

Bull Sale  
Saturday, January 30  
2021

Dear Cattlemen,

Welcome to our 2021 Bull Sale. It is obvious many things have been new and different in the past year with many changes that have affected all of us. It is our goal with this year's sale to be as flexible and accommodating as we can for our customers during these unusual times. On that note, we have added a second online bidding option in Superior Livestock, who along with DV Auction Service, will allow for online participation for those who prefer that option this year. We will continue with the live auction, as usual, and encourage those who wish to travel to and participate in the sale as usual to do so. This year, especially, we encourage anyone who would like to view the bulls early to feel free to come by any time to see them.

There are roughly 225 head of coming two-year-olds and 175 January and February yearlings this year. Throughout the offering you will find many different blood lines that are selected to offer good performance and end product merit along with the ability to function problem free under practical conditions.

We will winter the bulls at no charge until the 15th of March at which time we will begin free delivery. The bulls sell with a first season breeding guarantee that is outlined on the next page. As always, we welcome your feedback on our genetics and program.

Please join us for a complimentary lunch on sale day and a post sale get together featuring Creek Stone Farms prime rib and refreshments after the sale. This year's gathering will be held at the Ag Building at the west end of the fairgrounds rather than the Taft Building to allow for more room and ventilation.

In closing, please don't hesitate to call on us if there is anything we can do to answer your questions or assist you in any way during these extraordinary times. We offer you our sincere thanks for your interest and support. .

Yours truly,

*Jud & Denise Baldrige*

### **THE GOALS OF OUR PROGRAM.....**

are to provide our customers with the most progressive genetics possible. Genetics that excel in the economically important traits of efficient beef production. To us that means growth, fertility, calving-ease, maternal and carcass traits. And these traits should come in a functional, sound, easy-fleshing and gentle package. We rely on EPDs, visual appraisal and individual performance to guide us in the selection process. We also rely on AI and embryo transfer to expand the impact of elite bulls and females on our program. Our commitment to reaching our genetic goals includes ongoing investment in elite genetics through semen from outstanding sires and the addition of superior producing cow families to our program.

In addition to the goals of our breeding program, we know our future and success depends on customer satisfaction. Repeat customers, long-standing relationships and real genetic value are what we want to produce.

Saturday, January 30, 2021  
 • North Platte, NE •

1:00 p.m. (CST) at the Lincoln County Fairgrounds

The Fairgrounds is located three miles west of the Hwy 30 & 83 junction in North Platte on Hwy 30.

## – Guarantee –

Bulls selling for \$3,000 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage.

Replacement bulls are not covered by this guarantee.

- **Sight Unseen Purchase** – A satisfaction guaranteed sight unseen purchase plan is available for buyers unable to attend. Contact Jud for details.
- **Free Delivery** – Free Nationwide delivery in the lower 48 states. Our goal is to complete all bull deliveries during the third and fourth weeks of March. With spring work & AI and embryo transfer work to be done on our January – February calving cows in early April, it makes our completing all bull deliveries in the third and fourth weeks of March necessary, buyers cooperation in this regard is greatly appreciated.
- **Volume Discounts** – will be offered starting at 3 bulls, 3% and increasing 1% for each additional bull up to 10 bulls - 10% maximum discount.
- **Performance Data** – American Angus now updates EPDs weekly. The EPDs and percentile ranking in this catalog are as of December 14, 2020 (Spring 2021). A supplement sheet will be provided sale day with the updated weights, scrotal, EPDs and yearling scan data on the yearling bulls. Weekly updates can also be viewed at [www.angus.org](http://www.angus.org).

If you would like the updates and sale order information in advance the week prior to the sale, please view our website ([baldridge.net](http://baldridge.net)), email us at [jud@baldridge.net](mailto:jud@baldridge.net) or call 308-520-2221.

- **Health** – Bulls have been vaccinated with IBR-P13-BVD-BRSV, 7-way clostridial and lept. They have been wormed with safeguard and poured with Ivermectin.
- **Travel & Motels** – Motels - Holiday Inn Express 532-9500 (ask for Baldridge Bros. rate), Fairfield Inn 532-9900, Hampton Inn 534-6000, Super 8 534-4224, Quality Inn 532-9090, Best Western Plus 534-3120, LaQuinta 534-0700.
- **Semen Testing** – Bulls will have a breeding soundness evaluation (including semen test) prior to the sale by Nebraska bull service, a division of Vogler Semen Centre.
- **Sale Assistance** – Chris Earl - CK6 Consulting ..... 630-675-6559  
 Wes Tiemann - CK6 Consulting ..... 816-244-4462  
 Jay Nordhausen - Ogallala Livestock ..... 308-289-1548  
 Kyle Layman - North Platte Stockyards ..... 308-660-5319  
 Myron Benes ..... 402-741-2040
- **Genetic Defects** – All bulls selling are free of all known genetic conditions monitored by the American Angus Association by test or pedigree.
- **Retained Semen Interest** – Sellers retain a 1/3 semen interest on all bulls selling unless stated otherwise. Buyers receive full possession and all salvage value.

## HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. **Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com).**

### HERE'S HOW IT WORKS

**Turn in Bids Over the Phone.** This is our traditional method of buying livestock. To get started simply go online to [www.superiorlivestock.com](http://www.superiorlivestock.com) and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to [info@superiorauction.com](mailto:info@superiorauction.com). You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

**Click-To-Bid.** This is Superior's online bidding platform for cattle buying. **Please note that high speed internet is required - this is not for dial-up or satellite internet.** Registration is free, but you must become a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to sign up. Becoming a member is easy - just go to the homepage of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

**Viewing the Auction.** There are 2 places to view the sale broadcast live on the internet: [www.superiorlivestock.com](http://www.superiorlivestock.com) or [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to [www.superiorlivestock.com](http://www.superiorlivestock.com), but if you want to bid over the computer you must go to [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Remember you can call in to bid on the internet, but you must be a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to "click-to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

\*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at [www.superiorlivestock.com](http://www.superiorlivestock.com) prior to bidding.

## AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

### MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

### MANAGEMENT

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

**Claw Set (Claw)**, is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

**Foot Angle (Angle)**, is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees

at the pastern and appropriate toe length and heel depth.

**Pulmonary arterial pressure EPD (PAP)**, is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

### CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

### SVALUE INDEXES

**SValue Indexes**, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

**Maternal Weaned Calf Value (SM)**, expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with current production.

**Weaned Calf Value (SW)**, expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

**Cow Energy Value (\$EN)**, is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

**Feedlot Value (\$F)**, expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

**Grid Value (\$G)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

**Combined Value (\$C)**, an index, expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

- Forecaster was the top selling two-year-old bull in our 2016 sale to Alta Genetics and Diamond J Ranch. Forecaster excels for CED, yearling weight, and marbling and sires long and deep bodied, attractive progeny.
- Forecaster's dam produced the third high seller in our 2013 sale, the high seller in the 2014 sale, and the top two-year-old bulls in the 2016 and 2019 sales.
- Forecaster's dam has 73 progeny IMF scans at 112 average, and her sire and two paternal brothers dominated the feed efficiency data released by Grow Safe in 2020.
- Three full sisters to Forecaster have been ET donors for us and have numerous progeny throughout this offering.

- Versatile has many attributes and is the highest marbling animal we have produced. He is long and deep bodied, free moving, and up headed. He stands and moves square to the ground with good feet and base width.
- Versatile has excellent birth-growth spread and top 1% rankings for \$C, \$B, and docility along with top 20% \$M and top 10% HP.
- His dam also produced Alternative, the top seller in our 2018 sale who sired numerous sale toppers across the country this past year. (See page 18.)
- Versatile's dam also produced the lead off bull in our 2016 sale, Baldrige Command C036, now a proven and popular sire at ABS Global.
- We have been using Versatile heavily. We have withheld selling outside semen until after the sale. A semen bank of several hundred units (see sale time update) will be owned with his buyers on a pro-rata basis.
- We welcome you to come by and visually evaluate Versatile. His potential for large improvements in many traits gives us high hopes that he will be a step and a half forward.

### Lots 1 - 7

- 7 coming two-year-old full ET brothers sell as Lots 1 – 7. All but Lot 4 are recommended for heifers or cows.
- Seven attractive, uniform, and complete brothers who are also the highest marbling flush we have produced with phenotype to match.
- They are maternal brothers to Baldridge Alternative, the top seller in the 2018 sale, now at Origen/ABS Global and the sire of numerous sale toppers in 2020.
- They are also maternal brothers to Baldridge Command, the lead off bull in the 2016 sale, now a proven sire at ABS Global. These seven brothers combine their end product merit with strong docility, birth-growth spread, and scan data.
- Their dam and six maternal sisters serve as ET donors for us and breeders from Tennessee to California. These seven stack two cows who have consistently produced at the top of our program for many years in Blackbird A030 and Pratissa W165.

### Lots 1 - 7

- 7 coming two-year-old full ET brothers sell as Lots 1 – 7. All but Lot 4 are recommended for heifers or cows.
- Seven attractive, uniform, and complete brothers who are also the highest marbling flush we have produced with phenotype to match.
- They are maternal brothers to Baldrige Alternative, the top seller in the 2018 sale, now at Origen/ABS Global and the sire of numerous sale toppers in 2020.
- They are also maternal brothers to Baldrige Command, the lead off bull in the 2016 sale, now a proven sire at ABS Global. These seven brothers combine their end product merit with strong docility, birth-growth spread, and scan data.
- Their dam and six maternal sisters serve as ET donors for us and breeders from Tennessee to California. These seven stack two cows who have consistently produced at the top of our program for many years in Blackbird A030 and Pratissa W165.

- Alternative sires thick, attractive, wide based progeny with good growth in a moderate frame.
- Alternative topped the 2018 sale and is now featured at Origen/ABS Global. He has sired numerous sale toppers across the U.S. in 2020.
- Alternative also ranks in the breed's top 10% for marbling, top 20% for ribeye, and top 15% for calving ease direct along with top 1% \$B and top 5% \$C indexes.
- Alternative's dam is also the mother of Versatile, along with the lead off flush in this sale, and Baldrige Command, the lead off and second high selling bull in the 2016 sale, now at ABS Global. The Alternatives have good feet, dispositions, and scrotal size, and he is an outstanding semen producer.

- Reno is a high accuracy, balanced trait sire with outcross genetics to many bloodlines. He holds the valuable distinction of being the only .90 accuracy weaning weight bull in the breed to rank in the top 5% for \$Maternal, top 10% for marbling, and top 5% for weaning weight EPD. He does it all with below average frame size, above average docility, and top 25% of the breed claw, HP, ribeye, and milk.

- Reno's dam is a model cow with a strong production record. She has weaned six calves at 110 with an average calving interval of 366 days on seven calves (with being flushed twice along the way). Her udder quality and docility are outstanding, and she has direct sons by No Doubt and Enhance in this sale.

- Their dam is a paternal sister to Bronc and 38 Special, and their granddam is a full sister to Territory at ABS Global.

## About the Coming 2-year-old Bulls...

The coming 2-year-old bulls are born Mid-April through June. They are range calved and summered on grass at the ranch south of Hershey, then calves are weaned in October. The cows graze corn stalks from November to March, and are drove back to the ranch in April in preparation for calving again, so they typically graze 11+ months a year.

The weaned bull calves are grown to yearling time at the home place near North Platte and ultrasounded for carcass, measured for scrotal and weighed then turned out on sandhills grass in section and ½ section pastures until fall when they return to North Platte to be wintered and semen tested in January and prepared for this sale. They are never topped or picked through.

### Lots 185 - 188

- 4 coming two-year-old full brothers sell as Lots 185 to 188. Lot 185, 187, and 188 are recommended for heifers or cows.
- Four maternal brothers to Alternative and Versatile who rank well for yearling weight, marbling, docility, beef value, and \$Combined value.
- Their dam has produced at the top of our herd for many years and is also the dam of the lead off bull in our 2016 sale, Baldrige Command, at ABS Global.
- Their dam has 46 progeny IMF scans at an average ratio of 106 and also excels for udder and foot quality and docility.

- These brothers all rank in the breed's top 10% for weaning weight EPD, and their flush sister is a future donor.
- Their dam has weaned four calves at a 119 average, and their granddam has weaned four at 110. Y69 is the top weaning and yearling weight EPD cow in the breed at .6+ accuracy. We used Gravy Train this past summer in AI, ET, and natural service, and he is one of the top scanning sons of Isabel Y69.

### Lot 370 - Baldrige Goldenrod G530

#### Lots 370 - 373

- 4 maternal brothers sell as Lots 370 – 373. Three are by Commando and one is by 38 Special, a Commando son.
- All but Lot 370 could work on larger heifers or cows.
- These four are maternal brothers to Forecaster, Black Oak, Eldorado, Xpansion, and more. Their dam has produced our top selling coming two-year-old bull in three different sales, weaned five calves at 103 with 73 progeny IMFs scanned at a 112 average.
- These brothers have good birth-growth spread and end product merit and top 30% or higher \$Beef and \$Combined values.
- Their grandsire, Protégé, along with his sons, dominated the Grow Safe feed efficiency data released in 2020.
