

A Tradition of Angus Excellence

Annual Bull Sale

129 Bulls Sell - 1 pm - Burrton, KS

MARCH 14, 2019

Dear Angus Friends,

Welcome to our family's 42nd anniversary bull sale!! We are proud to operate our program with a focus on three core values:

KNOWLEDGE EXPERIENCE RELATIONSHIPS

You can count on breed leading genetics in our purebred bulls and females, real-world performance that directly translates into your herd and customer service second to none. We back this with 5 generations of Angus experience and a commitment to bettering the herd for those to come. Bull sale season is here! The time of decision making for the future of your COWHERD, the resulting offspring for 2020 income and beyond. The demand for McCurry Angus Ranch sired calves from our customers is bringing additional \$ through marketing venues such as Superior Livestock and the Gold Buckle/Superior Commercial Female Sale each fall and private treaty referrals.

We strive to produce industry relevant cattle with meaningful balanced traits that can perform for you. These bulls are the result of decades of planned breeding from a cowherd that began with 7 females and very few outside females added in 40+ years...in other words, generations of McCurry bred females.

The M- brand on the hips of these bulls offers you the following:

- HD 50K (DNA) the latest advancement in Angus genotyping technology from Zoetis (replaces i50K and the previous version of HD 50K); offering you the highest degree of confidence in your herd bull decisions
- Current vaccinations including Anaplasma vaccine
- Semen checked; passed a breeding soundness exam
- Freeze branded for easy ID
- KS Dept of AG approved Trichomoniasis Herd Mgmt Plan; no testing required for in-state delivery. Testing provided for out-of-state buyers.
- Free delivery by May 1st. We will deduct \$50 from the purchase price if picked up sale day or the week of the sale.
- Assistance in marketing your McCurry Angus sired calves/females. References provided.

New for 2019: We would like to continue to develop the 2018 spring born bulls for you at our cost through the end of April.

The bulls will be at the ranch the week of the sale. Bulls sell by sire group and in catalog order allowing the opportunity to get sire groups or individuals that fit your criteria with confidence.

Welcome to the sale,

On behalf of the American Angus Hall of Fame it is certainly a pleasure to be working with the McCurry family on this outstanding event.

The McCurry Angus Ranch is dedicated to the Angus business and has a long, rich history of Angus heritage. Andy and Mary McCurry, the founders of McCurry Angus Ranch, have dedicated their lives to be premier Angus breeders and have turned the operation over to their son, John McCurry, his wife Melody and their family. John, a past board member of the Junior Angus Association, has established himself as one of the premier seedstock producers in the country. In 2015 the McCurry Angus Ranch program received the highest honor that any seedstock producer in the United States could receive in being named the 2015 BIF Seedstock Producer of the Year.

This program has excelled in producing cattle with tremendous phenotype, low birth weight genetics that excel at weaning and yearling while maintaining functional carcass genetics. Cattle that have produced these outstanding bulls come from families that have dominated past junior shows and open shows across the country including the North American International Livestock Exposition, the National Western Stock Show, the American Royal and the National Junior Angus Show along with many other state and regional preview shows.

You have the opportunity to acquire some of the very best genetics ever offered in the history of the McCurry Angus Ranch program. Please plan to be with us on March 14, 2019, at 1:00 pm in Burrton, Kansas, for this great event. If you have any questions, please feel free to contact the ranch or the American Angus Hall of Fame at (816) 532-0811.

Sincerely,

Tom Burke

MCCURRY ANGUS RANCH ANNUAL BULL SALE

Selection Tools

Please feel free to contact us if you have any questions regarding the data you find in this catalog.

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

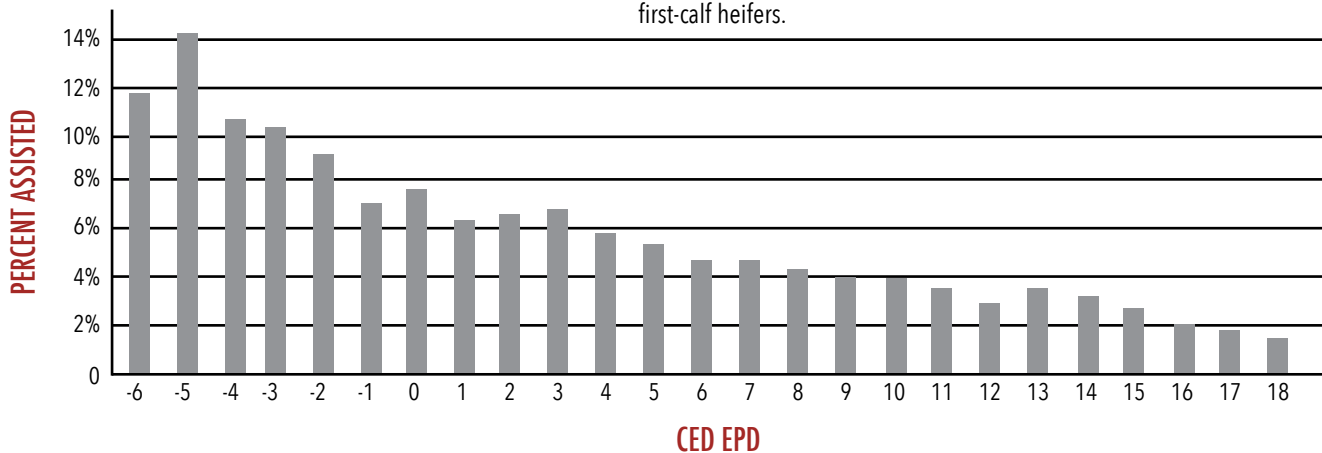

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

INCIDENCE OF CALVING DIFFICULTY

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Charlo

BOHI Abigale 6014 - Dam of Reference Sire

McCurry Charlo 5259 - The \$26,000 son of Coleman Charlo and Full Brother to Lots 59 and 62-65

FOR REFERENCE ONLY

• Coleman Charlo was selected as one of the truly unique and proven sires with the propensity to become one of the most influential sires the Angus breed has ever known. No other sire in history has been identified to combine proven calving-ease with the degree of thickness, fleshing ability, carcass quality and authentic Angus type as Coleman Charlo 0256.

• In addition, Charlo is a high-scrotal, highly fertile sire with superior semen quality and excellent libido. He is a featured member of the Select Sires AI stud and backed by time-tested sire lineage that traces to Basin Rainmaker 654X and the legendary high-maternal Pathfinder sire who is the most impactful sire ever imported to Argentina.

• Charlo's dam is a full sister to the famous Pathfinder, SAV Abigale 8213, and from one of the same families as SAV Bismarck, SAV Mandan, SAV Adaptor and SAV Eliminator.

• His maternal grandam is the high income-producing SAV Abigale 6062 who ranks as the breed's No. 1 Ribeye Area EPD cow of her generation and more than two decades after birth with 94 progeny evaluated by ultrasound.
