

Flying S Herefords

5th Annual
**LINE ONE
PRODUCTION SALE**

Tuesday, March 19, 2019

12 noon at the Ranch near Paluxy, Texas

Welcome to Flying S Herefords!

We would like to invite you to join us for our Fifth Annual Production Sale here at the ranch. Flying S Herefords Ranch is located in Paluxy, Texas, southwest of Fort Worth. **Our mission is to produce elite Line One Horned Herefords that will excel in any environment for any type of operation.** Over the past years we have invested in the top bloodlines of the finest Line One Herefords in America from Holden Herefords and Cooper Herefords. Our focus is on every aspect of the Hereford breed. We believe in a long-lasting performance Line One breeding program to increase the predictability of our cattle for our customers, whether commercial or seedstock.

In order to succeed in Line One breeding, you must continue to introduce cattle with superior genetics. Flying S Herefords focuses heavily on the maternal abilities in our breeding program. We have a strict culling program that enables us to produce and retain only the genetically superior animals. Cows are culled based on fertility, performance, soundness, disposition and udder quality. We are active members in the Texas Hereford Association along with the American Hereford Association and are involved with the TPR program of the American Hereford Association and active members in the Whole Herd Reporting Program.

It is a great pleasure to be able to offer such an exceptional set of bulls and females. This group of bulls represents the best of our fall 2017 and spring 2018 calf crops. They are all sired by top trait leading, high quality Line One bulls. They are a balanced trait set of bulls that combine phenotype, uniformity, pigment, maternal strength, thickness, performance, fleshing ability, carcass and eye appeal. All bulls and heifers sell with performance and ultrasound data and have been DNA parentage verified, GE-EPD tested and have been tested IE Free, HY Free and Dilutor Free. All bulls have been trich and semen tested.

All sale cattle and our cow herd will be on display March 18th and 19th up to sale time. On Monday, the 18th, we will have drinks and snacks available along with cow herd tours in the afternoon. On sale day, snacks and lunch will be provided, catered by Hard Eight BBQ. Lunch will be served at 11:00 a.m., and the sale starts promptly at 12:00 noon.

Thank you for taking the time and having an interest in our program. We look forward to seeing y'all. If you have any questions or if we can be of any help, please feel free to call us anytime.

Watch and bid live on Superior!

Phone 800.431.4452

Register to bid online or over the phone at www.superiorlivestock.com

Join us for lunch at 11 a.m.

Catered by Hard Eight BBQ

Announcements made sale day from the auction block will take precedence over statements printed in the sale catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time. All persons who attend the sale do so at their own risk. Neither the owners, the management, nor any other person connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

Stand out with Proven Genetics

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for CHBS index.

PROGRAM BENEFITS:

- ✓ EPD ranking summary
- ✓ Added market exposure
- ✓ Genetic improvement tool
- ✓ Access to AHA resources
- ✓ Get started at HerefordFeederCattle.com

Certified Hereford Beef Index (CHBS) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a CHBS value ranking in the top 50%.

2125Z is an outstanding bull that really brings it all together. He is goggle eyed and heavily pigmented, long bodied and deep sided with great muscle expression. He is very sound made and has lots of eye appeal. He has a great set of EPDs and had an 80 lb. actual birth weight. His dam is a perfect uddered young cow with goggle eyes, and his granddam is the 4016P cow that sold for \$37,500 in Holden's 2010 Cow Sale. His great-granddam is the great 0023K cow that was a superior donor for Holden.

7193E was the cover bull and leadoff bull in Holden's 2018 sale. He is an exciting son of the \$130,000 5110C Cooper bull. The more you study this bull, the more you will like him. He is soft made, deep flanked, big bellied, extra thick, well marked and very correct in his structure. Three different maternal brothers were used in Holden's herd last year, and a son out of a maternal sister was retained this year. We think a lot of this cow family and all the functional traits it brings to the table. 7193E also brings in the great 055X cow from Cooper's. He is a front pasture, all around herd sire that is destined to be a breed improver.

7202E is a powerful 12491 son that has the herd bull look and is well marked and deep ribbed. He is out of a daughter of the 1056Y cow that was the top cow in Holden's herd on Teat and Udder EPDs and is also the dam of Holden's high selling bull in 2018. His pedigree is loaded with carcass and maternal strength and has extra calving ease as a bonus. 7202E is a great all around breeding bull that combines phenotype, cow family and balanced EPDs.

• Owned with Holden Herefords

Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 15 traits and calculates four profit (\$) indexes.

The eight EPDs and the \$Index included in our 2018 sale catalog are:

Calving Ease Direct (CED)

CED EPD is based on calving ease scores and birth weights and is measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of +3.6 and sire B has a BW EPD of +0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lbs. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of +60 and sire B has a WW EPD of +40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lbs. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of +100 and sire B has a YW EPD of +70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lbs. heavier at a year of age when compared to sire B's calves.

Maternal Milk (Milk)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 Milk EPD should produce progeny with 205-day weights averaging 24 lbs. more (as a result of greater milk production) than daughters of a bull with a Milk EPD of -10 lbs. (14 minus -10.0 = 24 lbs.). This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth (M&G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a +29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lbs. heavier than progeny of a bull's daughters with a M&G EPD of 10 lbs. (29 minus 10 = 19 lbs.). It is equal to one-half the sire's weaning weight EPD plus all of his Milk EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (Marb)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, or IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Certified Hereford Beef Index (CHBS)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CED and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF, with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest, where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to back-grounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

7065E is a top herd bull prospect that will add some pounds to your calf crops. He is thick made, deep sided, big topped, clean fronted, pigmented and big hipped. Sired by 3006A, he is the right kind to sire low birth weight calves that hit the ground growing. His dam is a perfect uddered 8050U daughter that has produced some outstanding bulls; a top son sold last year to Cross J Ranch and is doing a terrific job for them.

HH Advance 5107C was the high selling bull in Holden's 2016 sale for \$160,000 and is a maternal brother to the HH Advance 3297A herd bull. 5107C is built right from the ground up and is very conservatively marked. He sires calves that are big topped, square made, sound structured, big ribbed and phenotypically some of the best cattle we have produced. He is a powerful 215Z son that has an outstanding EPD profile combined with a flawless phenotype and is backed by the HH Miss Advance 9228W donor cow, who is a herd bull producing machine.

Selling 100 units of semen in lots of 5 with the option to roll. 5107 semen is only available for purchase at auction. Semen is stored at ORigen, Huntley, MT, 866.867.4436. Buyer is responsible for cost of shipping.

An outstanding proven powerhouse Dam of Distinction donor female with lots of pigment, thickness down her top, rib shape, eye appeal and a great udder. She is phenotypically correct in every way and has a record to prove it. 0232X's dam sold for \$37,500 in Holden's 2010 Female Sale and had four sons sell in Holden's 2016 production sale that averaged \$15,625. One of those sons, HH Advance 5148C, whom we also used in our ET and AI program this past fall, has produced some outstanding bulls and females for Holden. 0232X has averaged 11 transferrable embryos on the last three conventional flushes.

- Top 10% Scrotal and top 15% CED and M&G EPDs
- Top 20% YW, Milk and Teat and top 25% WW EPDs
- Has average progeny ratios on 5 calves of 103 NR, 104.2 YR; on 12 calves 100.9 REA, 105.9 IMF
- Bred AI Nov. 25, 2018 to HH Advance 5107C.
PE Nov. 30, 2018 to Feb. 4, 2019 to HH Advance 6116D.
- Flying S Ranch reserves the right to one future flush at our expense and the new owner's convenience.

Sells in her entirety!

Talk about one that's hard to let go. 301A has been one of my favorites from day one, and she hasn't let me down. She is a powerful, beautiful uddered 1059Y daughter that is a powerhouse female and has an incredible EPD profile. Her daughter 507C produced the 7019E high selling bull in last year's sale. Two sons are working in Oklahoma and Arkansas, and another top son sells as Lot 7084E. Donor quality female right here!

- Top 1% CHB\$
- Top 5% Marb and top 10% Milk and REA EPDs
- Top 15% CED and M&G and top 20% YW, Teat and Udder EPDs
- Top 25% BW EPD
