

# **BARBER RANCH**

## **Annual Bull Sale**

**WEDNESDAY, NOVEMBER 11, 2020**

**11 a.m. CST**

**Jordan Cattle Auction, San Saba, Texas**

**85 Hereford Bulls *Horned & Polled* | Rare Semen | 40 Express Ranches Angus Bulls**

# Welcome to the sale!

From left: Justin, Terri, Dale,  
Mary, Jason and Brett Barber

Fellow Cattlemen:

While 2020 looked vastly different for many outside of the cattle industry, like all of you, our day to day looked much the same as in years previous with the goal of continuing to produce the best cattle possible. We feel this year's set of bulls can fit many needs of the industry, whether you are breeding commercial heifers, producing Brahman F1 crosses, or flushing purebred cows for your next champion.

This year's offering truly has something for everyone. A lot of discussion was had in setting the catalog order, as everyone in the family—three current generations—has their favorites that appear throughout the catalog. Whether it's calving ease, performance, or carcass that you are seeking, this offering has a bull that meets your needs and more.

As you scan the catalog, you will see the prevalence of calving ease throughout. Forty percent of this year's sale bulls are out of first-calf heifers, but they still maintain the look and performance you have come to expect from Barber Ranch. A quick glance at our reference sire pages gives two great examples of the quality of the sires we sell out of first-calf heifers in Belle Air and Charles Hutton.

We are proud to have the BR prefix appear on the top and bottom of so many of the pedigrees throughout the catalog. We strategically insert outside genetics, and we certainly did that in 2017 with the purchase of the top seller in the Knoll Crest sale, D594. Paul Bennett wrote in his footnotes for the bull, "No other animal in the breed can match his combination of CED, BW, YW, Marb and REA." D594 did just what we were looking for in breeding him to heifers. He has the largest number of sons selling in the sale, with many ranking in the top 10% for multiple growth, carcass and crossbreeding traits while still maintaining calving ease.

**Good looking cattle never go out of style.** Our program has always strived to add more look along with more muscle, deeper rib, stouter bone and more all-around performance. Udder quality, calving ease, carcass traits and pigment have moved to the forefront in today's breeding choices.

Our bulls are developed in large, mostly native grass pastures with limited supplemental feed. They are lot numbered in sale order. There are many potential herd sire prospects all through the sale order—they can't all be Lot 1.

This sale offers you second-to-none, one-stop shopping, as we are again honored to offer Angus bulls from Express Ranches, the nation's largest seedstock producer. Nationally known for sound, fertile, problem-free cattle, Express Ranches offers proven, performance-based genetics with exceptional customer service that has set the standard of excellence for the Angus breed.

We encourage you to invest with confidence, knowing that ***your purchases are backed by 100% satisfaction guaranteed.*** With the opportunity to buy from two of the most prominent US breeding programs in one place, there is not a better time to strengthen your herd. Selecting high performing, efficient bulls to sire your next calf crop is an important economic decision that YOU can control.

Come early and enjoy Texas Hill Country hospitality Tuesday evening before the sale. To our past and future customers, partners and all the families and ranch hands who make this possible, **THANK YOU** and **WELCOME** to this year's sale. We look forward to seeing you in San Saba!

**The Dale Barber Family**

## AIR TRANSPORTATION

The Austin-Bergstrom International Airport, in Austin, is the closest large airport; drive time to San Saba is approximately two hours. San Saba has a 4200-foot lighted and paved runway, 5 miles from the auction barn. Phone (325) 372-3380, [airnav.com/airport/81R](http://airnav.com/airport/81R).

## "SIGHT-UNSEEN GUARANTEE"

To make buying easy, we offer a sight-unseen guarantee. Leave a bid...buy over the phone...buy through Superior. If they don't meet your approval, they come home. It's that simple.

**All bulls will sell in catalog lot order.**

*View the videos online: [barberranch.com](http://barberranch.com)*

## SALE TERMS & CONDITIONS

**TERMS:** Cash or check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

**HEALTH:** The health of the cattle selling is excellent. Each animal will be accompanied by an individual health certificate for immediate interstate shipment. **Note:** If bulls should go to a state that requires additional testing, bulls will be delivered to the new owner after testing is completed.

**GUARANTEE:** Each registered animal will sell under the Suggested Terms and Conditions of its respective breed registry, either the American Hereford Association or the American Angus Association.

**BREEDING GUARANTEE:** Bulls sold in this sale are fertility tested and are guaranteed by the owners to be breeders, provided they are properly handled and cared for by the purchaser. Any bull failing to breed after a trial of six months may be returned to the seller **if in good condition**. The seller reserves the right to try said bull for six months, and if it proves a breeder to return him to the buyer at buyer's expense. If the bull proves a non-breeder, the bull will be replaced, or credit will be issued for the next year's sale at the purchase price minus salvage value of the bull. Seller is not liable for bulls lost due to injury or death.

**ANNOUNCEMENTS:** Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

**LIABILITY:** All persons who attend the sale do so at their own risk. Neither the owners, Jordan Cattle Auction nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property.

**All sale bulls will be at Jordan Cattle Auction at San Saba beginning Tuesday, November 10th.**

**Prior to Tuesday, you are invited to stop by either of the ranches to take a look.**

• • • • •

**Barber Ranch reserves the right to collect, freeze and use semen within their own herd on any Hereford bull sold in this sale.**

**Semen collection would be done at Barber Ranch's expense and the buyer's convenience.**

• • • • •

**Barber Ranch reserves all cloning rights on Lots 1-85.**

# BARBER RANCH BULLS

- ✓ **Powerful**
- ✓ **Docile**
- ✓ **Efficient**
- ✓ **Fertile**
- ✓ **Backed by over a century of genetic progress**

*Offering Powerful Herd Bull Prospects from Industry Leading Matings with Breed Leading Genomic-Enhanced EPDs as well as outstanding bulls for the Commercial Cattleman!*

**Breed defining sires are offered annually in our bull sale, and 2020 is no exception.**

**Both new and repeat buyers continue to select their herd leaders from Barber Ranch.**

**This sale includes service-age bulls ready to work as well as yearling bulls geared for you to develop and adjust to your environment.**

**Be with us Wednesday, November 11th in San Saba or on [superiorlivestock.com](http://superiorlivestock.com) and see how**

***Barber Ranch genetics can elevate your next calf crop to premium levels!***

## *Barber Ranch Customer Success!*

*Congratulations to JM Cattle Company, Lawrenceburg, Tenn.! Jeremiah Malone selected BR Hutton 6014 from our 2017 Bull Sale and produced the Grand Champion Purebred Female and the Reserve Grand Champion Percentage Female of the 2020 American Royal Black Hereford Show in Kansas City. 6014 was out of a first-calf heifer.*

*BR Hutton 6014  
Sold as Lot 44 in the 2017 Bull Sale.*

*This fancy, high performing four-month-old tiger stripe F1 heifer was produced in Tipp's Brahman cow herd and sired by a Barber Ranch bull selected in our annual sale. Randall Tipp has been a Barber Ranch customer for many years.*

## Using EPDs as Selection Tools

Cattle Evaluations use the term Expected Progeny Difference (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait, relative to other sires in the analysis. The key word is "difference." The EPD itself does not imply "good" or "bad" performance; rather, the EPD gives a prediction of the average "difference" to expect in the performance of a sire's progeny relative to other sires in the same analysis.

The EPD for a given trait on each animal in the analysis is compared to every other animal in the analysis. The EPD is reported as a plus or minus value in the unit which the trait is measured. EPD accuracies on non-parent animals are relatively low and are not reported in this catalog. The American Hereford Association (AHA) measures 17 traits and calculates three profit (\$) indexes. A comprehensive sort of Hereford sires can also be done online at [www.hereford.org](http://www.hereford.org).

**Important: No across-breed EPD comparisons can be made.**

Hereford EPDs and \$ Indexes included in our sale catalog are:

**Calving Ease Direct (CED)** Based on calving ease scores and birth weights and measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

**Birth Weight EPD (BW)** An indicator trait for calving ease, measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

**Weaning Weight EPD (WW)** An estimate of pre-weaning growth, measured in pounds.

**Yearling Weight EPD (YW)** An estimate of post-weaning growth, measured in pounds.

**Scrotal Circumference EPD (SC)** Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty.

**Maternal Milk EPD (Milk)** The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. This difference in weaning weight is due to total milk production during the entire lactation.

**Maternal Milk & Growth EPD (M&G)** Reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. It is equal to one-half the sire's weaning weight EPD, plus all of his Milk EPD.

**Calving Ease Maternal (CEM)** Predicts how easily a sire's daughters will calve at two years of age and measured on a percentage. For example, if sire A has a CEM EPD of 7 and sire B has a CEM EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

### Carcass EPDs

Carcass records are adjusted to an age constant endpoint. Therefore, selection based on any or all of the carcass merit EPD is comparable among cattle at the same age endpoint. For example, selection based on increased EPD for carcass weight will result in heavier carcass weights than those animals with lower EPD for carcass weights when the cattle are harvested at the same age.

**Carcass Weight EPD (CW)** Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight.

**Ribeye Area EPD (REA)** REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also

## Hereford EPD Averages for 2018/2019 born calves as of 10/19/20:

| CED  | BW   | WW  | YW  | SC   | Milk | M&G | CEM  | CW  | Fat   | REA | Marb | BMI\$ | BI\$ | CHB\$ |
|------|------|-----|-----|------|------|-----|------|-----|-------|-----|------|-------|------|-------|
| +2.4 | +2.9 | +52 | +84 | +0.9 | +24  | +50 | +1.8 | +65 | +0.11 | +37 | +0.9 | +338  | +405 | +101  |

incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

**Marbling Score (Marb)** Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat (IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marb EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

### \$Profit Indexes

**Baldy Maternal Index (BMI\$)** The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

**Brahman Influence Index (BI\$)** The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk, which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers who use Hereford bulls on Brahman-influenced cows.

**Certified Hereford Beef Index (CHB\$)** The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well, there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Ribeye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

*EPDs are updated weekly by the American Hereford Association, so we cannot guarantee the EPDs listed in the catalog. The Hereford EPDs printed are from the 10/5/20 evaluation of the AHA. View up-to-date EPDs at [www.hereford.org](http://www.hereford.org).*

**Genomic-Enhanced EPDs** The accuracy of breeding values in young cattle is enhanced with DNA testing. EPDs that were genomically enhanced at catalog press time are indicated by this symbol.

**Actual birth weight is included in addition to adjusted 205-day weaning weight and adjusted 365-day yearling weight. Note that several of the ET calves were produced through in-vitro fertilization (IVF), resulting in heavier birth weight because of the medium used in the IVF process.**

**Pigmentation for Left Eye, Right Eye and Scrotal are also included.**

**Actual scrotal circumference measurements will be available sale day.**

Each animal tested is recognized with the AHA GE-EPD logo.

| AHA Trait             | Accuracy Improvement | Effective Progeny Number Increase* |
|-----------------------|----------------------|------------------------------------|
| Calving Ease          | 0.09                 | 17                                 |

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

## REQUIREMENTS

- **Source & Age verification**
- **Genetic merit**
  - Minimum of 50% Hereford genetics
  - Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
  - Bull ownership transferred (all bulls)
- **Vaccination program – two rounds of vaccinations pre-weaning (minimum)**
  - *Recommended minimum protocol:*

**PrimeVAC™ 34**  
PREMIUM  
BY MERCK ANIMAL HEALTH

- **BQA certification**

## BENEFITS

- **Genetic improvement tool**
  - **Sire EPD and profit index summary**
- **Added market exposure**
  - **Free listing at [HerefordMarketplace.com](http://HerefordMarketplace.com)**
- **Enrollment cost - \$3.00/hd.**  
**(verification + eID tag)**

Look for this logo in Hereford bull sale catalogs to identify sires meeting the genetic requirements for the Hereford Advantage program.

- ✓ This herd sire is an example of the quality that is offered throughout our sales. Out of a first-calf heifer, he sold mid-sale, sight unseen in our 2017 sale and has developed into an awesome sire for Barber Ranch and partner R&R Cattle Company.
- ✓ Four sons sell.

- ✓ BR GKB Sensation G015 ET is one of the most exciting herd sire prospects that we have raised. He has the look, the structure and the power that we strive to generate. He is also big footed, deep bodied and really long spined and necked with great hair. His genomically enhanced EPD profile really fits what we're trying to accomplish, including a birth to yearling spread of 2.9 to 101.
- ✓ G015 is sired by the extremely popular 2296 and out of BR Anastasia 3023 ET. 2296 has sired as many national champions as any bull in the past few years, and Anastasia was arguably our most popular show heifer of the last decade who has now become a top producer as well. Besides winning many national shows, including Denver, she has also already raised multiple national champion females.
- ✓ Barber Ranch has always focused more on breeding cattle to improve the quality of our cow herd and the bulls that go into our bull sales than we have on breeding cattle for the show ring. The show ring has always been a by-product of us showing our best breeding cattle. However, what makes this bull so unique is that he's bred every bit as much for the show ring as he is for improving our cow herd and the bulls that will ultimately be offered in our sales.
- ✓ Co-owned with GKB Cattle.

The Angus bulls selling have Genomic Enhanced Expected Progeny Differences. EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide: increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs; better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency); the ability to make more rapid progress for traits that are important to you, due to more accurate selection, easier identification of genetic outliers and the ability to propagate young animals with confidence earlier in their lives. In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8 to 33 calves, depending on the trait. That's valuable insight, offered regularly through the Angus breed's weekly national cattle evaluation at [www.angus.org](http://www.angus.org).

**Calving Ease Direct (CED)** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Dry Matter Intake (DMI)**, expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the postweaning phase, compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**Claw Set EPD (Claw)** is expressed in units of claw-set score, with a lower EPD being more favorable, indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

**Foot Angle EPD (Angle)** is expressed in units of foot-angle score, with a lower EPD being more favorable, indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

**Heifer Pregnancy (HP)** is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)** is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Carcass Weight EPD (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)** is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**\$Value Indexes** An economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences from conception to weaning, with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk and mature cow weight.

**Feedlot Value (\$F)**, an index expressed in dollars per head to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and feed efficiency.

**Grid Value (\$G)**, an index expressed in dollars per carcass to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area and fat.

**Beef Value (\$B)**, a terminal index expressed in dollars per carcass to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry matter intake, marbling, carcass weight, ribeye area and fat.

**Combined Value (\$C)**, expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. EPDs directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (Doc), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

## Certified Angus Beef Targeting the Brand

The Certified Angus Beef Targeting the Brand logo identifies bulls with genetic predictions focused on carcass quality. The logo requirements are met when genetic predictions are breed average or higher for two key metrics: Marbling EPD and Grid Value (\$G). **Qualifying animals (as of Fall 2020) have a Marbling EPD of at least +.65 and \$G of at least +55.** These values represent the Angus breed average for non-parent bulls, which is utilized regardless of sex and age. Realize that carcass traits need to be balanced with maternal traits and other economically important traits vital for progressive, profitable operations.

## **ABSENTEE BIDDERS: HOW TO PARTICIPATE ON THE PHONE OR ONLINE**

*We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for buyers unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at: [www.superiorlivestock.com](http://www.superiorlivestock.com).*

### ***Here's How It Works...***

**Turn in Bids Over the Phone.** This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started, simply go online to [www.superiorlivestock.com](http://www.superiorlivestock.com) and click on the tab titled "Register for a Buyer Number." Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information, Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

**Click-To-Bid.** This is Superior's online bidding program for cattle buying. *Please note that high speed internet is required—this is not for dial-up or satellite internet.* Registration is free, but you must become a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to sign up. Becoming a member is easy; just go to the home page of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward, you just have to sign in and select the sale you would like to register for and, once approved by the ranch, you will receive an e-mail confirming which sale you are now registered for.

**Viewing the Auction.** Sale will be broadcast via satellite on Dish Network channel 997. *Please note that there is a short delay if you are watching the auction on television, so be sure to call in a couple lots ahead of the lot you are interested in bidding on.* The sale will also be broadcast live on the internet at both [www.superiorlivestock.com](http://www.superiorlivestock.com) and [www.superiorclicktobid.com](http://www.superiorclicktobid.com). The video feed on the homepage of [www.superiorlivestock.com](http://www.superiorlivestock.com) looks the same as the video feed on TV and can be watched over a smartphone or tablet. Remember, you can call in to bid whether watching on the TV or on the internet, but you must be a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to "click-to-bid."

**Buyers will be contacted by the ranch after the sale for payment and delivery details.**

**IF YOU NEED ANY ASSISTANCE, CALL SUPERIOR: (800) 422-2117**

*Contact these Superior Livestock representatives to buy bulls or to sell calves sired by bulls purchased in this sale:*

Will Durrett, Wildorado, TX  
(806) 433-6601

Carson Womble, Spearman, TX  
(806) 330-1141

Ty de Cordova, Groesbeck, TX  
(903) 390-6183

Mike Arnold, Columbus, TX  
(979) 732-7679

Will Yeager  
(979) 219-0483

## **ALL BULLS IN THIS SALE QUALIFY FOR SUPERIOR PROGRESSIVE GENETICS**

Superior Progressive Genetics (SPG) is a Value Added Program launched by Superior Livestock Auction to create a premium for commercial cattlemen when they sell calves on Superior by identifying load lots of cattle sired exclusively by bulls purchased directly from qualified seed stock producers. SPG brings attention to the investment commercial cattlemen have made by doing business with leading seed stock producers. Barber Ranch or Express Ranches and their bull buying customers will be recognized by branding the SPG icon and the Barber Ranch or Express Ranches logo on qualified load lots as the cattle sell on Superior's video sales live on television and the internet. In addition to the qualified lots being identified on television, the lots will also be branded as "SPG" in Superior Livestock Auction's print and web sale catalogs.

### **Additional Benefits to Commercial Cattlemen Selling on Superior:**

- ✓ Doing business with a reputable company who has your best interest in mind.
- ✓ Superior ties the commercial and purebred cattle industry together full circle.
- ✓ Largest cattle auction in North America along with the largest active buyer list.
- ✓ Can sell on contract to take advantage of current market conditions and deliver at a later date.
- ✓ Established premiums for cattle on good health programs.
- ✓ Established premiums for many Value Added Programs.
- ✓ Cattle are sold "country fresh" direct from the ranch, resulting in less stress.
- ✓ Seller determines weighing conditions.
- ✓ Seller does not have the expense of trucking.
- ✓ Payment is guaranteed to sellers through Superior's bonded custodial account.

**For more information, contact Superior at (800) 422-2117**
