed Pool Cattle Co. topped the market for Hereford calves in Superior Livestock's July "Week in the Rockies" auction with calves sired by Barber Ranch bulls. We were happy to assist this volume customer in getting top dollar for their calves.
- ✓ Barber Ranch bulls add *MORE* look along with *MORE* performance, *MORE* muscle, *MORE* bone and *MORE* body.

Please join us for a pre-sale social and dinner at 6 p.m., Tuesday, November 13th, at the Mill Pond Park Center, 1190 S. Thomas Stewart Drive, San Saba, TX.

HEREFORD BULL

Cattle will sell in catalog lot order, with the exception that the Angus bulls will sell before the Hereford heifers.

- ✓ BW 70 lbs. Adj. WW 744 lbs. Adj. YW 1241 lbs. Act. SC 36 cm.
- ✓ 4030 sired the top seller in our 2017 bull sale. His daughters are in a league of their own with outstanding femininity and udder quality—they were very popular at our May cow sale.
- ✓ This bull has been a standout since birth. His maternal brother was the cover bull for our 2017 bull sale catalog.

{ All Hereford bulls and females in the sale have been DNA parent verified and tested DLF, HYF and IEF. }

Actual scrotal circumference measurement taken 10/19/18 is reported on the Hereford bulls.

HEREFORD BULL

Lot 1

Lot 1 is our 2018 cover bull and is also a maternal brother to our 2017 cover bull, pictured here.

HOW MUCH CAN YOU AFFORD TO PAY FOR A TOP BULL?

COWMAN FORMULA

Increase in pounds per calf from a top performance bull
 × No. of cows bred to him per year
 × No. of years to keep the bull
 × Expected selling price of calves
 = Additional dollars you can pay for a better bull

Example: A bull that will add 30 lbs. over industry average to the weaning weight of his calves mated to 25 cows per year for 4 years and you sell the calves for \$2.00 per pound, at current market prices.

30 lbs. × 25 cows = 750 lbs. × 4 years = 3000 lbs. × \$2.00 = \$6,000

This bull is worth \$6,000 more than the average bull that will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.

- ✓ BW 70 lbs. Adj. WW 737 lbs. Adj. YW 1139 lbs. Act. SC 33 cm.
- ✓ Ranks in top 10% of the breed for BW.
- ✓ Sired by a full brother to donor cow Belle and out of one of the most dependable cows we have had. 3033 was 15 when we had our cow sale in May and amazed everyone with her youthful appearance. We used her sire, Carter 183J, for over a decade on first-calf heifers. This bull looks just like 183J—plus he has double red eyes.
- ✓ Genomics indicate 7194 should be safe to breed to first-calf heifers.

- ✓ Ranks in top 2% of the breed for CED, BW; top 3% for Marbling; top 10% for CW, CHB.
- ✓ Bred to breed to first-calf heifers. His sire, Distinction, is a Hereford breed leader for 13 traits, including Calving Ease, Birth Weight and Marbling. Dam is a very moderate framed Tank/Ribeye granddaughter.

Spring-Calving Bred

HEIFERS WILL SELL FOLLOWING THE ANGUS BULLS.

Heifers should be the most current, progressive genetics in a herd. Calves out of first-calf heifers can be spectacular—four of our Denver Grand Champions were heifers' first calves.

Lots 120–130 sell bred to the calving-ease Hereford bulls listed on page 53. The heifers were pasture exposed from 5/12/18 through 7/12/18 and have been confirmed pregnant. DNA testing will be necessary to determine the sire to register calves.

Angus GE-EPDs and Genomic Trait Tests

The Angus bulls selling have Genomic Enhanced Expected Progeny Differences. GE-EPDs are the best estimate of an animal's genetic worth as a parent. These values make use of known pedigree, performance and genomic information about an animal, its progeny and other relatives. Adding a genomic test to EPDs: Enhances predictability of current selection tools; Increases EPD accuracy on young animals; Characterizes genetics for traits where it's difficult to measure the animal's own performance (e.g., carcass traits in breeding stock or maternal traits in bulls); Allows EPDs to be calculated for animals that may have had blank boxes previously (e.g., single animal contemporary groups or those without an EPD for a specific trait).

Genomic trait tests: Are used as indicator traits to compute EPDs (genetic correlations between the genomic tests and American Angus Association's phenotypic database effectively range from .60 to .70, except for milk and heifer pregnancy); Provide similar amount of accuracy as if unproven animals already have 8 to 20 progeny recorded; and include a genomic percent rank (1 to 100) for each trait. Though percent ranks are provided with the purchase of a genomic test, GE-EPDs are the selection tool of choice because they account for all sources of information (pedigree, performance and genomics). For more information, please visit www.angus.org

THE BULLS IN THIS SALE QUALIFY FOR SUPERIOR PROGRESSIVE GENETICS

Superior Progressive Genetics (SPG) is a Value Added Program launched by Superior Livestock Auction to create a premium for commercial cattlemen when they sell calves on Superior by identifying load lots of cattle sired exclusively by bulls purchased directly from qualified seed stock producers. SPG brings attention to the investment commercial cattlemen have made by doing business with leading seed stock producers. Barber Ranch or Express Ranches and their bull buying customers will be recognized by branding the SPG icon and the Barber Ranch or Express Ranches logo on qualified load lots as the cattle sell on Superior's video sales live on television and the internet. In addition to the qualified lots being identified on television, the lots will also be branded as "SPG" in Superior Livestock Auction's print and web sale catalogs.

Additional Benefits to Commercial Cattlemen Selling on Superior:

- ✓ Doing business with a reputable company who has your best interest in mind.
- ✓ Superior ties the commercial and purebred cattle industry together full circle.
- ✓ Largest cattle auction in North America along with the largest active buyer list.
- ✓ Can sell on contract to take advantage of current market conditions and deliver at a later date.
- ✓ Established premiums for cattle on good health programs.
- ✓ Established premiums for many Value Added Programs.
- ✓ Cattle are sold "country fresh" direct from the ranch, resulting in less stress.
- ✓ Seller determines weighing conditions.
- ✓ Seller does not have the expense of trucking.
- ✓ Payment is guaranteed to sellers through Superior's bonded custodial account.
