Annual Bull Sale

April 9, 2022

1 p.m. PDT

Crater Ranch Headquarters

Winslow, Arizona

FINDING THE BALANCE

BAR T BAR RANCHES

"A CULTURE OF STEWARDSHIP"

Combining COWBOY LOGIC and COMPREHENSIVE TESTING

Want to Build a Better Cow(herd)?

It's time to Buy a Better Bull!

Bar T Bar bulls will build better cows!

It's no wonder, that despite two of the worst drought years in Arizona history, Bar T Bar is the leading 2021 breeder of Dams of Merit and Distinction in the Gelbvieh breed. Bar T Bar cows run under real world conditions. They produce highly fertile, efficient-sized cows that breed up and wean a high percentage

of their own body weight. The March bull calf pictured weaned off his four-year-old dam at 639 pounds at 200 days of age.

A four-year-old Bar T Bar cow that is weaning her third calf with a 365 day calving interval and a near perfect udder. Her Zoetis Fertility EPD ranks her predicted lifetime calf production in the Top 1% of the industry. She epitomizes what it means to be a better cow!

Bar T Bar Bulls

YOU MAKE THE COMPARISON

Popular Industry Bulls

Cow Herd Profit (\$Ranch)	
Selected to improve cow herd profit with the unique \$Ranch index – under real world conditions. The 2021 Bar T Bar bulls rank in the Top 5% of the industry for \$Ranch.	Selected for bigger growth and milk numbers under artificial seedstock conditions that result in cows that do not fit the environment.
Birth to Harvest Profit (\$Profit)	
Selected to balance the maternal requirements while still building more valuable calves. The 2021 Bar T Bar bulls average over +15,000 on \$Profit and rank in the Top 10% of the industry.	Industry average bulls are around \$8,000 on \$Profit. <i>This is \$70 per calf behind the average Bar T Bar 2021 bull.</i> Average bulls have too much feed intake, too much cow size, and not enough carcass merit.
Reduced Feed Intake and Feed Efficiency	
Bar T Bar has been measuring and selecting for reduced feed intake for a decade – to help you lower your feed costs!	Most of the industry does not even measure this trait. The result is selection for inefficient cattle that eat too much!

FINDING THE BALANCE

BAR T BAR RANCHES

"A CULTURE OF STEWARDSHIP"

Dear Customers and Friends old and new,

Three years of D4 and D5 drought, Covid, and now inflated costs remind us why genetics that influence the bottom line are so important. These bulls are out of cows that continue to breed and raise a calf on the range despite the dry times. In 2021, Bar T Bar Ranch was named the top producer of Dams of Merit and Distinction in the entire country. Few, if any, ranches can make these claims especially during three years of serious drought.

Through our alliance with Leachman Cattle of Colorado, \$Profit, \$Ranch, and \$Feeder we are providing predictable bulls that can move your program forward. You can have the confidence that using these indexes will produce cattle that are more efficient, have moderate mature size, are more fertile, and command a premium in the marketplace or on the rail.

The entire bull offering averages in the top 5% for \$Ranch. These bulls will make "Cows That Work and Steers That Pay".

We are the largest producer of Southern Balancers in the US. In fact, over 70 bulls offered this year carry a touch of ear. This would be the perfect time to add that aspect to your program, as you work towards rebuilding your cowherd. Southern Balancers can add that extra punch of hybrid vigor, longevity, and do-ability.

We will be using Superior Livestock Auction for the sale, videos, and off sight bidding. Make sure you sign up with Superior well ahead of the sale. If you have trouble with the click to bid process while watching, please use the Superior phone lines or call one of the Sale Day phones listed. We also have a new Bull Warranty Program which you can read about in this catalog.

Get your PAP lists to us by April 1st.

Bulls will be available for viewing all day Friday.

Friday night at 5 pm, join us for a pre-sale social at Meteor Crater. Browse the Crater at sunset with a cocktail and heavy hors d'oeuvres. At 6:30, in the Crater Theater, Lee Leachman will present, "Are You Really Building A Better Cowherd?". An RSVP would be appreciated to gauge size of attendance.

Remember we have a sight unseen buyer guarantee. Let us know if we can be of any assistance in helping in your Bull Selection.

All bulls will be ready to ship sale day. If you pick up at the ranch, we'll give you a \$75 per bull hauling credit. We have free delivery to Arizona and surrounding states to central points.

We want to thank the entire LCoC Crew for all they have done in Bull Development, Marketing, and helping us improve our product. We would also like to say a special thanks to Farm Credit West for sponsoring lunch on sale day.

Please let us know how we can be of assistance.

Sincerely,

All of us at Bar T Bar Ranch

Bar T Bar Ranch Annual Bull Sale • April 9, 2022

1 pm PDT • Bar T Bar Crater Ranch Headquarters • Winslow, AZ

Bull Tags: Each bull is wearing a colored breed tag. Breed tags correspond to the tattoo numbers and are colored as follows:

Yellow= Angus

Yellow w/ underline= 75% Angus and/or Red Angus

Yellow w/ star= 69-74% Angus and/or Red Angus

Yellow w/ underline & + = 80-99% Angus and/or Red Angus or 50AN/50AR

Blue = Brangus X Balancer

Blue w/ underline= 25% Brangus X Balancer

Blue w/ underline & star= 13% Brangus X Balancer

Blue w/ underline & + = 25% Brangus X 13% Beefmaster X Balancer

Green= Balancer

Green w/ underline= 69-86% Gelbvieh

Orange= 87-100% Gelbvieh

Red = Red Angus

Red w/ underline = Hybrid (anything that is less than 25% GV and 25% AN/AR)

Purple= Beefmaster X Balancer

Purple w/ underline= 25% Beefmaster X Balancer

Purple w/ underline & star= 13% Beefmaster X Balancer

White = Simmental X Balancer

White w/ underline = 25% Simmental X Balancer

White w/ underline & star = 13% Simmental X Balancer

Pink = 50% Santa Gertrudis x Balancer

One Year Guarantee!

Bar T Bar is offering a one year guarantee on all bulls that we sell. This guarantee will cover your purchased bull(s) against death, injury, infertility, and loss of use. If, during the first year from purchase, you lose the use of your bull for whatever reason, we will give you a credit towards the purchase of a new bull. We only ask that your herd veterinarian provide a written statement describing the death, injury, or infertility. If the bull in question can be salvaged, we would like you to keep the salvage value, and a credit will be issued, less the salvage amount you receive for the bull. If the bull is turned out for breeding, then the credit will be given at 75% of the original purchase value (less any salvage value). All claims must be made within 1 year from the date of purchase and cannot exceed the greater of 2 bulls per invoice or 15% of the total invoice.

Example 1: Your \$5,000 bull dies before you turn him out to breed. You receive a full credit of \$5,000. (Purchase Price - \$0 Salvage - \$0 Use).

Example 2: Your \$5,000 bull injures his scrotum after you pull him from the cows. You sell him for \$1000 in salvage. You receive a credit of \$2,750 (\$5000 purchase - \$1000 salvage - \$1250 usage).

Requirements for claims:

1. All claims must be made within 365 days of purchase.
2. A veterinary statement regarding the circumstances is required.
3. A verbal agreement from Bar T Bar Ranch is required prior to a bull being sold for salvage. Documentation of the salvage value of the bull, including identification of the bull on the sale barn ticket, that corresponds to the bulls Bar T Bar identifications (ear tag or metal clip) is also required.

This credit can be used for the purchase of bulls, females, semen, and/or embryos from Bar T Bar. If the credit is not used within 24 months of the date of issuance, then it will expire.

Note: Guarantee will be revoked on all bulls that are not paid for within 30 days of invoice date.

\$PROFIT™

Are all small cows really efficient? There seems to be a big disconnect in today's beef industry. On sale day we want heavy, high quality steers to pay the bills. The rest of the time we want efficient cows to keep our costs as low as possible. Simply selecting for smaller cows with no regard for feed efficiency is not the answer. Likewise, selecting for sheer growth with disregard for cost is just as poor of a strategy. The best way to make your cowherd truly efficient, and your calf crop earn more, is to use Leachman \$Profit™. This is the only index in the industry that works on both sides of the ledger (production AND cost). **Cows that work! Steers that pay!**

How \$Profit works:

\$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. The model assumes that you keep 30% of your heifers as replacements and that you retain ownership on the remainder

of the calves through finishing and sell on a grid. We realize that many don't retain ownership, but doesn't it make the most sense to select from birth all the way to slaughter? Feedlots have already proven their willingness to pay premiums for superior Leachman sired calves.

Our simulation model then factors in all of the effects on both income and expense to come up with a net profit figure for each bull. \$Profit allows you to compare any two bulls and calculate the difference in profit that they are expected to generate in your herd. Let's compare a \$10,000 \$Profit bull to \$6,000 \$Profit bull (the average 2008 born Angus bull). The predicted difference between the bulls is \$4,000 or about \$40 per calf. \$Profit works for us and it will work for you too.

What traits are included in \$Profit:

\$Profit includes nearly every trait that impacts profitability. The effect of most traits on profit is fairly simple to understand. Here is the list of what is included and its effect:

Revenue Traits

- Calving ease = more calves
- Weaning and yearling EPD = more weight
- Fertility (days to conception) = more weight and more calves
- Carcass weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums
- Ribeye area = value as impacts yield grade
- % Retail Product = more yield is more meat

Cost Traits

- Cow mature size = in general bigger eats more
- Cow intake = more intake costs more
- Feedlot feed efficiency = cost of gain

Some traits are not so easily characterized for \$Profit. Milk, for example, is a good thing until you get too much. When over +25, milk EPD has a more negative effect on fertility than it has a positive effect on weaning weight. There are a few traits not yet included in \$Profit: longevity, structure, and disposition. These traits are important but difficult to express in dollars.

Star System Explained:

Accuracy: The sire's level of accuracy is determined by the number of progeny that have been evaluated in the Leachman System.

- ★★★★★ Several progeny recorded, use with confidence (over 90% accurate).
- ★ Pedigree and individual data only (about 30% accurate).

Calving Ease: The predicted calving ease if you use the bull on heifers.

- ★★★★★ The easiest calving bulls in the industry.
- ★★★★ Use on smaller heifers with minimal assistance needed.
- ★★★ Use on larger heifers with some assistance expected.

(If no stars are shown, the animal is recommended for use on cows only.)

Growth: A formula combines WW and YW to predict how much performance the sire will pass on to their progeny.

- ★★★★★ Most growth.

Maternal: An estimate of the maternal efficiency of the daughters this sire will produce. It includes cow size, milk, udder quality, fertility/longevity, growth, feed efficiency/intake and calving ease.

- ★★★★★ Keep these heifers! They will make the most profitable females in the business.

Feedlot: A formula that combines: gain, conversion, carcass weight and carcass merit to predict post weaning performance.

- ★★★★★ Maximum overall value in your feeder calves.

Udder: An estimate of the daughter's udder quality.

- ★★★★★ Thumb size teats and tight bag suspension.

Fertility: An estimate of the amount of calves the daughters will have in their lifetime.

- ★★★★★ Will produce about 2 more calves in their life time than 1-Star fertility.

Disposition: An observation of the sires disposition.

- ★★★ Average - respects flight zones and handles well, but is not a pet.

Good	★ ★ ★
Better	★ ★ ★ ★
Best	★ ★ ★ ★ ★

Leachman financial indexes allow you to HAVE IT ALL!

\$Ranch: Profit from birth through weaning. Includes:

- Fertility, Milk, Growth
- Cow feed intake and mature size

\$Feeder: Profit from weaning to harvest. Includes:

- Feed conversion
- Carcass value
- Carcass weight

\$ Indexes Explained:

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
\$Profit	\$7,402	\$11,705	\$22,252
\$Ranch	\$25	\$39	\$74
\$Feeder	\$62	\$103	\$206

\$Profit: Puts it all together. **\$Ranch + \$Feeder.**

- **One number that predicts your bottom line!**

Feed:Gain: Difference in the amount of feed a bull's progeny will consume to produce one pound of gain.

Example: A -0.50 F:G EPD means this animal's progeny will consume 1/2 pound less feed per pound of gain than would progeny of a 0.00 F:G EPD sire.

Feed Intake: Difference in feed consumption of each of a bull's progeny in a 112 day feeding period.

Example: A steer whose sire has a -100 Intake EPD will eat 100 pounds less feed in 112 days than one whose sire had a zero Intake EPD.

Feed Efficiency Explained:

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
Feed:Gain	0.04	-0.04	-0.21
Intake	27	2	-61

Across Breed Comparisons

Dare to compare: You cannot afford to make mistakes in your breeding program! Choosing to use sires with incomplete or low value data can unknowingly make your herd less profitable – same work, same cost, poor results - unacceptable. Leachman ABC's are the most reliable and comprehensive EPD's in the industry. They are backed by a large (nearly a million), long-standing (over 30 years), multi-breed (over 15 breeds) database. Using this system assures you of making sound breeding decisions with minimal risk of failure.

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
BW	1.9	0.4	-3.3
WW	38	46	66
YW	64	79	115
MILK	21	25	36
SC	0.55	0.78	1.34
HT	0.62	0.80	1.24
MAT WT	29	15	-18
REA	0.53	0.67	1.02
IMF	0.22	0.36	0.70
CAR WT	831	845	878
BF	-0.04	-0.02	0.02
PAP	-0.45	-0.95	-2.16

*On the Ranch,
In the Feedlot,
& On the Rail,*

\$PROFIT™ simply works!

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – **this is not for dial-up or satellite internet**. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "clickto-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.

Marketing Assistance Program:

- Feeder Calves
- Replacement Females
- Bred Heifers, Cows and Pairs

If you need additional information on a particular program, call us at Bar T Bar Ranches.

Bar T Bar Females fit our outfit to a T!

"We were looking for some quality, foundation females to build a herd. So, we started buying bred females from Bob and Judy. We were really pleased with how they got out and covered our country. They hold their body condition well. Plus, there is no maintenance required at calving time. The temperament is outstanding. Best of all, my breed-back has been 92 - 95%"

*Scott Stratton
Dos S Land & Cattle, Willcox, AZ*

Cade, Jeanne, Scott, and Samuel Stratton

It's a good sign when your neighbors call about buying your heifer calves!

Cade Stratton and his dog, Gallo, admire the Bar T Bar cows on the Dos S Land & Cattle, at Willcox, AZ.

Real Ranchers - Real Tough Country - Real Results!

Bar T Bar bulls work in some of the toughest conditions in North America. They specialize in soundness and fertility - with added heterosis, optimal growth, and strong carcass merit.

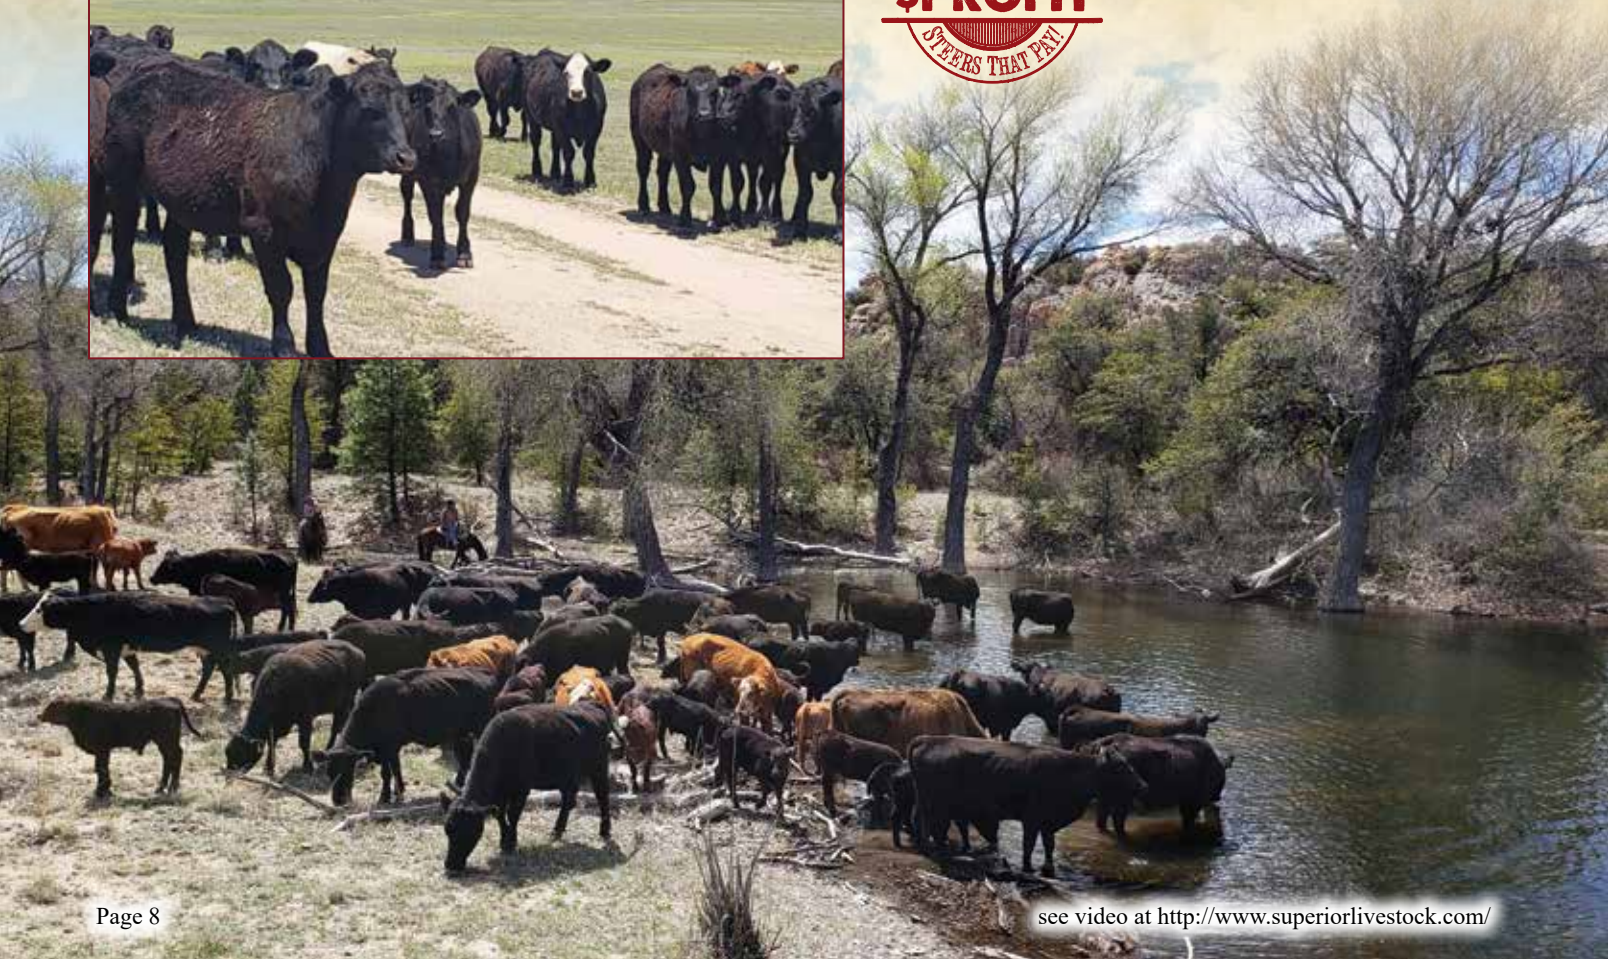

Don't take our word for it, here is what our customers have to say:

"We have been using Bar T Bar Balancer bulls for 15 years. The yearlings hold up just like Bob said they would. In 2020, we had good, early grass before the drought set in. Amazingly, our 3's and 4's came in 98% pregnant in our 90-day breeding season. We feed the calves out through Country Natural Beef and 90% of our last set hit the program requirements."

*Danny Major
Major Cattle Company
Chino Valley, AZ*

*Danny & Lyn and their daughters,
Natalie and Olivia*

Real Ranchers - Real Tough Country - Real Results!

Chapo Varela and Ray Rodriguez,
Sonora, Mexico

"In Sonora, our cattle have to have heat tolerance to survive 110° F temperatures with long, dry seasons and 85% humidity in the monsoons. Straight Bos Taurus bulls can't last the whole breeding season. Most American breeds have less libido than we want. For that reason, we have been using Bar T Bar Southern Balancers. Their ¼ blood of heat tolerant breeds works for us."

*Ray Rodriguez,
Rancher in Sonora, Mexico*

Four Generations of Cattlemen!

Judy Prosser's grandfather, Boss Chilson, pictured with one of the Carload of bulls they purchased at Denver in the early 40's. He was born in 1876.

Ernest and Evelyn Chilson in the early 1950's in the office at Crater Ranch.

2008 was a Bar T Bar Ranch Reunion celebrating 70 years of operation with 3 of the 4 generations represented.

Bar Ranch Co. managing Hereford herd and intro-Charolais, and Gelbvieh to program.

2000

Balancer recognized as a breed

2010

Southern Balancer recognized as a breed- Industry Excellence with a touch of ear.

2017

Awarded Range Manager of the Year by Arizona SRM. Bob was awarded Cattlemen of the Year by Arizona Cattlegrowers' Association.

1992

Fully committed to Composite bull program utilizing Balancer (Gelbvieh x Angus) genetics

2006

Awarded USFS National Rangeland Stewardship Award and Region 6 NCBA Stewardship winner.

2011

Bar T Bar & Flying M Ranch awarded BEEF magazine's Trail Blazer Award for our work with Diablo Trust

1990

2000

2010

2020

1981

Prosser's started and started Market Company for cattle management and bull development company

1998 (to Present)

The 1st or 2nd largest producer of Dams of Merit or Dams of Distinction in the US

2008

Started selling our commercial cattle through Country Natural Beef and collecting carcass data

2015

Installed Growsafe Feed Efficiency Testing System at headquarters and held first bull sale on the Ranch

1991

With the help of Ernest Chilson, Prossers purchased Bar T Bar Ranch.

2002

Implemented Ultrasound Scanning for Carcass traits and PAP testing.

2011

Began Individual Feed efficiency testing the bulls and held our sale in Nevada at Snyders'

Breeding efficient seedstock with the latest technology. . . .

Bar T Bar was one of the first operations to install a GrowSafe system and start measuring feed intake. Whether you are worried about feed costs, stocking rate, or reduction of your herd's carbon footprint – the solution is to select for cattle that EFFICIENTLY utilize FEED to produce MORE pounds. Plus every bull is scanned for carcass traits AND tested genomically! They specialize in soundness and fertility – with added heterosis, optimal growth, and strong carcass merit.

Most bull breeders just select for more and more yearling EPD – those bulls will lead to higher and higher feed costs for your herd! Feed consumption is the #1 driver of cost on your ranch.

Bar T Bar Heifers Earn \$211 More per Head

(Compared to 6,773 Other Gap 4 Head)

95% Choice & Better

Average YG: 2.8

Hot Carcass Weight: 851 lbs.

Ribeye Area: 13.4 Sq Inches

Gain Per Day 3.3 (vs Avg. of 2.6)

Cost of Gain Advantage: \$0.13/lb!

But still keeping the females right!

*The biggest challenge in the cow business
is balancing post weaning traits with maternal traits.*

Post Weaning

- Gain
- Carcass Weight
- Feed Conversion
- Ribeye & Marbling

Maternal

- Fertility
- Cow Size & Feed Intake
- Fleshing Ability
- Udder Quality & Disposition

– VS. –

Bar T Bar cows are objectively BETTER:

- More Udder Quality – ranking top 30%
- More Fertility – ranking top 25%
- More \$Ranch – ranking top 18%

Industry Leading Innovations:

Large scale commercial validation proves that Leachman \$Feeder works!

In a study involving 2,428 steers and heifers fed at Lincoln County Feed Yard, Zoetis provided Inherit Select DNA tests. Then, carcass data was collected. The individual EPDs accurately predicted changes in ribeye area, marbling, % premium quality grades, backfat, and carcass weight. This happened despite the cattle coming from 19 herds and 11 states. The cattle were harvested from 6/1/19 to 8/1/20 at Cargill Meat Solutions in Fort Morgan, CO. The cattle were then priced on a fixed market and grid.

\$Feeder Percentiles	# Head	Average \$Feeder	Avg. Actual Carcass Weight	Average Actual REA	Average Actual Marb Score	Choice & Higher	Upper 2/3 Choice & Higher	Percent Prime	Average Actual BackFat	Average \$ cwt	Average Grid Value

Top 10% v Bot 10%		188	44	0.8	94	16.1%	30.7%	15.1%	-0.064	\$6.28	\$135

The index successfully showed a value difference of \$135 per head between the animals in the top 10% for \$Feeder Index (at \$178) and those in the bottom 10% (at -\$11 \$Feeder). While individual feed intake data is not available, we believe that it would have shown additional value differences in favor of the index.

Imagine the feeders that you can build with using top indexing bulls!

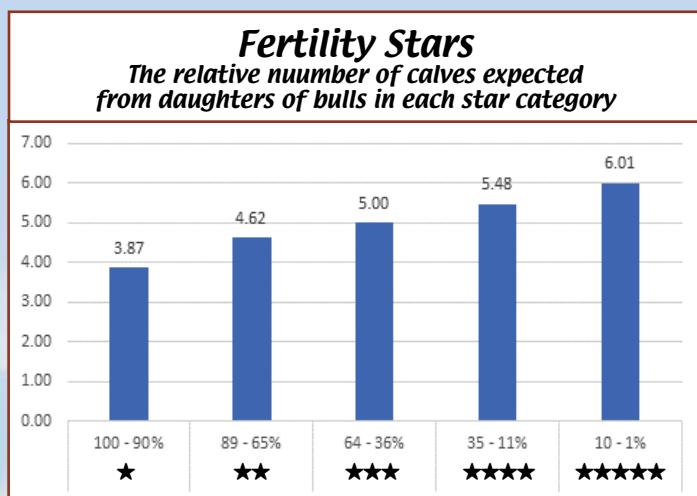

Industry Leading Innovations:

Zoetis Develops New Fertility (FRT) EPD

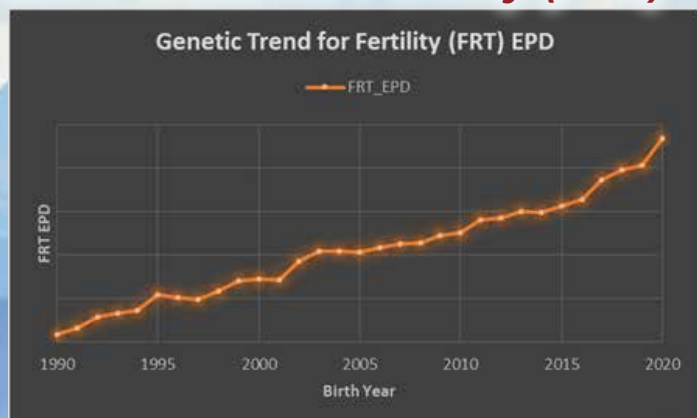

Using the 1.4 million animal Leachman database, Zoetis has developed a new fertility EPD. This FRT EPD predicts the number of calves that a bull's daughters will have in their lifetime. When the Leachman genetic trend is analyzed – it shows a huge positive trend. This is further proof that the Leachman program indexes are selecting for improved cowherd fertility over time.

How it works:

Using the FRT EPD will allow commercial herds to improve fertility and daughter retention in their herds. This year all bulls and females in the catalog have been assigned stars based on their percentile rank for FRT EPD

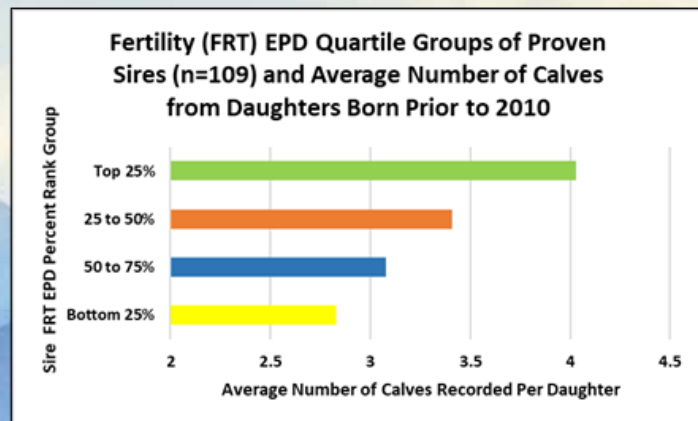

The Leachman Database Genetic Trend for Fertility (FRT)

Validation of FRT EPD:

An internal evaluation of FRT EPD for proven sires indicated favorable associated average number of calves produced by daughters. The evaluation grouped 109 sires according to their FRT EPD percent rank quartile. It evaluated daughters born prior to 2010 so that all were old enough to express recorded progeny up to eight calf crops at 9 years of age.

Bulls with FRT EPD in the top 25% (highlighted in green) sired daughters that on average produced over one more calf by 9 years of age as compared to the number of calves produced from daughters of sires in the bottom 25% for FRT EPD (highlighted in yellow). Additional validation of the FRT EPD is currently underway. Since the heritability of cow Fertility is lower as compared to other traits ($h^2 = .11$), the accuracy of FRT EPDs for non-parents is also typically lower.

FINDING THE BALANCE

BAR T BAR RANCHES

"A CULTURE OF STEWARDSHIP"

How to read this catalog

1. Reg#: the registration number of the animal. NotReg means the animal is not registered. Pending means that a registration number has been applied for, but was not issued at the time of catalog printing.
2. Brd: breed of the animal.
3. DOB: date of birth
4. Color: BBK=homozygous black, BLK = black, BWF = black white face, BBF = black brockle face, RED = red, RWF = red white face, WHT = white, BRC = black red carrier.
5. Mating type: E = embryo transplant, A = via artificial insemination, N = natural service
6. Sex: B = Bull, H = Female
7. P = polled. S = scurred. H = horned. PP = Homozygous Polled. PH = Heterozygous Polled.
8. Herd where the bull was raised.
9. Genetic Defect codes - a C appended to the end denotes carrier and an F denotes tested free and P denotes possible but untested.
NH - Neuropathic Hydrocephalus
AM - Arthrogyrosis Multiplex
CA - Contractural Arachnodactyly
OS - Osteopetrosis
DD -Developmental Duplication
10. Actual Birth Weight of the animal.

Phenotype Scores to Make Bull Buying Easier:

11. CE: Calving Ease is the predicted calving ease if you use the bull on heifers. If there is a number in the brown box, this indicates the breed calculated calving ease direct EPD. In addition, we provide the Leachman estimated calving star system. CED is AGA Calving Ease Direct.
***** The easiest calving bulls in the industry.
**** Use on smaller heifers with minimal assistance needed
*** Use on larger heifers with some assistance expected.
12. Growth: This is a score from one star to five stars, where

**** Teat/Udder Score, **** Fertility EPD

five stars means maximum growth. Even the one star bulls are as growthy as any bull in America 20 years ago.

13. Maternal: This is an estimate of maternal efficiency, NOT milk. It includes cow size, milk, fertility, and growth. The bulls are scored from one star to five stars. Five star bulls will produce some of the most profitable cows in the industry if you sell calves at weaning.
14. Feedlot: This looks at all of the post weaning traits including gain, conversion, carcass weight, and carcass merit. Scored from one star to five stars, where five stars would produce maximum overall value in your feeder calves.
15. Phenotype: A combination of eye appeal and overall kind. Scored from one star to five stars. Five star bulls are the best phenotypic bulls in the sale (in our opinion)! Two star bulls are less attractive visually than average.
16. Disposition: Our traditional score of 1 – 5 on disposition. Score 5 bulls are bulls you can walk up to and touch. Score 3 is about average historically for Bar T Bar bulls. However, we are making a concerted effort to improve disposition, so most bulls score 3 or higher. The bulls scored 2.5 or 2 are nervous and do not like to be in close quarters with people on foot – but they are great for big range operations.

EPDs/ABCs

Breed Association EPDs (Expected Progeny Differences) are listed for all registered animals. Leachman ABCs (Across Breed Comparisons) are listed for all un-registered animals. All ABCs are on an Angus base and can be compared across breeds within this catalog. EPDs are appropriate association EPDs without any adjustments.

18. Birth weight EPD/ABC expressed on an Angus scale (or

breed scale for Red Angus, and Charolais).

19. Weaning weight EPD/ABC expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
20. Yearling EPD/ABC expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
21. Milk EPD/ABC expressed on a breed scale. The Stabilizers are expressed on an Angus scale. This is the best predictor of a bull's daughter's ability to milk. It measures the difference in weaning weight that will be produced between one bull's daughters and another bull's daughters due solely to milk.
22. IMF is the ultrasound based EPD/ABC for marbling expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
23. REA is the ultrasound based EPD/ABC for ribeye area expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
24. MWT is the predicted mature weight of daughters that you will get if you use the bull on a 1250 pound cow. If your cows weigh 1350, add 100 to this predicted weight. If your cows weigh only 1150, subtract 100 from this predicted weight. This EPD is the best indicator of daughter size -- far better than frame score or yearling height.
25. F:G is the pedigree estimated feed to gain EPD that predicts the feedlot efficiency of the bulls offspring. A negative number means that the bull's progeny will feed more efficiently. Example: -0.50 means that the bulls progeny will require ½ pound less feed per pound of gain.
26. Intake: is an estimate of the amount of feed that the bull's progeny will consume over a 112 day feeding period. It is expressed in pounds. Animals with higher intake will consume more throughout their life. Animals with lower intake will consume less.
27. YHT is an EPD, expressed as frame score, predicting the yearling frame score of a sire's progeny, compared to that of other sires.
28. SC is an EPD, expressed in centimeters, predicting the yearling scrotal circumference of a sire's progeny, compared to that of other sires.
29. Bulls with the red "Southern Balancer" have > 12% American Breeds.
30. \$Ranch EPD: This Leachman profit index predicts weaning profitability based on calving ease, weaning weight, maternal milk, cow cost, and FERTILITY. Based on producing 100 calves. This EPD assumes a slide on calf prices of \$10 / cwt.
31. \$Profit™ EPD: This Leachman profit index provides one, simple, proven number that gives each trait a weight according to its impact on profit.
32. FT: Indicates the bull was individually measured for feed intake. Bulls without this notation, were not individually measured. Unmeasured bulls have EPD's based on their parental average.
33. PAP: PAP EPD. PAP scores available on Supplement sheet April 4th.

Key to bull comments:

- Any reference to % rank is the percentile rank within that bull's breed. Top 1% means the animal ranks better than 99% of the population on that trait.
- Reference to the number rank (i.e. #2 \$Profit) is the bulls rank within his breed within the sale bulls for that trait. So, #4 F:G ST means the 4th best Feed:Gain bull in the sale.
- All bulls are evaluated for foot soundness. Comments ending in "Feet-" score greater than 7 on the Angus foot score guidelines.
- All bulls have their new Fertility and udder EPDs in their footnotes.

For both traits:

- 5 star = top 10%
- 4 star = top 35%
- 3 star = 36% to 64% (average)
- 2 star = bottom 35%
- 1 star = bottom 10%
- Fertility: Predicts the number of calves that a bull's daughters will have in the first 8 years of their life. This is an early release of information from Zoetis. Validation is still underway to confirm the efficacy of this EPD. See page 5.
- Udder EPD: This EPD assesses the bag attachment and teat size of the bull's daughters. Bulls with 5 & 4 stars should sire females with exceptional udder quality.
- Other abbreviations used in the comments include:
 - Dam 5@101 NR – indicates that the bull's dam has five calves with an average weaning ratio of 101
 - WR & NR = weaning or nursing ratio. How the calf ranked within herd on their adjusted weaning weight.
 - YR = yearling ratio. How the calf ranked within herd on adjusted yearling weight.
 - AWW = adjusted 205 day weaning weight. AYW = adjusted 365 day yearling weight.
 - REA & IMF = either adjusted data or ratios for ultrasound ribeye area and inter-muscular fat (marbling).
 - ADG = average daily gain on test. WDA = weight per day of age at a year.

Want Good Bulls?

First, pick the right people.

Bob and Judy Prosser are third-generation Arizona ranchers who understand commercial cow-calf operations.

Then, pick the right cows.

This young female is on her third calf with a 365-day interval. She weaned more than 50% of her body weight and bred back.

THE BULLS WILL BE GOOD!

95 Red & Black Balancers Sell

50 Red & Black Southern Balancers Sell

The Bar T Bar herd leads the breed in efficiency – ranking in the lowest 10% for Dry Matter Intake and in the Top 20% for ADG. We are breeding cattle that eat less and gain more!

More Than 75 of the Bulls Will Be Sleep-at-Night Heifer Bulls!

Bar T Bar Ranches Annual Bull Sale

April 9, 2022, at 1:00 p.m. (PDT)

Southern Balancers, Balancers, Gelbvieh & Angus
Crater Ranch Headquarters · Winslow, AZ

AGRICULTURAL FINANCING

800.285.9810

Celebrating nearly 100 years of service to local agriculture!

Terms and Conditions: The cattle will sell under the Terms and Conditions of the American Gelbvieh Association and the American Angus Association. In the event of default in any part of the Terms and Conditions covering the sale by either the buyer or seller, it shall be the responsibility of the buyer or seller to instigate any action necessary to bring about a fair settlement of any claims arising from the sale and to be responsible for any costs included therein. The sale management assumes no responsibility, legal or otherwise, for the failure of either buyer or seller to fulfill their obligations.

Disclaimer: Although all has been done to make sure this is a safe sale to attend, please do so at your own risk. The owners of Bar T Bar Ranch or any of the Leachman Cattle of Colorado employees and the sale management take no responsibility for any accident or loss that you may incur.

Buy Bulls out of Cows that Thrive in Adversity!

The Bar T Bar 2022 sale bulls were all born in AZ in big range country and weaned in the drought of 2020. Nonetheless, they weaned with an average 630 adjusted weaning weight (AWW)! AND the cows bred up at 95% pregnant in 60 days. That is the definition of thriving in adversity!
