Welcome

Welcome to our 2021 Bull Sale,

We hope this year we are over the COVID hump and many of you can attend our sale this year. We appreciate all the online bidding last year.

We have a great set of bulls this year. 75% of the bulls will work on heifers, but they are still in the top 25% of the Angus breed for weaning and yearling EPDs.

All of the bulls have been DNA tested for parentage as well as many other traits. This moves the accuracy up, for example on birth weight EPD it is like these bulls have already sired 23 calves. It takes the guess work out. See page 5 for more information.

We cull hard on our cows for disposition, udders and foot problems. We do not creep feed and feed a growing ration from weaning to yearling to keep them active and build in longevity.

We will have the sale on Superior again this year. See page 7. You can view the videos on their website.

We will have a great set of heifers again this year. We will video them the day before the sale and have the videos up the morning of the sale.

Come for lunch starting at 11:00 am MT or bid on Superior from your home.

Join us at Sweetwater Creek Golf Course after the sale for a steak and some story telling.

\$Value Indexes - What are they? How do I use them?

American Angus Association

\$Values are multi-trait selection indexes expressed in dollars per head to assist commercial beef producers by adding simplicity to genetic selection decisions. A \$Value has meaning only when used in comparison to the \$Value of another animal. For example, just as with EPDs, variation in \$Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

How do I use them?

\$Values should be used to compliment the criteria that producers already use when selecting bulls. The \$Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot and carcass merit.

The \$W, \$F, \$G and \$B values on individual animals and the Sire Evaluation Report may be viewed at www.angus.org.

\$Value Indexes

\$ Indexes			
\$W	\$F	\$G	\$B
+54	+83	+45	+129

Weaned Calf Value (\$W): An index expressed in dollars per head is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F): An index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

Grid Value (\$G): An index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B): An index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

Top Dollar Angus

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

How it Works:

Our program begins with a FREE genetic evaluation based on the current/past herd sires used in your program. We evaluate the sires used in your herd based on their growth and carcass merit characteristics. A herd that qualifies for Top Dollar Angus has cattle that are at least 50% Angus or Red Angus and also ranks in the top 25% of its respective breed for growth and carcass merit.

Once qualified, our team provides boots on the ground to share this valuable information with buyers looking for high quality cattle that will go on feed and perform. Our team has experience coast to coast and works directly in all channels (video, local auction, direct and internet). Plus, we have the resources to provide a very fast turn-around.

What our Customers Say:

"Top Dollar Angus is a program that benefits all levels of the industry. The seedstock producer is rewarded for providing superior genetics to the commercial cattleman, who in turn supplies the feeder with efficient cattle that will produce top-end carcasses. As Top Dollar Angus continues to raise their qualifying standard, these cattlemen will have to up their game to purchase the genetics that will fit the program. These cattlemen will see a return on investment when offering reputation feeders at market time."

General Information

Directions

Bowman Auction Market is located one mile south of Bowman, ND on Highway 85.

Herd Health

All Bulls have been vaccinated for IBR, P13, BVD, Pasturella and Haemophilus Somnus. All cattle have been poured with a clean up product. All Bulls have been semen tested and screened for abnormalities by Don Kruger, DVM, of the Bowman Veterinary Clinic. The adjusted scrotal measurements were taken the end of February. All the Commercial Heifers were vaccinated with PREG GUARD 10 this spring or VISTA 5 VL5.

Developmental Duplication

A genetic condition has been identified and documented in Angus cattle. This condition inherited as a simple recessive, has been designated as Development Duplication (DD). All bulls in this sale that had the potential to carry this gene have been tested. Any carriers of the gene will be noted in the footnotes as DDC.

Terms & Conditions

All Registered Cattle sell under the terms and conditions of the American Angus Association.

Free Delivery

All Bulls will be delivered FREE in North Dakota, Montana, South Dakota and Wyoming and to Canadian Ports of Entry. We will assist in finding delivery arrangements at cost for Registered Cattle going farther and commercial heifers as low as possible.

Ultrasound

All Bulls will be ultrasounded for carcass traits by Jason McLennon, Belle Fourche, SD. Updated Carcass EPDs will be included in this catalog.
