

High Altitude Sale

255 PAP-Tested Stabilizer Bulls

*Low PAP EPD Leachman Stabilizers
are the best solution for brisket disease!*

Saturday, December 3, 2022, at 11:00 a.m.

Loma Livestock LLC • Loma, CO

Leachman Bulls Build Better Cow Herds.

Leachman Bulls *Build Better Cow Herds*

Fertile. Good Doing. Sound. Extra Longevity.

*We offer the only bulls with
fertility AND udder EPDs!*

Leachman High Altitude Sale

255 PAP-Tested, High Altitude Stabilizer Bulls

Saturday, Dec. 3, 2022, 11:00 a.m. (MT)

Loma Livestock LLC • Loma, CO

Lee Leachman, CEO • www.leachman.com
Jerrod Watson, Bull Customer Service, (303) 827-1156
Aaron Rasmussen, Cowherd Advisor, (308) 763-1361
Semen Division: (970) 444-BULL (2855) • Office: (970) 568-3983

High Altitude Bull Sale

11 AM, Saturday, Dec. 3rd, 2022

Loma Livestock LLC • Loma, CO

A complimentary lunch will be served during the sale.

Sale Day Phones:

Sale Barn Office: (970) 858-9988
 Lee Leachman: (970) 219-8519 mb
 Craig Hays: (660) 373-1897 mb
 Jerrod Watson: (303) 827-1156 mb
 Aaron Rasmussen: (308) 763-1361 mb

Buyers reps:

Bruce Staton: (479) 675-6531
 Kevin Unger: (785) 470-1131

Auctioneer:
 Col. Trent Stewart
 (541) 325-3662

Bid on Superior:

Study the data in advance. Watch online. Bid live on the phone. See page 6 for details.

Livestock Press Representatives & Ringmen:

Jim Gies, Western Livestock Journal: (970) 454-3836
 Allan Sears, Western Ag Reporter: (970) 396-7521
 Kevin Murnin, Wyoming Livestock Roundup, WY (406) 453-4638
 Kelly Trout – Sweet, ID: (208) 584-3435

Delivery:

Free delivery within Colorado and Utah. Leachman will deliver to all other locations at \$0.25/head/mile. As an example, if you are 1000 miles from Loma, we will deliver for \$250 per head.

Sight Unseen:

If you cannot attend the sale contact Jerrod, Lee or Craig and we will select bulls for you. We have a 100% satisfaction guarantee -- if you are not completely satisfied when the bull is delivered, then we will provide a full refund.

Retained Semen:

Leachman Cattle of Colorado retains 100% semen collection and sale interest in all Leachman Stabilizer bulls. If you wish to purchase semen rights, contact a Leachman Representative.

Herd Health:

Bulls sell with a complete vaccination program and ready for turnout. Guaranteed sound and healthy. They sell with a complete breeding soundness evaluation. All bulls have been tested for Trichomoniasis.

How to read this catalog:

See page 70 for our Professional Bull Buyers Guide.

Terms and Conditions:

The cattle will sell under the terms and conditions at <http://www.leachman.com/terms.pdf>

PAP Testing:

All bulls have been PAP tested by Dr. Holt, above 8500 feet, in Walden, CO.

Sale Location and Directions:

The sale will be held at Loma Livestock LLC at 1369 12 1/2 Road, Loma, CO 81524. From I-70, take Exit 15. Proceed north on CR 13. Turn left (west) on Hwy 6. Sale barn is 1 mile west on your right.

Lunch:

A complimentary lunch will be available sale day.

75 Head of DNA tested, bred, Commercial heifers sell at the start of the sale, 11 AM MT
For more information on the heifers see pages 2-3.

Special Consignment!

“Using the high \$Profit Stabilizers has moved us from 35% Choice to 90%+ Choice

with very few yield grade fours. Our cows breed up over 90% in a 60 day period in very high, rugged, mountain country. The cattle are really sound, milk well, and make great replacements. Going on 20 years, they have been good cattle for me!”

~ Bill Trampe

**Trampe Ranch
Gunnison, CO**

**Heifers
have DNA enhanced
\$Profit and \$Ranch**

20 Red High Altitude Heifers sold in groups of 5 hd.

- **Over 20 years of sound disciplined Leachman Stabilizer Genetics**
- **Developed in high altitude country**
- **AI'd on June 17th**
- **AI Sire- Leachman Luxury M478G or Leachman First Class W306G (Top Stabilizer CE, High \$Profit, \$Ranch & Low PAP Sire)**
- **Cleaned up for only 30 days with Stabilizers**
- **Complete health and vaccination protocols**
- **Trampe Ranch contact:
Bill Trampe (970) 209-1304**

LCoC Note: Bill has developed one of the most outstanding high altitude herds anywhere. These are very sound functional females.

These Trampe heifers drift up to 11,700' during the summer.

Trampe bred heifers: 20 of which sold at the 2015 Leachman Loma Sale for a top of \$2,300 per head.

Special Consignment!

Technology lead to my success in the oil business- now I'm using it to build a better cow herd.

Low PAP is #1 for us. Leachman's PAP EPDs have virtually eliminated brisket disease in our herd. Our cow size is decreasing, weaning weights are up, and fertility is up. Plus our feedlot performance on gain, conversion, and carcass quality are all improving. By using AI, \$Profit, and PAP EPDs we are building more efficient, profitable, and satisfying cattle.

~ Doug Harris, Owner
Stirrup Bar Ranch
Crawford, CO

Heifers
have DNA enhanced
\$Profit and \$Ranch

55 hd.- 40 Black and 15 Red,
sold in groups of 5 hd.

- Have been buying top Leachman bulls for the last 8 years and are seeing rapid improvement on all economically relevant traits.
- Heifers are all out of Leachman Stabilizer bulls (Capitalist, Advance, Beacon, Party Barn or sons of these sires).
- Heifers were AI'd to Low PAP, Low BW Leachman Bulls on May 25 - supplement sale day.
- Low PAP, Low BW Leachman natural service sires were pulled on June 22
- Heifers were ultrasound preg checked on July 25th and again on Nov 15th
- Heifers are on a complete vaccination and deworming protocol including Scourguard 4kc (this Fall)
- Stirrup Bar Ranch contact:
Doug Harris (303) 819-7304

Heifers like these Sell!

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required. **This is not for dial-up or satellite internet.** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

*If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.

Updated Breeding Season Guarantee!

Effective Sept 1st, 2021

Leachman Cattle of Colorado is offering a 90 day breeding season guarantee, starting the first day of turnout, on all bulls that we sell. This guarantee will cover your purchased bull(s) against death, injury, infertility, and loss of use. If, during the first season, you lose the use of your Leachman bull for whatever reason, we will give you a credit towards the purchase of a new bull. We only ask that your herd veterinarian provide a written statement describing the death, injury, or infertility. If the bull in question can be salvaged, we would like you to keep the salvage value, and a credit will be issued, less the salvage amount you receive for the bull. If the bull is turned out for breeding, then the credit will be given at 75% of the original purchase value (less any salvage value). All claims must be made within 1 year from the date of purchase and cannot exceed the greater of 2 bulls per invoice or 15% of the total invoice.

Example 1: Your \$5,000 bull dies before you turn him out to breed. You receive a full credit of \$5,000. (Purchase Price - \$0 Salvage - \$0 Use).

Example 2: Your \$5,000 bull injures his scrotum after you pull him from the cows. You sell him for \$1000 in salvage. You receive a credit of \$2,750 (\$5000 purchase - \$1000 salvage - \$1250 usage).

Requirements for claims:

1. All claims must be made within 365 days of purchase.
2. A veterinary statement regarding the circumstances is required.
3. A verbal agreement from Leachman Cattle of Colorado is required prior to a bull being sold for salvage. Documentation of the salvage value of the bull, including identification of the bull on the sale barn ticket, that corresponds to the bulls Leachman identifications (ear tag or metal clip) is also required.

This credit can be used for the purchase of bulls, females, semen, and/or embryos from Leachman Cattle of Colorado. If the credit is not used within 24 months of the date of issuance, then it will expire.

Note: Guarantee will be revoked on all bulls that are not paid for within 30 days of invoice date.

Leachman Cattle of Colorado is committed to helping ranchers reduce the losses from brisket disease.

We know from our own cowherds that losing calves to brisket at any time from birth through yearling stage can have significant financial cost. We are convinced that pulmonary artery pressure (PAP) scores are very strong predictors of whether or not animals will have the disease. For this reason, we have collected over 8,200 PAP scores on cattle in our program.

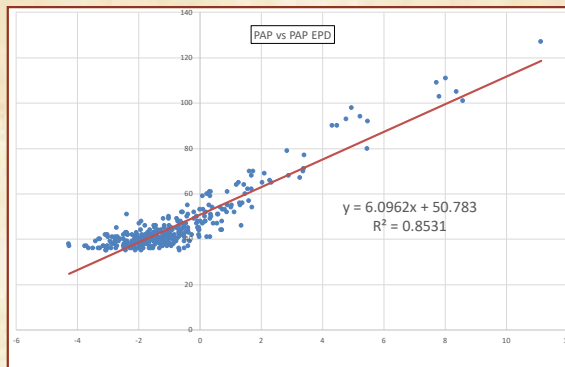

Unfortunately, taking measurements will not solve the problem. Most ranchers know that buying PAP tested bulls reduces the problems with brisket, but most still report losing 3% - 8% of their calves to brisket depending on the year. This level of calf loss is still unacceptable!

We believe that the best strategy to reduce brisket disease is to use genomically enhanced expected progeny differences (EPDs) for PAP. Think of selecting for low birth weight. Just buying bulls under 80 pounds would help calving ease, but using low birth weight EPD bulls is a much more effective strategy. This is true, because an EPD takes into account much more information. For example, buying a 75 lb. BW bull out of a sire that generally sires very heavy calves is far less likely to be easy calving than is a similar BW bull out of a sire that generally sires light calves. The same is the case with PAP.

Our PAP EPD closely relates to the actual PAP score of the bulls as shown in the graph below. The correlation between the PAP scores and the PAP EPDs are 85%. This is typical in a trait like PAP that is 30% heritable. However, as with all EPDs, you can see that some bulls score better or worse on the EPDs than on the actual score. Ranchers concerned with PAP scores should use the EPDs – not the actual PAP scores.

Key points to regarding PAP and PAP EPDs:

- We have taken 7,700 PAP scores (all by Dr. Tim Holt).
- PAP is 30% heritable.
- The PAP EPDs reported were calculated by Zoetis. They include information related to the genomics of the bulls. This increases the accuracy of the prediction, even without a PAP test.
- Selecting bulls using the PAP EPD is FAR more accurate than simply using the PAP scores.
- Herds that have significant brisket disease should use the lowest PAP EPD bulls.

Dr. Tim Holt PAP Testing.

Leachman Cattle of Colorado guidelines for high altitude selection of cattle.

AGE:	Yearling	Yearling	18 months +
Elevation:	6000 ft and lower	7,000 ft and higher	8,000 ft and higher
Low Risk	41 and lower	42 and lower	45 and lower
Moderate Risk	42 to 48	43 to 48	46 to 51
High Risk	49 and higher	49 and higher	52 and higher

EPD Criteria	Results:
+3.0 and higher	30% Calf Loss
0.0 and lower	Little to no loss
-0.7 and lower	Improve herd

If you are taking our bulls to altitude, please only buy bulls that are below -0.7 on PAP EPD.

The following PAP guarantees ONLY apply to bulls with PAP EPDs of under -0.7.

1. You can take the bull home to altitude, test the bull with your other Leachman bulls, and then decide whether or not to keep or return the bull. Transportation will be at your expense. Any returned bulls must be virgins and must be unbranded.
2. If you decide to keep the bull, all -0.7 or less PAP EPD Leachman bulls will be guaranteed for brisket disease for four years. If they die, you will need to document their ID and photograph their heart to show that the death was caused by brisket. At that point, we will give you a credit equal to the original purchase price less 25% for each season the bull was turned out with the cows. For clarification, if the bull dies during or after the first season, you will receive a 75% credit. If the bull dies during or after the 2nd season, you will receive a 50% credit. If the bull dies during or after the 3rd season, you will receive a 25% credit. If the bull is turned out for the fourth season, then no credit would apply.

BUILD A LEGACY

**Get \$Ranch & \$Profit
on Your Replacement
Heifers**

Generations of breeding decisions have laid the foundation for your herd. Now you can continue—and improve—that legacy with INHERIT Select,[™] a genomic tool to help cow-calf producers with crossbred cattle make more informed selection and breeding decisions.

INHERIT Select provides the industry with Genomic Expected Progeny Differences (GEPDs) for 16 traits that inform three economic indexes which simplify complex information to make better management decisions easier.

THE VALUE OF MORE INFORMED DECISIONS

A replacement can take about 4 years to break even.¹ Identifying females that produce more valuable calves can add value long term.

With GEPDs and indexes provided by INHERIT Select, you can make earlier and better selection decisions to identify future replacements. Selecting the right replacements is critical to the future of your herd, and has a direct impact on short-term profitability.

- Earlier marketing decisions can help reduce heifer-raising costs and generate revenue.
- Future herd productivity is accelerated by selecting females with more favorable predictions.

HARNESSE HYBRID VIGOR AND SIRE PARENTAGE

INHERIT Select identifies genomic approximations of breed composition to help harness hybrid vigor and optimize production efficiency by:

- Determining emphasis by breed contributing to crossbred GEPDs
 - Incorporating parent information for improved accuracy
- Indicating potential maternal hybrid vigor that favorably impacts reproduction, fitness and survival traits
- Helping to inform breeding decisions in future calf crops

Every Leachman sire sells with Genomically Enhanced EPD's from Zoetis!

What does that mean to you as a bull buyer?

1. **More accurate EPD's.** The bulls you buy have more accurate EPDs because of the genomically enhanced (GE) Zoetis analysis of our 1.4 MM animal database. In rough terms, these GE EPDs are TWICE as accurate as non genomically enhanced EPDs.
2. **Parentage is verified on every bull we sell.**
3. **Far more accuracy on the maternal traits that cannot be measured on a bull.**

These traits include mature size of a bull's daughters, daughter fertility, daughter milk production, and daughter teat and udder quality!

What can Inherit™ do for you as a commercial producer?

1. **You can have EPDs to select your replacement heifers.** You invest \$1,500 to \$2,000 in every replacement heifer that you keep back and put into production. Unfortunately, without data, this process is difficult. In particular, we keep females that come up open and fall out of the system.
2. **You can eliminate heifers that don't fit your specifications.** With EPDs, you can select optimal levels of milk, size, and feed requirements.
3. **You can create higher value feeder calves.** By selecting for the Zoetis Feeder Calf index, you can improve feedlot performance and carcass value in your future calves.

What can HD50K™ do for you as a seedstock breeder?

1. **Get GE-EPDs and Leachman \$Ranch, \$Feeder, and \$Profit on your cattle.** By contributing your seedstock data to the Leachman \$Profit Share database, you will be joining leading seedstock producers from around the world. You will have predictions on the feed cost on your animals. You will also have global comparability for your genetics as our database includes cattle from the US, Canada, New Zealand, Australia, and the UK -- making it the largest, private, multi-breed, beef cattle database in the world.
2. **Gain a new way to help your commercial customers.** By linking your genetics to your customers replacement females, you provide improved services to your customers. You can become directly involved in helping them interpret their Inherit Select results. This will make them more loyal customers and better bull buyers.

For Commercial Herds

For Seedstock Herds

We make bull buying easy!

When it comes to picking bulls, the first thing you need to do is choose how to balance the traits. Maternal vs Terminal. \$Ranch vs \$Feeder. Moderate cow size & fertility vs growth and carcass weight. Leachman Cattle provides MORE data than any other bull producer. We also provide BETTER data.

Most catalogs are pretty good at telling you which bulls are terminal -- just look at indexes like \$Feeder, \$Beef, or TI, or TSI. However, there are almost no good indexes for finding ideal maternal bulls. At Leachman, we have had the \$Ranch index for some time. Now, we also have Udder stars and Fertility stars. As of today, neither Udder nor Fertility is in \$Ranch. Thus, the best Maternal bulls combine \$Ranch, Udder and Fertility.

This year, we are introducing a new concept: AllAround Bulls™ These bulls score four stars or more on BOTH Maternal and Feed/Carc. They are elite for both \$Ranch and \$Feeder. By definition, they are high on \$Profit. The Leachman sale offer more 4-Star AllAround Bulls and higher than any other sale in the country. Why or how? Simply put, we select for these bulls.

The AllAround Specialists are scored 4, 4.5, and 5 Stars. 5-Star AllAround bulls are five for both Maternal and Feed/Carc. 4.5-Star AllAround bulls are 4 on Maternal or Feed/Carc and 5 on the other. 4-Star AllAround bulls are 4 stars on both Maternal and Feed/Carc. We think that these AllAround bulls are the most valuable bulls in the industry. They give you maximum flexibility to keep heifers, sell calves, and/or feed our your calves and sell on a grid. These bulls will bring a little more, but they are worth it.

First choose your trait emphasis.
Then buy as much \$Profit as you can afford.

Choose between:	Maternal trait Emphasis	Terminal trait Emphasis	Balanced trait Emphasis
What you get:	Moderate, fertile, long-lived cows More pounds per acre	High gaining and heavy carcass weight Better conversion and more grid value	These bulls combine 4 & 5 stars on both Maternal & Feed/Carc
How you get it:	Buy Four & Five Star Maternal bulls	Buy Four & Five Star Feed/Carc bulls	Buy bulls with 4 - 5 AllAround Stars
Footnote designation:	Maternal Specialists	Terminal Specialists	AllAround Specialists

NOTE: AllAround bulls can also be used as either Maternal or Terminal Specialists. They are just as good as the specialist. Be sure to include them on your lists.

Hooks Capitalist 37C

This 5-Star Accuracy, 5-Star Maternal, Senior AI Herd Sire exemplifies the tremendous opportunity within our system to build an elite commercial herd that will stand the test of time. \$Ranch 94 (Top <.1%), F:G -.05 (Top 20%), Intake -23 (Top 10%), Mat. Wt. -12, Gest. -1.8, 4-Star Udder, 4-Star Disp., 5-Star Fertility. All with proven Balanced Proofs and a -3.4 bw. ABC/EPD.

☆☆☆☆☆
Five-Star
MATERNAL

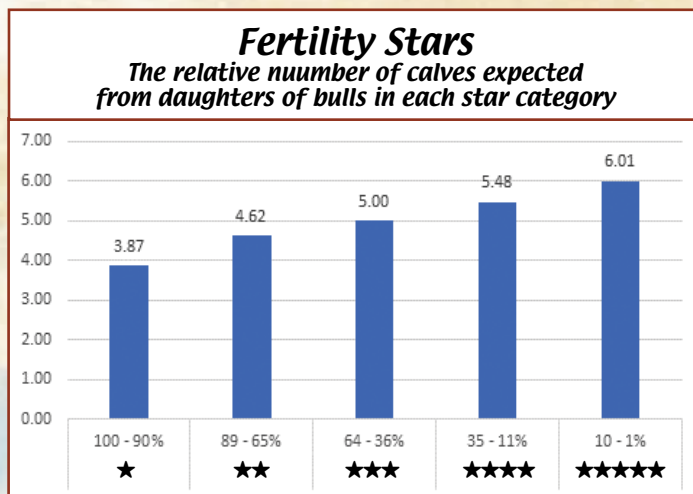

Leachman - Zoetis Update:

Zoetis Develops New Fertility (FRT) EPD

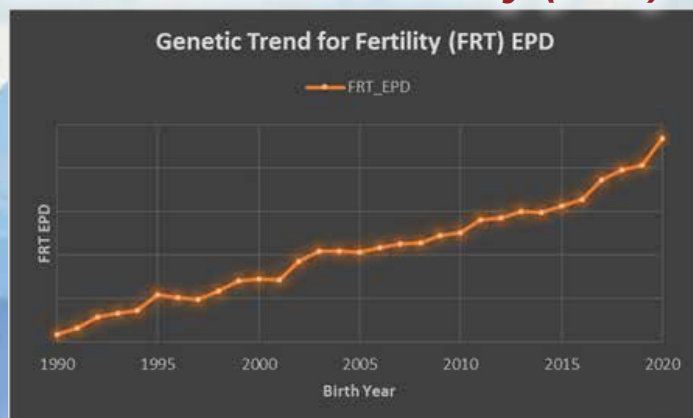

Using the 1.4 million animal Leachman database, Zoetis has developed a new fertility EPD. This FRT EPD predicts the number of calves that a bull's daughters will have in their lifetime. When the Leachman genetic trend is analyzed – it shows a huge positive trend. This is further proof that the Leachman program indexes are selecting for improved cowherd fertility over time.

How it works:

Using the FRT EPD will allow commercial herds to improve fertility and daughter retention in their herds. This year all bulls and females in the catalog have been assigned stars based on their percentile rank for FRT EPD

The Leachman Database Genetic Trend for Fertility (FRT)

Validation of FRT EPD:

An internal evaluation of FRT EPD for proven sires indicated favorable associated average number of calves produced by daughters. The evaluation grouped 109 sires according to their FRT EPD percent rank quartile. It evaluated daughters born prior to 2010 so that all were old enough to express recorded progeny up to eight calf crops at 9 years of age.

Bulls with FRT EPD in the top 25% (highlighted in green) sired daughters that on average produced over one more calf by 9 years of age as compared to the number of calves produced from daughters of sires in the bottom 25% for FRT EPD (highlighted in yellow). Additional validation of the FRT EPD is currently underway. Since the heritability of cow Fertility is lower as compared to other traits ($h^2 = .11$), the accuracy of FRT EPDs for non-parents is also typically lower.

These Real World Ranchers Are Building Elite Cowherds!

These three ranchers are from different states and different environments. Nonetheless, they all are using the same strategies to build an Elite Cowherd.

Travis & Todd Weinrich
Pierce, NE
on the eastern edge
of the NE Sandhills

Bill & Diana Matheson
Walden, CO
at 8,500+ feet of elevation
in big winter country

Glenn Gay
Broadus, MT
in the semi-arid
grasslands of SE Montana

These three ranchers all have the same basic three step strategy:

1. Exclusively use high \$Profit Leachman Stabilizer bulls
2. Pick their replacements with the Zoetis Inherit Select DNA test.
3. Be disciplined by repeating steps one and two.

**By using this simple plan, they are simultaneously
building cows that work in their diverse environments
AND they are building steers that pay
when fed out to harvest.**

“Our 2022 carcass results were off the charts...”

~ Travis Weinrich, Pierce, NE

Travis and Todd Weinrich (son & father)

“On 363 steers and heifers we graded 96.5% Choice and higher. This included 19% Prime. Plus, they yielded 64% at an average carcass weight of 887 lbs!”

“We started using Leachman Stabilizers in 2014 and switched to 100% Leachman bulls in 2015.”

“We can’t afford high-priced bulls, but for \$6,000-\$7,000 we get bulls in the Top 2% or better on \$Profit.”

“The hottest thing we found in 2021 was the INHERIT DNA test for our heifers.”

***“I’m not a bean counter –
I focus on the fundamentals
of my cow business and
land stewardship.”***

~ Glenn Gay, Broadus, MT

***“I DNA tested 400 replacements
with Inherit this Spring. I sorted
for the \$Ranch I wanted. Then I
walked through and kicked out
the ones I didn’t like. I believe
in the genomics to select
my replacements.”***

***“I like retained
heterosis (hybrid vigor).
Stabilizer bulls make
crossbreeding simple.”***

***“I want to keep things
simple and low input –
that’s why I let Lee
buy high \$Profit bulls
that fit my specs.”***

***“We started using
Leachman Stabilizers
in 2006. Today, we
don’t own a bull that
isn’t from Leachman.”***

“Stabilizers do what Bill and I want...”

*~ Diana Matheson
Walden, CO*

Bill & Diana Matheson

“We started using Leachman bulls in 2012. Now we only use Leachman PAP-tested Stabilizers. They minimize the number of calves we lose to congestive heart failure (brisket disease).”

“We experimented with many different breeds. They each have some good attributes, but many limitations at our altitude of over 8,000 feet. Stabilizers successfully combine the best of multiple breeds and have eliminated the less desirable traits.”

“We Inherit DNA tested our replacements. This is a huge step – now we can find cows with more fertility and longevity, while avoiding problem females.”

“We had only one dropsy (brisket disease) calf this summer!”

Almost all of our bulls are Leachman Stabilizers – PAP tested up here near Walden. We can buy with confidence in the PAP, the PAP EPD, and the \$Profit.”

*Blaine Evans
Coalmont, CO*

Here is what I learned about Brisket Disease the hard way, as a cowman, mountain rancher, and practicing veterinarian...

- 1. I've heard every excuse, explanation, and possible cure – none of them were right and none of them worked.*
- 2. I learned first hand that drugs and management could not prevent Brisket Disease caused by high altitude, nor did natural selection of native cattle lead to much improvement.*
- 3. Back in the 80's, we started looking for genetics acclimated to high altitude – with little success.*
- 4. In 2005, we started buying Leachman Stabilizers. At first, we would bring them up and test them on the ranch. They would swap out any that failed.*
- 5. Now, with the bulls tested at 8500 feet – we can shop with confidence. We don't worry about re-testing.*
- 6. Low PAP test bulls survive at altitude – but low PAP EPD bulls sire calves that survive at altitude. We are big believers in the system.*

The entire herd is now solid black or red with a few baldies. The cattle thrive in the North Park, high mountain environment.

Leachman Stabilizers - An American Beef "Breed" Success Story

- **Built on Science:** First designed in the 1970's by USDA ARS scientists at the Meat Animal Research Center as the Marc II composite: ¼ Red Angus, ¼ Hereford, ¼ Simmental, ¼ Gelbvieh.
- **Privatized:** A private herd was developed by Pat Vinton, Gordon, NE and later sold to the Tessari family in Babb, MT – thus becoming the foundation for the Leachman Stabilizer herd.
- **Modernized:** From 1988 – 2003, Leachman modernized the Stabilizer composite:
 - Reduced the birth weight.
 - Made the cattle solid colored and polled.
 - Increased the post weaning gain.
 - Improved convenience traits including disposition and udder quality.
 - Introduced black lines in addition to the original red lines.
 - Injected top hybrid and purebred sires from the Angus, Simmental, and Gelbvieh breeds.
- **Moved to Colorado:** In 2003, Leachman Cattle of Colorado was formed with a nucleus of cooperators that included the Tessari herd and several other Stabilizer cooperators.
- **Selected with \$Profit™:** LCoC began selecting the Stabilizer using \$Profit with significant results:
 - Dramatic further reduction in birth weight while increasing yearling growth.
 - Significant improvement on marbling to now exceed average marbling Angus cattle.
 - Substantial selection for reduced feed intake and improved feed efficiency.
 - All of which coincided with a huge annual progress on \$Profit.
- **Expanded Internationally:** In 2016, Leachman offered genetic analysis services to Stabilizer breeders in the UK, New Zealand, and Australia. This expansion increased the total Stabilizer herd being selected for \$Profit to over 20,000 breeding females. Genetics are now flowing to and from each of these herds – increasing the rate of global selection improvement.
- **Enhanced by DNA:** In 2020, we partnered with Zoetis to build the largest, most accurate, composite DNA database in the world. This nearly doubles the accuracy of yearling EPDs, allowing even more rapid genetic improvement.
- **Today:** The most scientifically advanced, well identified, composite gene pool in the world.

Dr. Keith Gregory

Excerpts from a 2001 letter written by Dr. Keith Gregory, Research Geneticist at U.S. Meat Animal Research Center (MARC) to Jim Leachman:

“Your contributions to beef cattle breeding are unmatched in the history of beef cattle breeding. No one has had a greater impact on beef cattle breeding on a global basis. I have stated on several occasions that no one is implementing more of the available beef cattle breeding technology than Leachman Cattle Company.”

Is She a Good Cow?

A 1,250 lb. Top 1% \$Ranch five-year-old *Stabilizer* cow calved at 23 months, has bred and calved in the first cycle four times with a 365 day calving interval, and has weaned an average of 698 lbs. per calf.

Most profit minded ranchers increasingly see the key to profitability as controlling costs while still increasing performance. For them, the key cow herd profitability factors are:

- Moderating feed intake so you can run more cows on the same land.
- Improving longevity to reduce the costs of turnover and depreciation.
- Increasing fertility so that more cows bring in a calf every year.
- Adding hybrid vigor to increase pounds weaned per cow exposed.

Buying high growth, high carcass, purebred bulls that have been selected for maximum output will not build a low cost, high profit cowherd.

- Leachman's \$Ranch index will move your herd in the right direction on all of these factors.
- The \$Profit index will help you improve your cows and make steers that earn premiums.
- Using Leachman Stabilizers is the simplest crossbreeding strategy you can use: Retain 75% of the original F1 Hybrid vigor, while creating a uniform calf crop.

To learn more, see our video on
Building a More Profitable Cowherd at www.leachman.com.

Call 970-444-BULL today to find out about putting Leachman Stabilizer genetics to work in your herd.

#20 Feed:Gain EPD, Top 1% \$Ranch and Marbling EPD
4-Star Maternal Specialist

I bought my first Leachman bull in April of 1994 – 27 years ago.

The cattle have worked for us – some better than others – but we've seen an amazing amount of improvement over the years. For twenty years, I bought everything sight-unseen, but now we try to make the Spring sale and the Loma sale.

*~ Rod & Tammy (not pictured) Cook
RT Cook LLC, Craig, CO*

We are keeping a high percentage of young females – that accelerates our rate of genetic improvement!

Our average 2021 born calf ranks at the top of the Leachman system:

\$Profit	\$Ranch	\$Feeder	BW	WW	YW	Milk	MWT
19,133	58	148	-1.1	46	84	26	1250
BckFat	IMF	REA	F:G	Intake	Fert	Udder	PAP
-0.01	0.72	0.64	-0.06	31	–	–	-1.0

We were fortunate to raise the high selling bull in the 2020 Loma sale, Leachman Starfleet U874G, that sold for \$26,000. He has a \$Profit of \$26,826 and a PAP EPD of -2.3. His dam is now a coming five-year-old and has near perfect teat structure. I guess that's why Starfleet has a five star udder EPD.

\$PROFIT™

Are all small cows really efficient? There seems to be a big disconnect in today's beef industry. On sale day we want heavy, high quality steers to pay the bills. The rest of the time we want efficient cows to keep our costs as low as possible. Simply selecting for smaller cows with no regard for feed efficiency is not the answer. Likewise, selecting for sheer growth with disregard for cost is just as poor of a strategy. The best way to make your cowherd truly efficient, and your calf crop earn more, is to use Leachman \$Profit™. This is the only index in the industry that works on both sides of the ledger (production AND cost). **Cows that work! Steers that pay!**

How \$Profit works:

\$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. The model assumes that you keep 30% of your heifers as replacements and that you retain ownership on the remainder

of the calves through finishing and sell on a grid. We realize that many don't retain ownership, but doesn't it make the most sense to select from birth all the way to slaughter? Feedlots have already proven their willingness to pay premiums for superior Leachman sired calves.

Our simulation model then factors in all of the effects on both income and expense to come up with a net profit figure for each bull. \$Profit allows you to compare any two bulls and calculate the difference in profit that they are expected to generate in your herd. Let's compare a \$10,000 \$Profit bull to \$6,000 \$Profit bull (the average 2008 born Angus bull). The predicted difference between the bulls is \$4,000 or about \$40 per calf. \$Profit works for us and it will work for you too.

What traits are included in \$Profit:

\$Profit includes nearly every trait that impacts profitability. The effect of most traits on profit is fairly simple to understand. Here is the list of what is included and its effect:

Revenue Traits

- Calving ease = more calves
- Weaning and yearling EPD = more weight
- Fertility (days to conception) = more weight and more calves
- Carcass weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums
- Ribeye area = value as impacts yield grade
- % Retail Product = more yield is more meat

Cost Traits

- Cow mature size = in general bigger eats more
- Cow intake = more intake costs more
- Feedlot feed efficiency = cost of gain

Some traits are not so easily characterized for \$Profit. Milk, for example, is a good thing until you get too much. When over +25, milk EPD has a more negative effect on fertility than it has a positive effect on weaning weight. There are a few traits not yet included in \$Profit: longevity, structure, and disposition. These traits are important but difficult to express in dollars.

Star System Explained:

Calving Ease: The predicted calving ease if you use the bull on heifers.

- ★★★★★ The easiest calving bulls in the industry.
- ★★★★ Use on smaller heifers with minimal assistance needed.
- ★★★ Use on larger heifers with some assistance expected.

(If no stars are shown, the animal is recommended for use on cows only.)

Maternal: An estimate of the maternal efficiency of the daughters this bull will

produce. It includes cow size, milk, udder quality, fertility/longevity, growth, feed efficiency/intake and calving ease.

- ★★★★★ Keep these heifers! They will make the most profitable females in the business.

Fertility: An estimate of the amount of calves the daughters will have in their lifetime.

- ★★★★★ Will produce about 2 more calves in their life time than 1-Star fertility.

Udder: An estimate of the daughter's udder quality.

- ★★★★★ Thumb size teats and tight bag suspension.

Growth: A formula combines WW and YW to predict how much performance the bull will pass on to their progeny.

- ★★★★★ Most growth.

Feed/Carc: A formula that combines: gain, conversion, carcass weight and carcass merit to predict post weaning performance.

- ★★★★★ Maximum overall value in your feeder calves.

Feet: An observation of the bull's claw shape.

- ★★★ Average, 4 & 5 star will improve you herd.

Disposition: An observation of the bull's disposition.

- ★★★ Average - respects flight zones and handles well, but is not a pet.

Pheno: An observation of the bull's type and kind.

- ★★★ Average - 4 and 5 star bulls will add phenotype.

Good	★ ★ ★
Better	★ ★ ★ ★
Best	★ ★ ★ ★ ★

Leachman financial indexes allow you to HAVE IT ALL!

\$Ranch: Profit from birth through weaning. Includes:

- Fertility, Milk, Growth
- Cow feed intake and mature size

\$Feeder: Profit from weaning to harvest. Includes:

- Feed conversion
- Carcass value
- Carcass weight

\$ Indexes Explained:

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
\$Profit	\$7,402	\$11,705	\$22,252
\$Ranch	\$25	\$39	\$74
\$Feeder	\$62	\$103	\$206

\$Profit: Puts it all together. **\$Ranch + \$Feeder.**

- **One number that predicts your bottom line!**

Feed:Gain: Difference in the amount of feed a bull's progeny will consume to produce one pound of gain.

Example: A -0.50 F:G EPD means this animal's progeny will consume 1/2 pound less feed per pound of gain than would progeny of a 0.00 F:G EPD sire.

Feed Intake: Difference in feed consumption of each of a bull's progeny in a 112 day feeding period.

Example: A steer whose sire has a -100 Intake EPD will eat 100 pounds less feed in 112 days than one whose sire had a zero Intake EPD.

Feed Efficiency Explained:

	Good	Better	Best
% Rank:	Average	Top 25%	Top 1%
Feed:Gain	0.04	-0.04	-0.21
Intake	27	2	-61

Across Breed Comparisons

Dare to compare: You cannot afford to make mistakes in your breeding program! Choosing to use sires with incomplete or low value data can unknowingly make your herd less profitable – same work, same cost, poor results - unacceptable. Leachman ABC's are the most reliable and comprehensive EPD's in the industry. They are backed by a large (nearly a million), long-standing (over 30 years), multi-breed (over 15 breeds) database. Using this system assures you of making sound breeding decisions with minimal risk of failure.

4-Star All-Around

1. Reg#: the registration number of the animal. NotReg means the animal is not registered. Pending means that a registration number has been applied for, but was not issued at the time of catalog printing.
2. Brd: breed of the animal if two breeds or less are involved. If more than two breeds are in the animal, then the composition shows the percent British and the percent Continental, i.e. 58B 42C means 58% British and 42% Continental.
3. DOB: date of birth
4. P = polled. S = scurred. H = horned. PP = Homozygous Polled. PH = Heterozygous Polled.
5. Cooperator herd where the bull was raised.
6. Color: BBK=homozygous black, BLK = black, BWF = black white face, BBF = black brockle face, RED = red, RWF = red white face, WHT = white, BRC = black red carrier.
7. Pen where the bull is located.
8. Genetic Defect codes - a C appended to the end denotes carrier and an F denotes tested free and P denotes possible but untested.
NH - Neuropathic Hydrocephalus
AM - Arthrogryposis Multiplex
CA - Contractural Arachnodactyly
OS - Osteopetrosis
DD -Developmental Duplication

Phenotype Scores to Make Bull Buying Easier:

9. CE: Calving Ease is the predicted calving ease if you use the bull on heifers. If there is a number in the brown box, this indicates the breed calculated calving ease direct EPD. In addition, we provide our Leachman estimated calving star system.
***** The easiest calving bulls in the industry.
**** Use on smaller heifers with minimal assistance needed
*** Use on larger heifers with some assistance expected.
10. Maternal: This is an estimate of maternal efficiency, NOT milk. It includes \$Ranch, Udder EPD and Fertility EPD as the basis for the Star system. The bulls are scored from one star to five stars. Five Star bulls will produce some of the most profitable, good uddered cows in the industry.

11. Fertility: Predicts the number of calves that a bull's daughters will have in the first 8 years of their life. This is an early release of information from Zoetis. Validation is still underway to confirm the efficacy of this EPD.
12. Udder EPD: This EPD assesses the bag attachment and teat size of the bull's daughters. Bulls with 5 & 4 stars should sire females with exceptional udder quality.
13. Growth: This is a score from one star to five stars, where five stars means maximum growth. Even the one star bulls are as growthy as any bull in America 20 years ago.
14. Feedlot: This looks at all of the post weaning traits including gain, conversion, carcass weight, and carcass merit. Scored from one star to five stars, where five stars would produce maximum overall value in your feeder calves.
15. Feet: Is an estimate of the claw shape of an animal's feet. The bulls are scored on a 1 to 5 scale. Bulls that are 5 and 4 Star for Feet should improve your herds feet and have a low incidence of claw issues himself. One star bulls should be used in a terminal breeding program.
16. Disposition: Our traditional score of 1 – 5 on disposition. Score 5 bulls are bulls you can walk up to and touch. Score 3 is about average historically for Leachman bulls. However, we are making a concerted effort to improve disposition, so most bulls score 3 or higher. The bulls scored 2.5 or 2 are nervous and do not like to be in close quarters with people on foot – but they are great for big range operations.
17. Phenotype: A combination of eye appeal and overall kind. Scored from one star to five stars. Five star bulls are the best phenotypic bulls in the sale (in our opinion)! Two star bulls are less attractive visually than average.

Indexes

18. \$Ranch EPD: This Leachman profit index that predicts weaning profitability based on calving ease, weaning weight, maternal milk, cow cost, and FERTILITY. Based on producing 100 calves. This EPD assumes a slide on calf prices of \$10 / cwt.
19. \$Feeder: This number is expressed in terms of the bull's added value to the sale price of your feeder calves. It is expressed in dollars per head. Thus when comparing a +100 bull vs. a +50 bull, we expect the first bull to sire calves worth \$50 per head more at weaning (regardless of their weight).
20. \$Profit™ EPD: One, simple, proven number that gives each trait a weight according to its impact on profit.
29. F:G is the pedigree estimated feed to gain EPD that predicts the feedlot efficiency of the bulls offspring. A negative number means that the bull's progeny will feed more efficiently. Example: -0.50 means that the bulls progeny will require ½ pound less feed per pound of gain.
30. Intake: is an estimate of the amount of feed that the bull's progeny will consume over a 112 day feeding period. It is expressed in pounds. Animals with higher intake will consume more throughout their life. Animals with lower intake will consume less.
31. SC is an EPD, expressed in centimeters, predicting the yearling scrotal circumference of a sire's progeny, compared to that of other sires.

EPDs/ABCs

Breed Association EPDs (Expected Progeny Differences) are listed for all registered animals. Leachman ABCs (Across Breed Comparisons) are listed for all un-registered animals. All ABCs are on an Angus base and can be compared across breeds within this catalog. EPDs are appropriate association EPDs without any adjustments.

21. Birth weight EPD/ABC expressed on an Angus scale (or breed scale for Red Angus, and Charolais).
22. Weaning weight EPD/ABC expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
23. Yearling EPD/ABC expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
24. Milk EPD/ABC expressed on a breed scale. The Stabilizers are expressed on an Angus scale. This is the best predictor of a bull's daughter's ability to milk. It measures the difference in weaning weight that will be produced between one bull's daughters and another bull's daughters due solely to milk.
25. MWT is the predicted mature weight of daughters that you will get if you use the bull on a 1250 pound cow. If your cows weigh 1350, add 100 to this predicted weight. If your cows weigh only 1150, subtract 100 from this predicted weight. This EPD is the best indicator of daughter size -- far better than frame score or yearling height.
26. YHT is an EPD, expressed as frame score, predicting the yearling frame score of a sire's progeny, compared to that of other sires.
27. IMF is the ultrasound based EPD/ABC for marbling expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
28. REA is the ultrasound based EPD/ABC for ribeye area expressed on a breed scale. The Stabilizers are expressed on an Angus scale.
32. PAP: PAP EPD. If there is a number in the green box, this is the actual PAP score of the animal. If there is a circle around the score, this indicates that the score was collected above 8500 ft in Walden CO.

Key to bull comments:

- Any reference to % rank is the percentile rank within that bull's breed. Top 1% means the animal ranks better than 99% of the population on that trait.
- Reference to the number rank (i.e. #2 \$Profit) is the bulls rank within his breed within the sale bulls for that trait. So, #4 F:G ST means the 4th best Feed:Gain Stabilizer bull in the sale.
- Other abbreviations used in the comments include:
 - Dam 5@101 NR – indicates that the bull's dam has five calves with an average weaning ratio of 101
 - WR & NR = weaning or nursing ratio. How the calf ranked within herd on their adjusted weaning weight.
 - YR = yearling ratio. How the calf ranked within herd on adjusted yearling weight.
 - AWW = adjusted 205 day weaning weight. AYW = adjusted 365 day yearling weight.
 - REA & IMF = either adjusted data or ratios for ultrasound ribeye area and inter-muscular fat (marbling).
 - ADG = average daily gain on test. WDA = weight per day of age at a year.
 - Stay = the Red Angus EPD for Stayability. This predicts the likelihood that a bull's daughters stay in the herd. +14 means that 14% more of this bull's daughters will be in the herd at age 6.

Simplify A.I. with Leachman Beef Blends!

**The concept is simple – one straw of semen blended
with four carefully chosen A.I. sires.**

Leachman Beef Blends utilizes the same technology the dairy industry has relied on for years. Not only does this product simplify your AI program, but using a 4-bull blend offers genetic risk management. The average of these EPDs has very high accuracy.

***Make your breeding decisions easy with these three options.
Each meets a specific need and offers the highest level of genetic merit.***

Terminal Specialist

A blend of the highest \$Feeder, BBK sires you can find in the industry. This blend is specifically designed to make you more profit in the feed yard.

Maternal Specialist – Red or BBK

A blend of the most fertile, high-udder and foot quality, and highest \$Ranch sires available. This blend is specifically designed to make replacement heifers.

&

have teamed up to offer an innovative solution to your beef cattle A.I. program!

Leachman Beef Blends

Order Today!

Step 1) Select Your Blend

- Red Stabilizer Maternal
- Black Stabilizer Maternal
- Homozygous Black Stabilizer Terminal

Step 2) Select Your Quantity

Semen starts at \$25 – 10% off 50+ units, 20% off 100+ units, AND 30% off 200+ units. Free shipping on orders over 100 units.

Step 3) Place Your Order

No more planned matings. No more struggling over which sire to use. No more hassle at the semen tank. Enjoy watching those calves!

Leachman PAP EPDs are the best tool available for high altitude ranchers!

- *We test older bulls at over 8,500 feet in North Park.*
- *We have genomically enhanced PAP EPDs.*
- *We offer a DNA PAP test for heifers via Zoetis' Inherit Select test.*
- *Environment (age, altitude, and season) have a lot to do with a PAP scores.*

- *Your herd does not inherit the PAP score of the bulls you buy, it does inherit the PAP EPD!*
