HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. **Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.**

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding program for cattle buying. **Please note that high speed internet is required – this is not for dial-up or satellite internet.** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on Dish Network channel 998. *Please note that there is a delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on.* The sale will also be broadcast live on the internet at both www.superiorlivestock.com and www.superiorclicktobid.com. The video feed on the homepage of www.superiorlivestock.com looks the same as the video feed on TV and can be watched over a smartphone or tablet. Remember you can call in to bid whether watching on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid".

Buyers will be contacted by the ranch after the sale for payment and delivery details. IF YOU NEED ANY ASSISTANCE CALL SUPERIOR AT (800) 422-2117.

TERMS & CONDITIONS: Terms of this sale are cash, or a good check, unless arrangements are made prior to the sale. Settlement to be made immediately at the conclusion of the sale, before animals are loaded. All supplements to this catalog or announcements made from the block take precedence over what is written in this book. Registration papers will be transferred upon request.

The most customer friendly GUARANTEE in the Bull Business!

Our top priority is to produce breeding stock that will perform for our customers. We take pride in breeding and developing bulls that are sound, functional and fertile. Bulls have passed a complete Breeding Soundness Examination by Dr. Don Peter, Hermiston, Oregon and are guaranteed breeders.

For years we have offered the most customer friendly, one year, money back guarantee in the bull business. We are easier to deal with than an insurance company!

Every bull purchased in the Herd Builder Bull Sale on February 20th 2021 regardless of price—
First year – (must contact us by 2/20/2022) Full 100% refund for failure of any kind.

.....

Bulls purchased for \$3000 or more are covered two additional years against a failed semen test or unsoundness due to foot structure!

Every bull in this sale with a purchase price of \$3000 or more will be covered for 3 years against foot structure problems that impede travel or a failed semen test. If such an issue occurs, and a suitable replacement is not available or desired, we will **refund** (credit toward a future purchase **only** if you prefer) the difference of the purchase price and salvage value on a pro-rated basis as follows:

Second year – contact us by 2/20/2023 (Purchase price – salvage) x 67% = REFUND

Third year – contact us by 2/20/2024 (Purchase price – salvage) x 33% = REFUND

PLEASE check out immediately after the sale!

FREE DELIVERY to Washington, Oregon and Idaho. Trips exceeding 500 miles one way will be made at cost. Understand that spring is an extremely busy time in our farming operations and while we will do our best to accomodate every buyer's needs, some deliveries will be combined to minimize trips or fit our schedule. We appreciate your cooperation in this regard.

Buyers of 5 or more bulls will receive delivery at a time of the buyer's convenience.

Haul your bulls home within 3 days of the sale and save \$50 per bull.

Out of state buyers; older bulls may require a TRICH test prior to leaving Washington.

Hello to everyone and thanks for taking the time to check out the bulls. We have once again assembled a lineup of bulls that excel in so many convenience traits that are often overlooked today in the quest for numbers or some high percentile ranking. We continue to search for and focus on the cattle that thrive on standing forage; Cattle that have the ability to graze year-round with NO supplement other than salt and mineral. I admit that at first thought, that sounded easy, just go buy moderate framed, easy fleshing cows and mate them to bulls of the same type and just kick back and enjoy the process. Well, as usual, it wasn't quite that cut and dried, but we have darn sure made huge progress here in the last decade. We have taken about 350lbs of weight off the average cow here and moved to an April/May calving window, removed all protein or energy supplements in the winter, changed the way we graze in the summer and increased the pounds of calves this ranch produces by 80%. In another couple years I think we will have fully doubled the production here. This change is not simply because we changed the type of cattle. Many management practices have added to the increase as well. But I do know that we would not be as successful if we had not changed the "type and kind" of cow that walks here. Our quest for moderate, easy fleshing, good uddered, good footed, no excuses females has begun to really take shape. I guess I'm just really trying to say that if you like good moderate cattle that tend to stay in better condition while requiring less supplemental feed than most, have pretty udders and good feet, well, I think we can do you some good.

This particular set of bulls is a first for me. They were developed solely on grass or some type of standing forage until September of this year. They ran out last winter with no supplement at all. Really interesting to see the differences in the bulls come springtime. Some looked ok. Others looked pretty hungry. But it allowed a real look at what they could do outside of the feedlot. It's pretty easy to make them look good at the feed bunk with supplemental protein and energy. Fat is a great equalizer when evaluating bulls, but then it becomes a bigger challenge to sort them and have any real idea of true fleshing ability. They summered in two groups, one on traditional irrigated pasture and the others on some irrigated and some dry unimproved pasture. In September they went into the feedlot to a ration of alfalfa, haylage and straw. No grain of any type. No protein or energy supplement. No rumensin or bovatec. No added fat. No bypass fats. Just forage. They did get some barley hay that was put up early with no grain in it. The bulls responded well to the feed bunk even without corn. Some gaining 5 plus a day for the first month. We stayed on this program until Jan. 2nd when I finally decided to give in and added corn silage and earlage to the ration. The bulls have responded well. So, when looking at these bulls and reading their weights, I encourage you to appreciate the lack of added inputs they were afforded. I am not sure we will be quite so tough on them in the future. They honestly were not provided the protein or energy levels to begin to express their "genetic potential." I do believe that the longevity will undoubtedly be increased, and their first-year performance should be superior to an over conditioned bull.

Once again a big thanks to the two programs that join us here in our sale. Sackmann Cattle Co. is an integral part of this sale in so many ways. The set of bulls they have this year is truly awe inspiring if you ask me. They are well developed; having been allowed to express their genetic potential and there is a lot of it. I don't think you can find a thicker, stouter set anywhere. There is just a whole bunch of volume and power on display here. The Sackmann bulls seem to be a really even dispositioned set as well. I was there on semen test day and it was a quiet day with the bulls handling well. The sale catalog is again their doing front to back. I am grateful for their friendship and involvement in our sales.

Kenny Gross of HB Angus has a handful of good bulls again this year. JR Ranch would have a bigger challenge to winter our cowherd without the help of Kenny and WHB. They have been a huge help in our wintering by allowing us to graze volunteer wheat and some other crops the last few winters. On top of that he is about the kindest, most generous guy a man can find. He and the whole family are always lending a hand and we do appreciate all they help us out with. It's these relationships that make this journey an enjoyable one.

Our guarantee is as good as any. We take care of any problems, period. We will deliver them to you. Remember the volume discount. We will be online at Superior Livestock for those that cannot attend in person. Remember that this will be a video sale. All bulls will be penned as usual the day before. Feel free to contact any of us for info or to answer any questions you might have. If you are not going to be in attendance and need bulls, please give us a call to discuss the cattle. I think it really helps us to visit with you prior to sale time. As far as Covid -19 regulations go, we will encourage everyone to make decisions that they feel suit their situation. We will implement safety protocols that make sense to ensure the safety of all. We look forward to seeing you on the 20th. Thank you, and may God bless America.

Jeff Schmidt
509-750-8671
jrranch@cbnn.net

Well that was fun, wasn't it?!?!

The events of the last 10 months have in many ways been interesting, terrifying, infuriating and bizarre. I could continue but would rather take this opportunity to focus on the positive and brag about my kids for a bit. Since so many of their activities were curtailed or cancelled this year we have put them to work! Instead of 4-H camp, basketball and cattle shows, this summer they were moving: hand lines, poly wire cross fence and cows. This fall, when we found ourselves short-handed, they have been instrumental in helping with synchronizing and breeding cows as well as clipping bulls and taking pictures and videos. My wife deserves most of the credit, but I am so proud of them!

Now to brag about the bulls! It all starts with the cow herd. The focus of our program continues to be producing cows that calve on their own, have problem-free udders, the fleshing ability and internal capacity to thrive on forage and the structural soundness to travel to find that forage. To quote Dan Coonrad: "The purpose of beef cattle is to turn low quality forage into high quality protein. They need a factory to that." That factory is a deep, wide rib cage with the capacity for the rumen to do its thing. I think if you evaluate the bulls you will see our philosophy is evident. They are moderate framed, wide based, deep bodied and thick. These bulls have been limited to about 4 lb. per day of a corn/DDG grain mix and long hay ration that is $\frac{3}{4}$ grass and $\frac{1}{4}$ alfalfa. The intent is to develop them at a rate that allows them to express their genetic potential without compromising soundness.

A couple things to note before you go through the catalog. I usually wait until weaning to make steers so they are all in the same contemporary group; but this year I decided to steer 20% of the bull calves and market them early in the grazing season. Of 72 fall bull calves, 57 went into the feedlot in July and only the top 50 made the sale book. Keep that in mind when evaluating weaning and yearling ratios of our bulls. A few of the ET bulls were raised in a neighbor's commercial herd where birth weights were not taken. We have never had a creep feeder or hoof trimmer on our place.

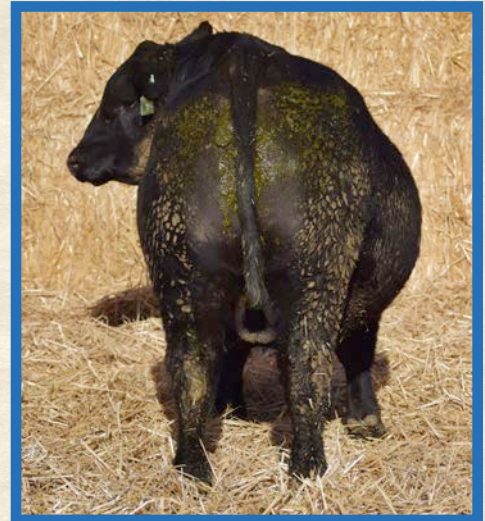

We still guarantee our bulls and will refund 100% of your purchase price for the first year after purchase. Starting a year ago, we extended our guarantee for two additional years (pro-rated) for failure of foot structure or semen test on bulls selling for \$3000 or more.

If you are unable to attend, our sale will be broadcast on Superior so you can bid with them on the phone or online. We also will have a great crew at ringside. They have all been through our herd and will give you an honest evaluation of bulls. Either Jeff would be happy to assist you as well. For any bulls purchased absentee -if you don't like them at delivery, you don't own them. Of course, we would love to see you in person, as the people we meet and friendships made are truly the best part of this business. You are more than welcome to come view the bulls any time prior to the sale. Videos of sale bulls will be available on YouTube. Bull videos will be shown instead of bulls physically walking through the ring. Take a good look through them in the pens next to the sale barn. They should be in place available for viewing by noon on Friday the 19th.

Consider this an invitation from our family to yours to join us February 20th in Othello. Thank you for your interest in our program. Please call, text or email if you have any questions.

Sackmann Fall Bulls - Lots 1-50

Brewster's name is a tribute to the great Gebbers herd where his sire was originally proven. This quiet, easy going bull is built like a tank with superb thickness and muscle expression through his top and rear end. His rib shape, depth of flank and middle dimension is exceptional and reminds me of his mother. Her picture doesn't do her justice – check out her video on You Tube. Massive, huge rib cage, easy fleshing and powerful, she is a member of the most exceptional flush in our history. Her flush brother, Sackmann Columbia 4115 topped our 2015 sale at \$15,000 to John Dixon and JR Ranch. 4112 sold in the summer of 2019 for \$30,000 to Sandford Ranches in TX. This bull puts together true moderation and fleshing ability with power and performance. I intend to use him in our program. Retaining 1/2 semen interest.

Big boned, stout herd bull here with loads of performance, rib shape and muscle expression. Carries his thickness through his top into a deep, wide, full rear end. His dam is sound made, clean and feminine fronted with a near perfect udder. She always raises a good calf. A full sister to this bull was a sale highlight in our sale in the summer of 2019 to Mike Ware.

This bull is a stud! Long spined, moderate framed, deep sided, thick and rugged. He oozes performance in all the right places and ranks near the top of his class for putting pounds on the scale. The stellar combination of phenotype, performance and maternal that 549 consistently produces. He is the right kind.

The Resource x Unmistakable mating works well, and here is our top example from a performance standpoint. He is a long bodied, deep sided performance machine. Our heaviest bull at weaning, he kept the pedal to the metal and didn't look back. Mark this bull if you sell your calves by the pound.

5 SACKMANN UNMISTAKABLE 0156

Old 946U is tough to beat for making really attractive, well balanced cattle with excellent performance in a moderate package. This bull is a great example. He is neat fronted, with tons of rib shape, and natural base width. His dam hasn't missed yet and is putting together an outstanding production record. She goes back to the old 6807 donor cow I was lucky enough to buy from Granger Angus in Great Falls, MT.

Only one Solo calf in the offering this year, but there will be more in the future and we are excited about them! This bull is long, deep, and wide with plenty of performance. A little more milk if that is something you need. Dam is a nice young cow with a beautiful udder and stems from one of our best old cow families.

A pair of flush brothers that should work on heifers, with extra performance and a fancy herd bull look. Well balanced and eye appealing from every angle, they are neat fronted with plenty of depth of rib and muscle expression. Sired by Bravo and out of our VDAR Lass 9732 donor, some of the best maternal genetics Montana has to offer are right here!

V D A R Lass 9732 is a beautifully balanced and sound Pathfinder cow that I stole (for \$17,500) from Lee VanDyke. She is leaving a lasting impact on our herd. Her daughters are stamped with a sleek fronted, long sided, wedge shaped look with ample milk and fantastic udder quality.

Here is the Resource x Unmistakable combination again a generation removed on both sides. This is a really moderate Columbia son with a lot of rib shape and natural thickness. His dam is a reliable producer and one of the most phenotypically powerful cows on the place. Resource phenotype with calving ease credentials is a rare combination.

This heifer bull will catch your eye! He is really square hipped and complete in a moderate package. His dam is a nice young cow with an abundance of femininity and udder quality sired by Authentic. He went to work in the registered Wild West Angus herd in Oregon. I have to admit I am pleased and proud that stacking consecutive generations of sires with my prefix has resulted in a calf this good!

Pay attention to the pedigree here. Our only son of the Coleman Resource 798 bull. His sire was out of the 714 cow, which makes him a maternal brother to Bravo, Regis, and many others. The bottom side of this pedigree goes back to the Eisa Evergreen cow family, made famous at Sitz's. More great Montana maternal genetics. This bull turned on the performance post weaning and has done great in the feedlot.

Jeff's (Sackmann) water changing, fence & cow moving, cattle clipping and whatever else he needs help with crew for 2020. Mom hasn't complained about kids old enough to help with all those projects!

Double Wide son that ranked near the top of the class for weaning performance. Dam is beautiful young cow.

"468"

2020 the summer of no fairs. Instead the summer of learning to finish a project even if we didn't know how it was going to end! We are blessed in our community by groups of very dedicated folks that made sure very successful sales still happened at the Grant Co. and Othello Community Fairs. Raap's gave the kids a chance to show their steers and JR Ranch hosted a sale. 2021 steers are on feed so fingers crossed for pictures of kids showing for next year's catalog!

Shout out to Junior and the crew at Blue Sun Farms. Not only are they raising embryo calves for us but helping keep water and fences in front of cows this winter.

Full brother to our top selling bull in 2019 to Carol Palmer in Oregon. Pathfinder dam is a massive, big hipped 240x daughter. He is big ribbed, stout hipped and has a commanding presence. He is ready to go breed cows!

Pair of flush brothers sired by Resource out of a pathfinder donor. Her pedigree is absolutely stacked with some of the most famous, proven maternal genetics in breed history.

1.1.20 Maybe we should have known 2020 was going to be an adventure. #helpwanted

Celebrated momentous birthdays for Sid & Debbie in 2020. 70 is looking good!

Really nice Authentic heifer bull with some real depth, mass and performance. Dam has an exceptionally quiet disposition and he seems pretty easy to get along with as well.

Since the kids' schedule was wide open this summer we escaped for a vacation to Yellowstone. Beautiful!!

Lila; our lover of smaller ruminants.

And we have a Freshman! How did that happen?

We enjoyed a visit with a delegation from Argentina last February. They share our appreciation of easy fleshing cattle that thrive on forage and were impressed with Double Wide!

When school looks like this.....
more time to do all of these.

Stacks of hay never match semi-loads.
Moving the end of stacks to feed their
steers before the next cutting.

Always fence to fix!
Kids also became experts at rolling out
fence with our rotational grazing.

Our cattle doing what they do best...
 Converting forage to pounds and calves!
 Never get tired of pretty cattle on green grass
 and wide open spaces!
