# EAGLE PASS RANCH

## ANNUAL FALL BULL SALE WEDNESDAY, SEPTEMBER 22, 2021

AT THE DOS PALOS Y AUCTION YARD – DOS PALOS, CALIFORNIA

**Sale Time 1:00 p.m. PDT      Lunch starts at 11:30 a.m.**

### *Welcome,*

Ranching is a tough business, and that's a giant understatement in a year like this. There's no "Easy" button like you might remember from the old commercials in our business, but I haven't met any ranchers that do what we do because it's easy. It's our hard work, day in and day out, that has sustained the culture of ranching through the years and will preserve it for generations to come.

While there's a lot about ranching that's hard work, bull selection shouldn't be one of them. We've got more tools than ever before to breed and select for genetics that improve profitability. Notice I don't say tools to improve growth traits or carcass traits, because in the ranching business, production has little to do with profitability. Whether you're a terminal cross program or a maternal breeder, the money comes from good cows.

Good cows come from selecting the right bulls from a program that has the commercial cattlemen in mind. Too many bull breeders are chasing extremes to sell bulls, which works in a terminal cross program but adds too much cost for low input cowherds. Good bulls are the result of efficient cows, both in terms of reproduction and optimum levels of production. This doesn't come from putting emphasis on just one trait or a handful of favorite traits but using indexes that are aligned with your production goals. Two of the best selection indexes available in the industry are API (All-Purpose Index) and TI (Terminal Index). You can find out more about how these indexes are calculated on Page 2, but it's as easy as using API if you're a maternal breeder and TI if you utilize a terminal cross program. Don't get hung up on individual traits or other things because ultimately it just adds unnecessary noise to bull selection. There are mountains of information contained in these index values.

We've done the hard work of collecting and evaluating all of this information for you, in addition to all of the sorting and culling required to offer you the best genetics from the heart of our program. I encourage you to take advantage of this "Easy" button to find the bulls that put your operation in the best position for future success. Thank you for your interest and continued support for our program. Please let us know if there's anything we can do to assist with your bull selection prior to the sale.

*Thanks,*

*AJ Munger*

*Andy LeDoux*

## DIRECTIONS TO SALE

Dos Palos Y Auction Yard  
 16575 S Hwy 33  
 Dos Palos, CA 83620

Dos Palos Y Auction Yard is located near the town of Dos Palos, CA on Hwy 33, approximately ¼ mile south of Hwy 152.

## LODGING INFORMATION

|   |              |
|---|--------------|
| La Quinta Inn & Suites, Los Banos ..... | 209-827-4677 |
| Best Western, Los Banos .....           | 877-574-2464 |
| Courtyard Marriott, Merced .....        | 209-725-1221 |

## LIABILITY

All persons attending the sale do so at their own risk. The seller assumes no liability, legal or otherwise, for any accidents occurring on or about the premises.

## TERMS

Cash or check payment in full on day of sale unless prior arrangements made.

## HEALTH

All cattle will be accompanied by proper health certificates for shipment and have had a complete vaccination program, including Anaplasmosis.

## DELIVERY

- All cattle sold to buyers in California and adjacent states are eligible for free delivery. Free delivery is also available to customers whose purchases total more than \$25,000. We will arrange delivery to your ranch when possible, however, central stockyards and sale barns may be used as drop off points to prevent cattle from being in transit too long. Buyer's cooperation in this regard is greatly appreciated.
- If you take your cattle home on sale day, we will give you a rebate of \$100 per head. This only applies to sale day load outs. Bring your trailer and save money.

## SIGHT UNSEEN GUARANTEE

All purchases made by internet bidding or on order with Eagle Pass Ranch are 100% satisfaction guaranteed upon delivery. This determination needs to be made at the time of delivery.

## 1ST BREEDING SEASON GUARANTEE

- Bulls selling for \$3,500 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.
- If a replacement bull of equal or greater value is available, he will be provided as a replacement for the injured bull. If a replacement bull is not available, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage.
- Replacement bulls are not covered by this guarantee.

## VOLUME DISCOUNT

A 5% volume discount is available to buyers who purchase 5 bulls or more.

## SALE SCHEDULE

**(ALL TIMES PDT):**

### **TUESDAY, SEPTEMBER 21ST**

- **8:00 AM – BULLS IN DISPLAY PENS AND AVAILABLE FOR VIEWING ALL DAY AT DOS PALOS Y AUCTION YARD**

### **WEDNESDAY, SEPTEMBER 22ND – SALE DAY!**

- **8:00 AM – COFFEE AND DOUGHNUTS AT SALE BARN**
- **9:30 AM – BULLS IN DISPLAY PENS AND AVAILABLE FOR VIEWING**
- **11:30 AM – LUNCH STARTS AT THE DPY CAFÉ**
- **1:00 PM – SALE TIME**

# BID Online

## HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com). (See Page 21 for more details)

## Profitable Genetic Selection using API and TI

There's a lot riding on bull selection, as it not only affects the value of your calf crop that you will market for the next 4-6 years, but if you're keeping replacements that can turn in to as much as **10-15 years!**

So how do you make the most profitable decisions **today**, based on what the industry will be like in **5, 10, or 15 years?**

Economic indexes are easily the most efficient and effective way to select for future profitability. They are the **ONLY** genetic selection method that allows you to factor in the cost of selecting for traits, as well as the benefit.

**For example, what's another 25 lbs of Weaning Weight worth?** Well, that's pretty easy as there's plenty of market information to determine the benefit of added payweight. But that 25 lbs of Weaning Weight isn't free, unfortunately. It's more than likely going to require more feed intake or milk production, but maybe it's also related to more birth weight and potential calving problems. Or maybe it's related to more mature cow size with higher maintenance costs because she still needs groceries year-round, whether she's raising a calf or not.

In a nutshell, that's what indexes do. They take all of the economically-relevant traits (ERTs) and calculate their value based on all the costs and benefits associated with those traits.

So, which indexes should you use? Luckily, that answer is pretty simple. If you're keeping replacement females, the All-Purpose Index (API) is the best choice. However, if you market 100% of your calf crop every year, the Terminal Index (TI) puts absolutely no weight on any maternal traits and it will allow you to maximize the market value of your calf crop at every end point, whether that's as a weaned calf, yearling, or selling fat cattle on a value-based marketing grid.

Lastly, it's important to have a **reference** for how these indexes are tabulated. Indexes are displayed in dollars per cow exposed.

So, if a bull breeds 30 cows a year  
For an average of 4 years  
that's 120 total cows exposed

| API       |
|-----------|
| 150 / 15% |
| TI        |
| 93 / 4%   |

A percentile ranking is provided to show how a bull compares to other bulls in the breed.

If Bull A is +100 for API and Bull B is +150 for API, over their lifetime, Bull B will generate \$6,000 (120 cows exposed x \$50 difference in API) more Net Profit than Bull A.

**Calving Ease EPD (CED)** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a bull's ability to transmit birth weight to his progeny compared to that of other bulls. Birth Weight EPDs are a component trait for calculating Calving Ease EPDs.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a bull's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a bull's ability to transmit yearling growth to his progeny compared to that of other sires.

**Milk EPD (Milk)**, expressed in pounds, is an estimate of the portion of a calf's weaning weight attributed to milk and mothering ability. Optimal Milk EPDs can vary between environments. For assistance in selecting your Optimal Milk EPD range, visit [www.angus.org/Performance/OptimalMilk/OptimalMilkMain.aspx](http://www.angus.org/Performance/OptimalMilk/OptimalMilkMain.aspx).

**Stay, Stayability(Stay)**, expressed as a percent of daughters remaining in the cowherd at 6 years of age.

**Carcass Weight EPD (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (REA)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Residual Feed Intake (RFI)**, expressed in pounds, is an estimate of the pounds above or below the amount of expected feed required for growth and maintenance.

**\$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through wellconceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes.

**All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

Dam of Lot 18

• AHL Tenderloin is a EGL Tenderloin N407 son, who needs little introduction to Eagle Pass customers or the Gelbvieh breed. The Tenderloin sire line is well known for its ability to transmit low-birth weight genetics, coupled with big payweight figures and end-product value. AHL Tenderloin is carrying on that legacy with loads of maternal power packed into his pedigree, resulting in higher-quality replacements while still delivering the same calving ease and carcass traits that his sire is known for.

- What do you get when you combine the leading Balancer sire in the breed with the propotent breeding female in the Eagle Pass cowherd for the last decade? EGL Empire E062 is the result of a dynamic mating and his first calf crop have surpassed our expectations. Empire offspring possesses the convenience traits of his parents and transmits the same soundness and function that the Lifeline and U426 progeny are known for.

- We selected this herd sire out of the Judd Ranch program for his calving ease and carcass traits in a higher-percentage package.
- His genetics have held true and is now a proven heifer bull that is siring cattle with excellent weight/frame ratio, carcass, and efficiency.

## HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day.

Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com).

## HERE'S HOW IT WORKS

• **TURN IN BIDS OVER THE PHONE.** This is our traditional method of buying livestock. To get started simply go online to [www.superiorlivestock.com](http://www.superiorlivestock.com) and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorrauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

• **CLICK-TO-BID.** This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to sign up. Becoming a member is easy - just go to the homepage of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

• **VIEWING THE AUCTION.** There are 2 places to view the sale broadcast live on the internet: [www.superiorlivestock.com](http://www.superiorlivestock.com) or [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to [www.superiorlivestock.com](http://www.superiorlivestock.com), but if you want to bid over the computer you must go to [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Remember you can call in to bid on the internet, but you must be a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to "click-to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

\*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at [www.superiorlivestock.com](http://www.superiorlivestock.com) prior to bidding.
