

Wilde Angus Ranch, LLC

Saturday, March 5, 2022 · 1:00 p.m.
At the Ranch East of Shevlin, MN

WELCOME

Welcome everyone to our 27th Annual Bull and Female Sale. As I reflect back over those years, I have been blessed to be in the cattle business where I have met so many *good* people along the way. Thank you for showing your support and friendship to my family.

I believe you will find a very good set of bulls, females, and horses as you view the catalog, but more importantly when you view the livestock in person, you will find that they have been developed in such a way, that they will do what bulls are meant to do, "Breed cows"! They should last 3 to 5 seasons and sometimes even more when they are not over fed in the developing period of their life.

I also believe our life here on earth is short, fifty, sixty, seventy, or even eighty years, but eternity is long, very long, actually forever! There is a Heaven and a Hell, and God has offered us this free gift of salvation thru his Son Jesus, just by believing in him. Romans 10:13 "For whosoever shall call on the name of the Lord will be saved."

I hope you all have a safe and prosperous New Year.

Sincerely,
Wayne M. Wilde and Family

Greetings from Wilde Angus Ranch –

Wow, it's hard to believe the 27th annual sale for Wilde Angus Ranch is just around the corner. Welcome to each of you and thank you to our many loyal customers who have made that possible. While 2021 presented many of us in the cattle business some challenges, it also gave us opportunities to evaluate and advance our operations forward. We did some things differently this past year, mostly because mother nature had a firm grip on our area.

I am super excited about the performance and development of this year's offering. One thing we did differently is *we did not* use creep feed in 2021. I believe this past year was great opportunity to evaluate the cow herd and that there might not be a better time than a 127 year drought. While the calves were weaned early, they still recorded a weaning weight of 660 pounds across the herd. You can have confidence that the cows did their job and have produced a very consistent, environment tested, and phenotypically and structurally correct set of bulls and heifer calves.

As has been done for years, we tested the entire herd for Johnes, Leukosis, and BVD. The entire offering has also been tested using Angus GS and have enhanced EPD's with the 50k results The balance in this year's offering is reflected in the multi-trait selection our breeding program is built upon.

We are pleased that RJ Aufforth will once again be offering a stout set of Hereford bulls. New this year, Ryan and Michael Hough have a very good set of ranch raised bred heifers consigned to the sale. Please feel free to call them directly should you have questions regarding those lots.

It is with great gratitude we thank you for your interest, business, friendship and investment you all make in moving the cattle business forward. Collectively, we have a great opportunity in the next few years to be rewarded for the quality and advancing genetics that are in high demand.

We hope you will join us on March 5th and will have the coffee on should you stop by to view the cattle prior to sale day. If you have questions, please call anytime, we are glad to assist and welcome the visit.

Regards,
Don Abarr & Family

27th Annual Bull Sale

Saturday, March 5, 2022 1PM
At the Ranch, Shevlin, Minnesota

OFFERING

**130 Angus Yearling Bulls • 25 Angus Open Heifers
20 Bred Angus Heifers • 4 Coming 2-Year-Old Horned Herefords
125 Commercial Bred Heifers • 4 Quarter Horses**

Announcements: From the block will take precedence over the catalog. Buyers unable to attend may send their bids to the Auctioneer, Publication Representatives, Wayne or Don to help with the selection of livestock with a sight unseen guarantee.

Transportation: Delta Airlines serves the Bemidji, Minnesota Airport. There is also a local airstrip near Bagley, Minnesota.

Herd Health: Minnesota is now a TB free state. Cow herd is tested annually for Johne's Disease, Bovine Leukosis and BVD.

Spring vaccinations: Birth - Inforce 3, Head Start Gel, Spring Turnout - Ultrabac 8, Vista Once SQ, Multimin, Ivermectin Pour On, Prewearing - Ultrabac 8, Vista Once SQ, Multimin, Weaning - Once PMH IN, Inforce 3, Cydectin Injectable, Vita Charge Drench, Clean Up II.

Terms and Conditions: Cattle will sell under the Terms and Conditions as recommended by the American Angus Association. Terms are cash. Please settle for cattle promptly after the sale.

EPDS and \$Values: If your purchasing decision relies highly on the most current data available, please look up animals of interest on the American Angus Association web page prior to viewing the sale offering.

Additional Performance: Scrotal measurements and 365-day adjusted weights will be available on the day of the sale.

Inspection of Cattle: Cattle can be viewed at the farm on or before the sale.

Liability: All persons attending this sale will do so at their own risk, legal or otherwise, for the safety or the behavior of the animals. The owners and sale staff assume no liability for property loss or accidents that may occur.

Boarding Arrangements: We are not responsible for injured bulls if they are left with us, you do so at your own risk. We encourage you to take out a livestock policy on your sale purchases. **Free delivery April 1-15**, after April 15 there will be a \$5.00 per day per bull charge.

Food and Refreshments: A complimentary lunch will start at 11:00 am.

Retaining 1/3 semen interest in all bulls selling unless noted otherwise.

**\$100 discount per bull
if hauled home day of sale!**

Volume Discount on BULLS ONLY

Starting at 3% on 3 Bulls

4% on 4 Bulls

5% on 5 Bulls

Up to 8% Total

Free delivery April 1-15

VIDEO AUCTION

Animals will be penned outside for viewing. During the sale only the video will be shown of each lot as they sell.

Animals will not come in the barn for the auction.

Terms and Abbreviations

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Management

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Claw Set (Claw), is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

Foot Angle (Angle), is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Carcass

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Value Indexes

\$Value Indexes, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with current production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

Cow Energy Value (\$EN), is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), an index, expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

Individual Data

BW: Actual birth weight.

WW: Weaning weight adjusted to 205 days of age.

= Pathfinder

+ = Embryo Transplant

* = Parents Qualified

NA = —

Actual BW to EPDs

It is important to follow the numbers, but it is more meaningful when you understand the process. At Wilde Angus Ranch, LLC, a calf born on Monday is not touched or processed by our crew until the next morning. This influences the recorded BW, but we believe it is more important for the calf to get colostrum, bond with its mother, and let mothers be mothers rather than record a lower birth weight and interfere with instinct. We are confident this process protects our customer and reflects true events of the ranch life. We do not expect these bulls to sire calves as heavy as they were, due to this process!

Please note not all EPDs are in the catalog, if you want to see them all please go to Angus.org.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started

simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding program for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your informa-

tion and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on Dish Network channel 998. Please note that there is a delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at both www.superiorlivestock.com and www.superiorclicktobid.com. The video feed on the homepage of www.superiorlivestock.com looks the same as the video feed on TV and can be watched over a smartphone or tablet. Remember you can call in to bid whether watching on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid".

Buyers will be contacted by the ranch after the sale for payment and delivery details. IF YOU NEED ANY ASSISTANCE CALL SUPERIOR AT (800) 422-2117.

A balanced trait bull sired by Powder Keg and out of a top-producing Made Rite 6238 daughter who has not sacrificed performance both pre and post weaning. EPDs rank this bull in the top 3% among non-parent Angus bulls for RADG EPD, top 20% for Doc EPD and \$Wean Value, and top 25% for Fat EPD. A maternal brother sold in the 2021 Sale to Mike Rinaldi of Jordan, Montana and another sold in the 2019 Sale to Brain Johnson of Leonard, Minnesota.

A potential heifer bull sired by the low birth weight Bobcat Powder Keg F1 with a CED EPD of +15 while not sacrificing any growth and the dam of this bull is a highly fertile, productive daughter out of Herbster Diamond 247 stemming from the great Everelda Entense family. EPDs rank this bull in the top 3% among non-parent bulls for SC EPD, top 25% for RADG EPD and Milk EPD, and top 30% for CED EPD, \$Energy Value, \$Maternal Weaned Calf Value and \$Wean Value. A maternal brother sold in the 2021 Sale to Brian and Becky Johnston of Saco, Montana.

A low birth weight bull whose pedigree is packed with longevity with EPDs placing him in the top 10% among non-parent Angus bulls for his Claw EPD, top 15% for BW EPD and HP EPD, and top 30% for CED EPD and Fat EPD. A maternal brother sold in the 2019 Sale to Chad Klinkhammer of Lengby, Minnesota, another sold in the 2018 Sale to Tim Hockett of Frazee, Minnesota, and a maternal sister was sold to the Lucky 7 Ranch of Bagley, Minnesota in 2013.

ANGUS GSSM

Powered by Neogen GeneSeek

FOR ANGUS. BY ANGUS.

Created by Angus Genetics Inc. (AGI) and powered by Neogen GeneSeek, our sale cattle have been tested with the first DNA profile designed specifically for Angus cattle, Angus GSSM.

Each marker is intentionally chosen from the Angus genome to drive the Angus breed into the future. It offers maximum accuracy for genomically enhanced EPDs at great value. Testing heifer and bull calves ultimately allows you to reap the benefits of faster genetic gain in your commercial herd. With Angus GS, it's all about you, our customer.

Commercial Bred Heifers

A group of 120 commercial bred heifers brought to us from Ryan and Micheal Hough that come from reputation breeding. These heifers have been Bangs vaccinated, are on a full vaccination program, have been given ScourBos and have been ultra-sounded safe in calf. These heifers are due to start calving April 15 thru May 10, 2022.

Ryan 701-388-1887 • Michael 218-329-0322

1-60 • BLUE TAGS

A group of heifers that came from the Larry and Gary Gross program up north. Bred for disposition, growth, and maternal strength. This group of 60 heifers has been Al'ed to the Wilde's Bomber 3137 who was the Lot 28 bull in the 2020 that sure turned heads. He records a CED EPD of +9 and a BW EPD of +.1 with a WW EPD of +74 and YW EPD of +125. This group of heifers should be great mothers with outstanding offspring from Wilde's Bomber 3137.

1-20 • WHITE TAGS

This group of heifers are Sim-Angus cross heifers that were Al'ed to the Select Sires calving ease specialist Connealy Comrade 1385 who has a CED EPD of +17 and BW EPD of -3.4. These heifers should calve easy and grow.

1-10 • PURPLE TAGS

Heifers that carry the genetics of the Schaff Angus Program and the Ellingston Angus Program which are both nationally recognized. This group of 10 heifers have been Al'ed to our home raised Wilde's In Focus 6201 with a CED EPD of +10 and BW EPD of +.9. These heifers should calve easy and the offspring should grow well and make great replacements.

1-10 • ORANGE TAGS

Heifers that carry the genetics of the Schaff Angus Program and the Ellingston Angus Program which are both nationally recognized. This group of heifers has been Al'ed to a new sire here at Wilde Angus, Bobcat Emerald H48 with a BW EPD of +1.0, WW EPD of 82 and YW EPD of 140, stemming from Connealy Confidence Plus.

1-10 • RED TAGS

Another group of heifers that carry the Schaff and Ellingston genetics who were bred to our herd sire Bobcat Powder Keg 1F who has CED EPD of +15 and BW EPD of -1.6 with a WW EPD of 65 and YW EPD of +122. Calving ease with growth!

1-10 • PINK TAGS

The last group of heifers were exposed to a Connealy Confidence Plus son who records a CED EPD of +15 and a BW EPD of -1.0 and to Wilde's Bragging 8152 who has a CED EPD of +15 and a BW EPD of -1.4. Sure-fire calving ease genetics.

1-6 • GREEN TAGS

Heifers that are from the Wilde Angus herd that are commercial. These 6 heifers were exposed to Whitestone Cash 9157, Points West Linchpin 1484, and Hollow Point Growth Fund. All three are calving ease sires balanced with growth and performance.

A

3-Year Old Mare

Birth Date: 05/06/19 Registration #: Pending

Diamond J Star	Grays Starlight
Travastar 5051048	Diamond J Playgirl
Special Travalena	Travalena
Playin In The Pudden	Special Tari
Shiny Head Sug 5348828	Freckles Playboy
Shiny Dawn	Smart Pudden
	Hickory's Peppy Boy
	Shiny Tamu Rey

Chestnut with three white socks and stripe.

A three-year-old mare that has been started, she is quiet, athletic, and wants to learn. We have used her here on the ranch, gathering and moving cows and she is a natural. We have thrown the rope off of her and got her used to different things you might encounter while riding out in the real world. If a good, solid ranch horse is what you're looking for, here she is.

Special Travalena	Travalena
Playin In The Pudden	Special Tari
Puddens Rowdy Lady 5520795	Freckles Playboy
Rowdy Barred Song	Smart Pudden
	Mr. Joe's Song
	Rowdy's Lady Bar

Red roan with one white sock

A 2-year-old gelding that has been started here at the Ranch. He is a full brother to the Lot B mare. He is quiet and has the potential to be a kids horse, ranch horse, or trail horse.

Lot C

D

2-Year Old Gelding

Birth Date: 2020 Registration #: Pending

Here is a 2-year-old gray gelding that hails from the Twitchell Ranch of Jordan, Montana. A big, stout, quiet, and easy to ride gelding that will make a great ranch or rope horse. He has been used to help gather cattle here at the ranch this winter and Wayne was the first to take him outdoors.

Lot D

Pack Camp

As the wind whistles over my tired swayed roof,
I am reminded of years gone by.
When campjacks hustled to re-stock my shelves,
With coffee and side pork to fry.

Off in the corner a gunny sack of oats,
On the table sit letters from home.
A bushel of beans, a tin of tobacco,
and fresh papers to “roll your own”.

There were high lines and lash ropes,
and folded manties piled there.
Saddle stoap by the stove in a jar; picket ropes coiled and hung on the wall,
With a bell for that soggy lead mare.

The gear was simple, worn, and well used,
But needed by men further up the trail.
There were horseshoes and staples, even barbed wire,
And a shiny new spring dippin pail!

When the cowboys stopped in, the loneliness faded,
Well at least for a short little while.
It's quiet up here and the clatter of hooves,
Was exciting and met with a smile.

You see, I am pack camp - I live at the gateway to the most scenic country,
I am simple and tucked off to the side.
Above me there's plentiful grass stocked with fine cattle,
And the mark of the pitchfork branded on their hide.

Oh the stories I could tell of the hands that rode in,
for some grub and hot cup of coffee or two,
A pull of some whiskey, cards played just right, a bedroll laid out,
and his rest till the sweet smell of dew.

The cavvy was tough, anxious and green,
Cool backs in the mornin' and eager to go.
They'd haul my supplies sporting perfect diamonds,
And well trianed by the first sight of snow.

For the camp smoke has ceased,
the smell of fresh biscuits no longer true,
The pack strings quit comin', the stories have silenced,
And the wind has finished me thru.
