Profit Proven

Gardiner Influenced Commercial Angus Replacement Female Sale

The Profit Proven group represents generations of family owned ranching operations and generations of Gardiner Angus Ranch genetics. The Profit Proven members were early adopters of EPDs, AI, using genomic technology as a benchmark for selecting replacements and managing risk in a retained ownership environment. Similar focus on health, nutrition and temperament make this offering an opportunity for anyone seeking to make genetic improvements in your cow-calf operation.

Giles Ranch, Ashland, KS

Giles Ranch is a fourth generation, family-owned, diverse beef operation in Clark County. Giles Ranch has been a GAR customer for three generations! The commercial cow-calf, stocker-feeder operation utilizes dominant native grasses, supplemented by sorghum and native prairie hay. They typically retain ownership and market through U.S. Premium Beef. The family also

markets grass-fed, grain-finished freezer beef.

Jenny Betschart (620) 826-5026 • Katie Shaw (620) 826-5027
giles@kans.com

John Mazoch, DVM Bueche, LA

Dr. John Mazoch has been a GAR customer for more than 30 years. First buying bulls for his own cowherd, then purchasing bulls for his customers needing to make dramatic improvements in their herds. John has grown from a traditional southeastern cattle operation to a diversified cow calf and cattle feeder relying on GAR genetics to take advantage of value-added opportunities.

John Mazoch (225) 278-9525 • hmvets@yahoo.com

RMS Cattle, LLC Randall Spare • Ashland, KS

Randall Spare not only provides world class veterinary services, he is an outstanding cowman. Dr. Spare is a cow-calf producer with a constant eye on end product merit. His diligence and discipline toward genetic selection and whole herd health result in commercial replacement females with outstanding profit potential.

Randall Spare (620) 635-5507 • rksparedvm@gmail.com

Tipton Ranch, Pocasset, OK.

In the past few years, Tipton Ranch has purchased calving ease, growth and higher marbling GAR bulls to use on their commercial cowherd. The cows are located in southwestern Oklahoma and run on native grass and improved bermuda grass pastures.

Tanner Tipton (405) 808-5264 • tanner.tipton@yahoo.com
Ty Tipton (405) 808-9096 • tiptonequine@gmail.com

Wharton 3C Cattle, LLC Syracuse, KS

Rusty and Shannon Wharton have been successful beef producers for decades and now own 3C Cattle. This diversified beef operation is uses GAR genetics exclusively and uses Method Genetics data to benchmark the progress in their cow calf and cattle feeding operation.

Wilkerson Cattle Co., LLC Edmond, OK

Jeff Wilkerson is a GAR cooperator located in central Oklahoma. Wilkerson Cattle has incorporated the top GAR sires into his AI operation and has purchased some top GAR bulls to add to his herd bull battery. He is using Method Genetics genomic data as a benchmarking tool to select replacement females.

Jeff Wilkerson (405) 818-5315 • wilkersonsolutions@gmail.com

Ross Humphreys, San Rafael Cattle Co., Tucson, AZ

San Rafael Cattle Co. is a 200 year old Spanish and Mexican land grant located south of Patagonia, Arizona, and on the border of Mexico. Since 2000, Ross and his wife, Susan Lowell, have made significant progress in the ranch's output through the use of GAR genetics. San Rafael retains ownership on fed cattle and uses

the data to make genetic improvements.

Ross Humphreys (520) 400-1446 • rosshumphreys@mac.com

Mayer Legacy LLC Margie Rice, Guymon, OK

Mayer Legacy LLC is a fifth generation commercial cow-calf operation in Texas County, Oklahoma. By using tools and technology to make genetic improvements in the cow herd, this long-time GAR customer delivers cattle earning some of the highest premiums paid by U.S. Premium Beef. Margie Mayer Rice continues to manage the diversified operation producing value-added female replacements, feeder cattle and private treaty Angus bulls.

Means Ranch • Dublin, TX

Craig & Jessie Means, and the Means family, relationship with GAR spans more than a half century. GAR genetics in the Means Ranch cowherd in Comanche County, Texas produce cattle with EPDs much higher than the breed averages. Means uses Method Genetics testing as a tool when selecting replacement heifers and they retain ownership of steer calves through the feedlot then market them through U.S. Premium Beef.

The Method Genetics index values are derived from Method Genetics EPDs combined with industry-focused economic weightings. The Method EPDs are generated from a multi-trait, 'single-step' genetic evaluation that uses performance mea-

asures, ancestral pedigree, and available DNA genotypes. This single-step approach incorporates the genotypes directly into the genetic evaluation process and was implemented at Method in the summer of 2014.
