WWW.HUTSONANGUSFARMS.COM

Bert and Sue

Johnny and Jennifer

Sanders Family

Salazar Family

On behalf of the Hutson family, I would like to invite you to our 8th Annual Bull and Female Sale.

We have an outstanding selection of 18-month-old and 2-year-old bulls and bred heifers to offer in our sale this year. It is our goal to improve our selection every year, and I think we did it again!

I am proud to say all the bulls and females are born, raised, and developed here at Hutson Angus Farms. We have tested our bulls and most of the heifers on the GrowSafe Individual Feed Intake Measurement System, and this is allowing us to really push the feed efficiency on our herd.

We feel now more than ever that feed efficiency needs to be a part of the selection process. It is allowing us to continue to run a large number of cows in the drought we are having to endure.

Don't miss out on the opportunity to purchase feed intake tested bulls and females. We look forward to seeing you January 23rd at the farm! If you are not able to attend the sale, you can watch it on Superior Click-to-Bid.

If you have any questions, please feel free to give me a call at 405-638-1944 or send me an email at joe@hutsonangusfarms.com.

Sincerely,

Joe Sanders

Jeremy Haag
(816) 516-1309

Dear Cattlemen:

Plan now to be on hand, Saturday, January 23rd for this truly unique annual event that kicks off the 2021 sale season, presented from Hutson Angus Farms. Nowhere in America will you find a stronger commitment to feed intake testing than in the Hutson program that has amassed many years and generations of genetics and data.

The Hutson registered Angus herd was born with the dispersal of the historic Burch Angus performance herd in 1997. More than two decades later, the Hutson program has catapulted its foundation genetics into a new realm. As you study this catalog, you will find it to be like few if any others that you've ever seen. Use this information to your advantage. That is why it's presented to you. And of course, don't hesitate to call on Bert, Johnny, Joe, Krista or any of us at the American Angus Hall of Fame if we can be of further assistance. Selling will be an excellent selection of both strong-age bulls and elite females with worlds of opportunity. They are the cream of the crop and sure to please.

Indeed, it is a pleasure and privilege to assist Hutson Angus Farms in this unique endeavor. Looking forward to seeing everyone sale day.

Sincerely,

Tom Burke

Kurt Schaff

ANNOUNCEMENTS

All announcements from the auction block take precedence over the printed information in the sale book.

EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®.

INSPECTION OF CATTLE

Cattle will be available for viewing and inspection at the farm starting January 21, 2021.

INSURANCE

Insurance can be purchased at the sale provided by Roger Givens (580) 821-2838 roger.givens@agri-prime.com with AgriPrime

HERD HEALTH

All bulls passed a BSE and Trich test and were scrotal measured by Scott Sturgeon, DVM Sturgeon Veterinarian Services (405) 880-3949.

All bulls and heifers are tested and eligible for immediate interstate shipment. Our herd is BVD PI free.

HAF FIRST BREEDING SEASON GUARANTEE

HAF also guarantees all bulls for the first breeding season (90-day period) due to injury. All injured bulls must be diagnosed by a veterinarian at the owner's expense. Please notify us as soon as possible if an injury should occur and prior to the bull being salvaged. HAF will get the salvage value of the bull. All claims must be made by September 1, 2021. This does not replace mortality insurance and does not cover loss due to death of other natural occurrence.

VOLUME DISCOUNT

5-9 Bulls **5%** 10 or more bulls **10%**

The volume discount will be applied to bulls selling for \$3,200 or more.

DELIVERY

We will provide free delivery on all bulls within 200 miles. Pick up your bull on sale day and receive a \$50 per bull deduction (does not apply to females).

Delivery on females is the buyer's responsibility unless otherwise discussed.

EPDS

EPDs are current as of December 14, 2020. The bull EPDs have been genomically enhanced using **ANGUSGS**.

TERMS AND CONDITIONS

All bulls sell in accordance with the terms and conditions recommended by the American Angus Association as of 12/3/12.

AI Certificates will be the responsibility of the buyer.

HAF retains 30% semen interest on all bulls and 30% embryo interest on all heifers in the sale.

Each bull and heifer becomes the buyer's risk as soon as it is sold, but will be cared for by the seller until load-out or for a reasonable period of time (with additional fee).

Everyone attending the sale does so at their own risk and HAF or their agents assume no liability, legal or otherwise, for any accidents that may occur.

LUNCH

Will be provided day of the sale, prepared by Scott Sturgeon.

Sponsored by Livestock Nutrition Center

Bert Hutson has always had an affinity for livestock nutrition, a passion that can be traced back to his days as an FFA member and working on his father's dairy farm. That interest has helped Hutson create and grow a large herd of Angus cattle that regularly bring premium prices

not only at his annual sale but also in private treaty transactions.

At 80 years old, the Elk City rancher has no plans to slow down. His seventh annual bull sale, held in January 2020, averaged nearly \$1,000 more per bull than the previous year, and he and his team are constantly working to improve their product.

While Bert himself is progressive, he also believes in doing what works for his program – not following in the path of others.

Bert was born in 1939 and grew up working on his father, Martin Hutson's, dairy farm in the early 1940s. "It was hard work. Whether you liked them or not, you milked cows every morning before you went to school. I fed silage with a pitchfork and a little trailer and dipped it out. I would feed and milk in the morning and smell like silage all day at school," he recalled.

That first dairy farm was near Canute, Okla. "We milked cows so we could have a little money to buy groceries with. We didn't have electricity then and milked cows with a gasoline motor running a vacuum pump. We got electricity in the latter part of 1948, and we felt like there'd never be another poor day," Bert shared.

Soon after, around 1950, the elder Hutson built a dairy barn with a concrete floor. A health inspector named Troy Hicks came out to inspect the operation. "There was a lot of milk being sold in Elk City at the time, but it was Grade C, which is what they make cheese with. My dad got to sell the first Grade A milk in Elk City to Braden Dairy," he said.

The dairy business rocked along steadily for several years, but when Martin received a terrifying diagnosis, it seemed that life was going to change.

Bert himself had just graduated high school and was only four days into a job of unloading lumber for a lumberyard in Clinton. "In 1959 dad was having some trouble seeing, and it wound up that he had pituitary gland cancer. He got a message that he had to go to the doctor in the city then or it would be too late," Bert said.

Back then, a daily trek to and from Oklahoma City would have been too much, and Martin was advised to sell his dairy. "I told him 'no, you're not going to do that.' I knew my job at the time wasn't important, so he went to the doctor and I went to the dairy and milked his cows and fed them," he said.

A couple months went by before Martin was able to travel home to check on his dairy, including a small herd of heifers Bert had been caring for. "You know, back then you just raised everything as poor as you could. He didn't have much

money, but I went and bought some cottonseed meal and mixed it with his silage and fed those heifers." He added, "What was real funny was when he came down to the lots and looked around. He saw those heifers and asked where I got them. He didn't believe they were the same ones that were there when he'd left."

Bert knew the cottonseed meal would add some much-needed protein to the heifers' diet. "We just fed them silage, which wasn't high protein, so I just added some stuff to it. I was always interested in that stuff in FFA. We'd figure out rations and things. He (Martin) always said, 'I can't believe those heifers look like that,'" Bert said.

Luckily, the Hutsons managed to save the dairy. Martin finally sold it in 1964 and moved north to Kansas. "He always liked to farm the black land and he took all his dairy equipment. He tried to get me to come up there and help him with a dairy, but I never did go," he said.

Bert stayed in Oklahoma working as a truck driver for his uncle and dipped his toes into several other ventures. "I was into one thing and then the other. I did a little custom hay baling. I had a little trouble where they couldn't keep my heart slowed down, and they told me I had to get out of the trucks and exercise, so I bought a 24 hour truck stop, and I got a lot of exercise doing that," he said.

While the truck stop business was doing well, tragedy struck when one of the workers was shot and killed during an armed robbery.

After that, Bert had trouble finding anyone to work overnight. Luckily, he had many friends who wanted him to get back into the hay business, so he and a friend started custom cutting and baling.

"Then in April of 1971, I had a neighbor move here from Texas who was an oilfield guy who was a mud engineer. He called me up and said, 'You kick that hay off that truck and come haul mud for us.' I said, 'Well, golly, it's nine o'clock at night,' and he just told me that's the mud business," he laughed.

After agreeing, Bert took off to Canadian, Texas, but it was raining and misting, and his truck didn't have a heater or a defroster. "So, I just turned around and came back. I said, 'Hey, you want your mud hauled? Call during the day,'" he laughed. "They told me to fix the heater and that was in the fall of 1971, and I haven't been caught up since. I started out with an old \$400 GMC hay truck."

Bert was custom baling and hauling mud, which meant that his wife, Sue, and his son, Johnny, also had to pitch in. "The oilfield guys would call me at three or four in the afternoon, and I'd have to get on the truck. If I was baling or cutting, I'd tell my wife and she would come finish running the baler or the swather. When our son got a little older, around nine, he and a neighbor boy would come with my wife and she would let one of them run the tractor one round, and then the other would run it one round. The last guy that I can remember that was always telling people about Sue baling passed away about six months ago at 91 years old," Bert said.

Hutson Angus Ranch

Bert and Sue were married in 1964, and lived just outside of Elk City on three-and-a-half acres for several years. In 1975, some land west of Elk City came up for sale. It was in bad shape; grown up with no buildings, save for

two small sheds. Still, the couple didn't think it would be something they could afford.

"Everyone in the country had looked at this property. Two years before, cotton had been up to 60 or 70 cents, and in those days, that was a lot of money, so the cotton farmers made a lot of money in that time, but they all bought new tractors and equipment. Well, come to 1975, and cotton was at 18 cents, so they were having to make payments on those tractors. I didn't have a lot of people bidding against me.

"The morning of the sale I was kind of disgusted, and I told Sue, 'I don't believe we'll go with everybody looking at the place.' She said, 'Nope, we've looked at it so much, we're going over there.' It's the best thing we ever did. We bought it for a song, and I don't sing very well," he said.

Although Bert was focused on his trucking business, the Hutson family began to venture into the cattle industry, starting with Limousins. "I don't remember exactly how we got into that business, but we'd see them around the shows and stuff, and they looked pretty good. They would have a good rear end on them and a lot of meat. One thing led to another, and we'd go to a sale and buy a better one. Then we got to showing them because my kids were young. You know, we'd go to town and could get reserve grand champion right behind the big boys, so we enjoyed it," he said. "We never put all the effort out like a lot of the show people did. I can't recall exactly why I started out with them, but knowing me, there's no telling. I probably saw one somewhere."

While daughter Angie had a lot of success showing Limousins, Bert noticed the cattle industry was changing to favor the Angus breed. In 1997, Bert and his son Johnny headed to the Burch Angus Sale in Mill Creek, Okla., intending to buy a few head of Angus he had seen in Clarence Burch's catalog. "We thought we'd buy a trailer load. You know, maybe 10 or 15 to get started," he said.

However, the quality of Burch's cattle made it impossible for Bert and Johnny to differentiate between them to pick out what he wanted. "I just set myself a price limit so that I wouldn't pay over \$1,800 to \$2,000 for a cow," Bert laughs. "We went down there to buy 15 head, and we came back with two-and-a-half semi loads.

You couldn't separate them. One looked just as good as the other. They were the true old Aberdeen Angus breed, and they had never crossbred." Those first loads of cattle became the foundation of the herd that the farm runs today.

Bert and Sue Hutson have been married more than 50 years.

Feed Efficient Cattle

In 1999, a cattle nutritionist and founder of Darlings Nutrition Co., Don Southerland, convinced Bert to send a group of bulls to Profit Maker Bulls in Paxton, Neb. to evaluate the growth, performance, and average daily gain. All parameters were carefully measured, and based on the results, Bert

A few of the bulls at Hutson Angus Farm.

decided to shift his breeding focus to produce feed-efficient stock. His aim was now to breed higher-gaining cattle that require less feed.

"I started out sending six bulls or so up there, and I'd add another one or two each year. The Burch Angus cattle were showing up those high numbered cattle up there. We got to leasing a bunch of cattle up in Nebraska and the leasing deal got really good. A company came by with a GrowSafe System and so we started testing our bulls and climbing the ladder," Bert shared.

It wasn't long before people were really after the BH branded bulls because they could wean more weight off their cows. "Then we started sending heifers up there and testing those, and when we started doing that everything began to improve. We were breeding the feed efficient heifer to a feed efficient bull, and it's really added to the deal," he said.

About seven years ago, the Hutsons began having a sale for the three-year-old bulls tested at Profit Maker Bulls, and in 2016 they installed a GrowSafe individual feed intake Measurement System and GrowSafe Beef to be able to test more cattle.

The GrowSafe System is a company based out of Canada. Scales are built into the feeders and waterers. "One animal can put their head in one node; they have an EID tag that reads which animal is eating or is at the waterer. When they put their head in it starts recording, and they know what each animal eats. Using the GrowSafe Beef, which gets a half weight and can get within one percent of actual body weight, cuts our test time by 21 days. Extra handling can knock an animal off feed, so this makes it easier," Bert said.

No longer testing only the bulls, Hutson Angus now tests all heifers that are kept for replacement females, furthering their aim to use and market only the most feed-efficient bulls and heifers. "We have stayed with one deal. We're going to work for our customer, and if you get the feed efficiency and they see it, they're going to come back and get your bulls to wean a few more pounds," he said. "Now, we don't have the biggest, fattest bull in the world because fat and pretty might always sell, but it won't always produce in the pasture. You have to have something that will convert forage to meat."

Bert is passionate about the cattle business and encourages all ranchers of any size operation to be informed about what is happening in the industry. Always willing to visit with fellow ranchers, the gates to Hutson Angus farm is always open for visitors.

FEED EFFICIENCY

Feed cost is the largest component of our cow herd expense. Feed efficiency is heritable and allows progress to be made through selection. Studies to date have shown that selecting for efficiency has immediate impact. There have been large impacts in the cow herd as well as in the feed lot.

We started testing our bulls and a few heifers on the GrowSafe Individual Feed Intake Measurement System in 2008. We had a demand for more

feed efficient females, so we decided to install our own system in 2016.

You can learn more about our GrowSafe System on our website www.HutsonAngusFarms.com.

Our goal is to identify and propagate breeding cattle whose progeny will gain rapidly while consuming less feed during the growing stage and who can maintain themselves with less feed throughout their lives.

Residual Feed Intake (RFI) EPD provides a way of differentiating cattle from the standpoint of their metabolic feed utilization efficiency.

The feed efficiency information in this book is shown with each animal's EPDs under RFI EPD. A negative RFI is what you are looking for in feed efficiency!

Hutson Angus is truly an industry leader in feed efficiency testing, with over 10 years of efficiency selection included in this bull and heifer offering. When you purchase Hutson Angus genetics, your feed costs can be reduced in an entire generation in your herd. This year's offering also includes efficiency tested females. Efficiency tested females are rarely offered anywhere. This is a real opportunity to get a head start on the industry awakening of the importance of identifying cattle that not only gain, but gain more on less. Residual Feed Intake (RFI) is a unique measure that shows just that and is independent of all other traits, making it an extremely valuable and easy trait to include in your selection process. Research shows steady selection for efficiency can reduce feed costs by up to a significant 20% over time. This means you can run the same number of cows and feed less, or run more cows on the same inputs and raise more. Selection of efficient genetics is one of the most important things you can do to be more profitable in the cattle industry. Hutson Angus has been measuring and selecting for feed efficient genetics since 2008 through an expansive approach including testing bulls, females, and steers. Today they are offering you one of the most proven set of efficiency-data backed genetics you will find anywhere. In one simple purchase, you can reap the benefits of Hutson's decade of genetic testing and selection. The Hutson Angus Bull Sale is the one sale you should not miss in 2021!

Mark Nelson, Vytelle/GrowSafe

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. **Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.**

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. **Please note that high speed internet is required – this is not for dial-up or satellite internet.** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

***If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.**

Heifer Bull Candidate!

We used this bull in our herd last year.

G2753 is the top RFI EPD bull in the sale! He also has the best GrowSafe DMI EPD in the Top 1%.

This is the type of bull that will produce some really good replacement heifers that will pass on the feed efficiency to their progeny.

He has 14 EPDs in the top 20% of the breed - HP in the Top 4%, really good feet scores, Top 10% \$F, Top 15% \$B and \$C.

The sire to G2878 is a favorite of ours. He is known for producing calves that are always at the top for growth, and their looks always make them stand out! G2878 has the possibility to do the same for you herd! With WW Ratio at 118 and YW Ratio at 120, you can bet his calves should do the same! This bull could do a lot for someone's herd. His HP EPD is in the Top 5% and his Claw and Angle EPDs are in the Top 1%.

Hutson Bad Lad G2878 - Lot 20

CATTLEMAN'S CHOICE FEEDYARD

Hutson Angus Farms has been sending steers and heifers to Cattleman's Choice Feedyard in Gage, OK, since 2015.

The steers have a 4.18 ADG with a 6.2 DMC. Throw in the fact that they were not implanted All Natural is outstanding. Not many people can say that their calves have that gain and feed for less than \$0.76 Cost of Gain. The steers graded at 98% Prime and Choice!

Hutson heifers perform just as well as the steers. We had heifers last year that gained over 5 pounds per day and fed for \$0.72 Cost of Gain, and they graded 98% Prime and Choice!

We also just got back data on the last group of heifers. They went in weighing over 900 pounds, gained 4.2 pounds per day, and fed for \$0.83 Cost of Gain. These heifers were All Natural, no hormones or medications. They graded 99% Prime and Choice, and some of them grossed over \$2000 per head! 78% of the carcasses had a REA of 14 to 19+!

This data is off large groups. When you can get large groups to gain that much, they will spend less time in the feedlot and save money doing it!

2923G has a RFI EPD in the Top 10% of the breed and had an actual RFI of -1.30; and he gained 4.92 pounds per day while on test! He also has a Top 10% WW EPD and \$W.

What's a bull worth?

COWMAN FORMULA

Increase in pounds per calf from a top-performance bull

- X No. of cows bred to him per year
- X No. of years to keep the bull
- X Expected selling price of calves
- = Additional dollars you can pay for a better bull

Example: A bull who will add 30 lbs. to the weaning weight of each of his calves mated to 25 cows per year for 4 years and you sell the calves for \$1.50 per pound.

$$30 \times 25 = 750 \times 4 = 3000 \times 1.50 = \$4,500$$

This bull is worth \$4,500 more than the average bull who will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving-ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.

This is the last bull, but there is nothing wrong with him!

He has a Top 2% HP, Top 10% \$M, Top 15% WW EPD and Angle, and a Top 20% YW EPD.

To accelerate economic progress, Hutson Angus Farms has been testing all the replacement heifers through GrowSafe Individual Feed Intake Measurement System. The progress in Feed Efficiency has become very noticeable! HAF is wanting to share this opportunity for the progressive cattleman to own feed intake tested bred heifers.

10 lots of feed intake tested females will be sold. Lots A & B will be auctioned off. The winning bidder has the choice to buy one of the heifers or double the money and take them both. If the winning bidder only takes one, the other will stay in the HAF herd.
